HISTORIC ARTIFACT INVENTORY

The following is a list of the historic artifacts excavated at Jordan's Point, site 151. The artifacts are categorized according to ceramic, glass, metal, miscellaneous and prehistoric items.

44PG151/Beach SC

1 Wine bottle glass: fragment, 1, blown.
1 Wine bottle glass: fragment, 1; glass-tipped pontil.
1 Wine bottle glass: fragment 1; bare iron pontil.
1 Horse shoe.
1 Spike, ferrous alloy.
1 Brick fragment.
1 Unidentified fragment: glass.

44PG151/Surface

1 Chinese porcelain, underglaze: coffee/chocolate cup fragment, 1.
1 Clay tobacco pipe stem, English: stem fragment, stem hole diameter 5/64-1.
2 Delftware blue and white: plate fragments, 2.
3 Rhenish stoneware, Westerwald: jug fragments, 2; fragment, 1.
2 Case bottle glass: fragments, 2.
1 Window glass: fragment, 1.
8 Wine bottle glass fragments: including 1 kick fragment.
1 Buckle: harness.
1 Horseshoe: fragment of left calkin and partial branch, ca.1800.
2 Nail fragments: wrought.
10 Strap fragments: iron.
1 Unidentified fragment: iron.
Bone.
1 Pan tile fragment.

44PG151/Survey 6/86 and 9/86

1 Brown stoneware, English: storage jar fragment, 1.
1 Brown stoneware, Rhenish, Frechen: hollow ware fragment, 1.
1 Brown stoneware, Yorktown: tankard fragment, 1.
1 Clay tobacco pipe bowl, English: fragment.
5 Clay tobacco pipe stems, English: fragments, stem hole diameter 8/64-1; 5/64-2; 6/64-2.
1 Coarseware, Dutch: milkpan fragment, 1.
1 Coarseware, Staffordshire, iron glaze: hollow ware fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
1 Delftware: plain hollow ware fragment.
3 White saltglazed stoneware: hollow ware fragment, 1; tankard fragment, 1; fragment, 1.
3 Tableware glass: unidentified fragments, 3(1).
5 Wine bottle glass fragments.
4 Nails: wrought.
Bone.
1 Gunspall: flint.
Pan tile fragments.

44PG151/1
1 Brown stoneware, Burslem: tankard fragment.
4 Brown stoneware, English: tankard fragments, 2; bottle fragment, 1; storage jar fragment, 1.
4 Brown stoneware, Rhenish, Frechen: Bartmann jug fragments, 2; hollow ware fragments, 2.
1 Brown stoneware, Yorktown, Bisque: hollow ware fragment, 1.
1 Coarseware, Dutch: milkpan fragments, 1.
1 Colono ware: fragment, 1.
1 Delftware, polychrome: plate fragment, 1.
3 Delftware, blue and white: plate fragment, 1; fragments, 2.
2 Rhenish stoneware, Westerwald: jug fragments, 2, including one with sprig molding and manganese purple wash.
1 White saltglazed stoneware: hollow ware fragment, 1.
3 Case bottle glass: fragments, 3.
1 Clear glass: fragment with the letter "R" in relief.
1 Window glass: fragment, 1.
7 Wine bottle glass: including 1 kick and base fragment; 2 base fragments, 1 shoulder fragment, and 3 fragments.
2 Stock lock bolts: iron fragments, 2.
2 Brick fragments.
4 Flint fragments.
Mortar.

44PG151/1 - Surface Finds, 1986

Surface, 1986.
1 Coarseware, Dutch: milkpan fragment, 1.
1 Molten glass: fragment, 1.
1 Wine bottle glass: fragment, 1.
1 Hoe eye: iron.
2 Nail: wrought.
1 Nail: fragment.
1 Tack: iron.
44PG151/1A

2 Clay tobacco pipe stems, English: stem hole diameter 7/64-1; 5/64-1.
2 Rhenish stoneware, Westerwald: jug fragment, 1; tankard fragment, 1.
1 Nail: wrought.
Mortar: oyster shell.
Oyster shell.
67 Pan tile fragments.

44PG151/1/1

Monticello Field School Survey.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
Bone: charred.
Seed.

44PG151/1/2

Monticello Field School Survey.
1 Brick fragment.

44PG151/1/2A

Monticello Field School Survey.
1 Brown stoneware, Burslem: tankard fragment, 1.
2 Clay tobacco pipe bowl fragments, English.
5 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-5.
1 Coarseware, Dutch: hollow ware fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
7 Delftware, glaze chips.
2 Delftware, plain: fragments, 2.
5 Delftware, unglazed: fragments, 5.
9 Rhenish stoneware, Westerwald: jug fragments, 9; including 4 sprig-molded fragments.
3 White saltglazed stoneware: hollow ware fragments, 2; tankard fragment, 1.
Mirror glass fragment.
Window glass.
Wine bottle glass: including 1 wine bottle seal fragment.
1 Wine glass: rim fragment, 1.
1 Lead shot.
7 Nails: wrought.
32 Nails: fragments.
Strap: iron.
Bone: charred.
Brick: fragments.
Pan tile: fragments.
Oyster shell.
1 Core: quartz.
3 Flakes: quartz.
2 Prehistoric sherds: shell-tempered.

44PG151/1/3

Monticello Field School Survey.
1 Brown stoneware, English: storage jar fragment, 1.
1 Clay tobacco pipe bowl fragment, English.
5 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-3; 6/64-1.
3 Coarseware, Buckley: storage jar fragments, 3.
2 Rhenish stoneware, Westerwald: jug fragments, 2; including 1 fragment with medallion.
2 White salt-glazed stoneware: hollow ware fragment, 2.
Mirror glass.
Window glass.
2 Nails: wrought.
8 Nails: fragments.
Bone: charred.
Brick fragments.
Gunflint.
Mortar: oyster shell.
Nut shell fragments.
Oyster shell.
3 Pan tile fragments.

44PG151/1/3A

Monticello Field School Survey.
2 Delftware, blue and white: plate fragment, 1; fragment, 1.
1 Delftware, plain: fragment, 1.
Wine bottle glass.
3 Nails: fragments.
Bone.
Brick fragments.
Pan tile fragments.

44PG151/1/4

Monticello Field School Survey.
1 Clay tobacco pipe stem fragment, English: stem hole diameter 5/64.
Tableware glass.
Wine bottle glass.

330
2 Nails: wrought.
2 Nails: fragments.
Bone: charred.
Brick.
Mortar: oyster shell.
Oyster shell.
Pan tile fragment.
Wood: charred.

44PG151/1/4A
Monticello Field School Survey.
1 Delftware, blue and white: plate fragment, 1.
1 Delftware, plain: fragment, 1.
Window glass.
Mortar: oyster shell.
Wood: charred.

44PG151/1/4B
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
Wine bottle glass.
1 Nail: wrought.
1 Nail: fragment.
Mortar: oyster shell.
Pan tile.
Wood: charred.

44PG151/1/5
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 Coarseware, Staffordshire, mottled glaze: mug fragment.
1 Delftware, blue and white: plate fragment.
1 Rhenish stoneware, Westerwald: jug fragment with "...CE..." in relief frieze (c.1st qtr. 17th century).
1 White saltglazed stoneware: tankard fragment, 1.
Mirror glass.
Window glass.
1 Nail: fragment.
Scrap lead.
1 Straight pin: brass.
Bone: charred.
Brick.
Pan tile fragments.

44PG151/1/6
Monticello Field School Survey.
1 Clay Tobacco pipe stem, English: stem hole diameter 5/64.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
3 White saltglazed stoneware: plate fragments, 3.
2 White saltglazed stoneware, slip dipped: hollow ware fragments, 2.
Phial base.
Wine bottle glass.
4 Nails: wrought.
Bone.
Flint.
Mortar: oyster shell.
Pan tile fragment

44PG151/1/7
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 Creamware: unidentifiable fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
1 Delftware, plain: fragment, 1.
1 Delftware, polychrome: fragment, 1.
Mirror glass.
Window glass.

44PG151/1/8
Monticello Field School Survey.
1 Brown stoneware, Burslem: tankard fragment, 1.
1 Colono ware: fragment.
Mirror glass.
Window glass.
Wine bottle glass.
2 Nails: wrought.
2 Nails: fragments.
1 Pot hook: iron.
Bone.
Mortar: oyster shell.
Oyster shell.
Pan tile.
Monticello Field School Survey.

1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 Coarseware, Dutch: jar fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
2 White saltglazed stoneware: hollow ware fragment, 1; saucer fragment, 1.

Mirror glass.
Window glass.
1 Wine bottle glass seal: initials "RB".
1 Cotter pin: iron.
2 Nails: wrought.
7 Nails: fragments.
1 Agate fragment.
2 Flint debitage.
Oyster shell.
Pan tile fragments.

Monticello Field School Survey.

1 Chinese porcelain, underglaze: saucer fragment, 1.
4 Clay tobacco pipe bowl fragments, English: fragments.
8 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-8.
2 Coarseware, Staffordshire, mottled glaze: fragments, 2.
3 Delftware, blue and white: plate fragments, 3.
1 Delftware, plain: fragment, 1.
1 Delftware: unglazed fragment, 1.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
2 White saltglazed stoneware: fragments, 2.
1 White saltglazed stoneware, slip dipped: tankard fragment, 1.

Window glass.
Wine bottle glass.
11 Nails: wrought.
4 Nails: fragments.
Strap: iron.
Brick.
Mortar.
Oyster shell.

Monticello Field Survey School.

6 Clay tobacco pipe bowl fragments, English.
1 White saltglazed stoneware: saucer fragment, 1.
2 White saltglazed stoneware, slip dipped: hollow ware fragments, 2.
Mirror glass.
Phial glass.
Window glass.
Wine bottle glass.
1 Wine glass bowl: fragment.
2 Nails: fragments.
Oyster shell fragments.

44PG151/1/12
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: unmeasurable.
1 Nail: wrought.
Bone: burnt.
Mortar: oyster shell.
1 Pan tile: fragment.

44PG151/1/12A
Monticello Field School Survey.
2 Clay tobacco pipe bowl fragments, English.
1 Delftware, blue and white: fragment, 1.
1 Delftware, plain: fragment, 1.
Window glass.
5 Nails: fragments.

44PG151/1/13
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 6/64.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
1 White saltglazed stoneware: hollow ware fragment, 1.
Tableware glass.
Window glass.
Wine bottle glass.
1 Nail: wrought.
8 Nails: fragments.
Bone: burnt.
Brick: fragment.
Pan tile: fragment.
Monticello Field School Survey.
1 Brown Stoneware, English: tankard fragment, 1.
Phial glass.
Window glass.
Wine bottle glass.
1 Wine glass: fragment, 1.
2 Nails: wrought.
1 Nail: fragment.
Oyster shell.
Pan tile: fragments.

Monticello Field School Survey.
1 Brown Stoneware, Burslem: tankard fragment, 1.
2 Brown Stoneware, English: tankard fragment, 1; storage jar fragment, 1.
1 Brown Stoneware, Rhenish, Frechen: storage jar fragment, 1.
1 Clay tobacco bowl fragment, English.
2 Clay tobacco stem fragments, English: stem hole diameter 5/64.
2 Delftware, plain: fragments, 2.
4 Delftware, unglazed: fragments, 4.
1 Rhenish stoneware, Westerwald: jug fragments, 1; (1st half of 17th century).
2 White saltglazed stoneware: saucer fragment, 1; tankard fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass.
1 Lock bolt: iron.
1 Nail: wrought.
2 Nails: fragments.
Bone: burnt.
Pan tile fragments.
Crossmend: White saltglazed stoneware saucer fragment to 2/3C.

Monticello Field School Survey.
1 Delftware, blue and white: fragment, 1.
Wine bottle glass.
4 Nails: wrought.
2 Pan tile fragments.
Monticello Field School Survey.
1 Brown stoneware, Rhenish, Frechen: storage jar fragment, 1.
1 Brown stoneware, Yorktown: tankard fragment, 1.
1 Chinese porcelain, underglaze: hollow ware fragment, 1.
1 Clay tobacco pipe bowl, English.
5 Clay tobacco pipe stems, English: stem hole diameter 5/64-4; 4/64-1.
1 Creamware: hollow ware fragment.
1 Delftware, blue and white: fragment, 1.
2 Delftware, plain: fragment, 2.
Window glass.
Wine bottle glass.
Andiron: iron.
1 Button: pewter, one piece.
10 Nails: wrought.
2 Nails: fragments.
1 Ring: iron.
Bone.
Flintdebitage.
Shell.

Monticello Field School Survey.
2 Brown stoneware, English: bottle fragments, 2(1).
1 Clay tobacco pipe bowl fragment, English.
3 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-2.
1 Clay tobacco pipe stem, local.
1 Delftware, plain: fragment, 1.
2 Delftware, unglazed: fragments, 2.
1 White saltglazed stoneware: tankard fragment, 1.
Machine made glass: bottle neck (intrusive).
Mirror glass.
Window glass.
Wine bottle glass.
5 Nails: wrought.
8 Nails: fragments.
Bone: including some burnt.
Brick.
Shell.
Monticello Field School Survey.
1 Brown stoneware, English: storage jar fragment, 1.
1 Clay tobacco pipe bowl, English.
2 White saltglazed stoneware: hollow ware fragments, 2.
Machine made glass fragments (intrusive).
Mirror glass.
Window glass.
Wine bottle glass.
1 Nail: wrought.
Bone: burnt.
Brick.
Pan tile fragments.
Shell.

Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 Creamware: plate fragment, 1.
1 White saltglazed stoneware, slip dipped: hollow ware fragment, 1.
Tableware glass.
Window glass.
Wine bottle glass.
2 Wine glass: foot fragments, folded.
4 Nails: wrought.
1 Nail: fragment.
Strap: iron.
Bone: burnt.
Mortar: oyster shell.
Pan tile fragment.
Shell.

Monticello Field School Survey.
1 Horseshoe: iron.
2 Pan tile fragments.

Monticello Field School Survey.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-1.
2 Delftware, blue and white: fragments, 2.
1 White saltglazed stoneware: hollow ware fragment, 1.
Opaque white glass: mug base.
3 Nails: wrought.
4 Nails: fragments.
Scrap lead.
Pan tile fragments.

44PG151/1/21A
Monticello Field School Survey.
Phial glass.

44PG151/1/22
Monticello Field School Survey.
1 Clay tobacco pipe bowl fragment, English.
4 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-3.
3 Delftware, plain: chamberpot fragments, 3.
1 Delftware, unglazed: fragment, 1.
3 Window glass: fragments, 3.
Wine bottle glass.
1 Nail: wrought.
3 Nails: fragments.
Flint: calcined.
Oyster shell.
2 Pan tile fragments.

44PG151/1/23
Monticello Field School Survey.
2 Clay tobacco pipe bowl fragments, English.
2 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-2.
1 Clay tobacco pipe stem fragment, local.
1 Delftware, blue and white: fragment, 1.
1 Delftware, plain: fragment, 1.
3 Rhenish stoneware, Westerwald: jug fragments, 2; tankard fragment, 1.
1 White saltglazed stoneware: tea bowl fragment, 1.
3 Nails: wrought.
Brick fragment: burned.
Flint: flake.
Shell.
Wood: charred.
44PG151/1/24
Monticello Field School Survey.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 White saltglazed stoneware: fragment, 1.
Mirror glass.
Tableware glass.
Window glass.
Wine bottle glass.
1 Nail: fragment.
Oyster shell.

44PG151/1/25
Monticello Field School Survey.
4 Clay tobacco pipe bowl fragments, English.
3 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-1; 5/64-1.
1 Coarseware, Dutch: milkpan fragment, 1.
1 Delftware, plain: fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass.
4 Nails: wrought.
2 Nails: fragments.
Bone.
Oyster shell.
Pan tile fragment.

44PG151/2
Outbuilding, brick-lined.
2 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-2.
3 White saltglazed stoneware: tankard fragment, 3.
Window glass.
Wine bottle glass: including 1 neck (ca.1st quarter of 18th century).
1 Nail: wrought.
2 Pan tile fragments.
Crossmend: White saltglazed stoneware tankard with 2/4J, 2/4K.

44PG151/2
Outbuilding, brick-lined.
Clay tobacco pipe stem fragment, English: mouth piece fragment, stem hole diameter 5/64-1.
1 Rhenish Stoneware, Westerwald: jug fragment, 1.
1 Window glass fragment.
1 Wine bottle glass: shoulder fragment.
3 Nails: fragments.
Bone.
Mortar.
3 Pan tile fragments.

44PG151/2/1

Rodent disturbance.
1 Chinese porcelain, underglaze: saucer fragment, 1.
3 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-3; including one stem with bowl.
2 Rhenish stoneware, Westerwald: jug fragment, 1; fragment, 1.
1 Wine bottle glass fragment.

44PG151/2AB

1 Flooring tile: brick with impression of deer’s foot; 71/4" x 2" x 71/4".
2 Flooring tile fragments: including 1 with impression of dog’s paw.

44PG151/2/1A

Outbuilding, brick-lined.
1 Chinese porcelain, underglaze: saucer fragment, 1.
5 Clay tobacco pipe bowl fragments, English.
8 Clay tobacco pipe stem fragments, English: including 1 heel, stem hole diameter 4/64-2, 5/64-5.
1 Coarseware, Dutch: milkpan fragment, 1.
1 Coarseware, New England Slipware: hollow ware fragment, 1.
1 Delftware, blue and white: fragment, 1.
2 Delftware, plain: fragments, 2.
3 Delftware, unglazed: fragments, 3.
2 Rhenish stoneware, Westerwald: jug fragments, 2.
2 White saltglazed stoneware: tankard fragment, 1; fragment, 1.
Mirror glass.
Tableware glass.
Window glass.
Wine bottle glass.
1 Lead object, unidentified.
9 Nails: wrought.
12 Nails: fragments.
1 Stud: brass.
1 Flake: flint.
Pan tile fragments.
Outbuilding, brick-lined.

3 Brown stoneware, Rhenish, Frechen: Bartmann jug fragments, 2(1); hollow ware fragment, 1.

2 Chinese porcelain, underglaze: tea bowl fragment, 1; hollow ware fragment, 1.

6 Clay tobacco pipe bowl fragments, English.

24 Clay tobacco pipe stem fragments, English: stem hole diameter 4/64-1, 5/64-23.

1 Coarseware, Buckley: storage jar fragment.

1 Coarseware, Dutch: milkpan fragment, 1.

1 Slipware, North Devon: jug fragment, 1.

1 Slipware, Staffordshire, mottled: hollow ware fragment, 1.

8 Delftware, blue and white: punch bowl fragment, 1; fragments, 7 chip, 1.

6 Delftware, plain: fragments, chips, 2.

11 Delftware, unglazed: fragments.

3 Rhenish stoneware, Westerwald: jug fragments, 3.

5 White saltglazed stoneware: saucer fragment, 1; tankard fragment, 1; hollow ware fragment, 2; fragment, 1.

2 White saltglazed stoneware, slip dipped: tankard fragments, 2.

Flask neck and body fragment.

Mirror glass.

Molten glass.

Tableware glass.

Window glass.

Wine bottle glass.

Axe poll: iron.

Lead disc.

Lead shot.

25 Nails: wrought.

31 Nails: fragments.

Scrap brass.

Sickle blade: iron.

2 Strap hinges: fragments.

2 Studs: brass.

Unidentified iron object.

Unidentified lead object with decoration.

1 Upholstery tack: brass.

1 Straight pin: brass.

Bone: including some with butchering marks.

Pan tile fragments.

Seeds.

Shell.
44PG151/2/1C

Outbuilding, brick-lined.
3 Brown stoneware, English: tankard fragments, 2(1); hollow ware fragment, 1.
1 Brown stoneware, Yorktown: bottle fragment, 1.
1 Chinese porcelain, underglaze: coffee/chocolate cup fragment, 1.
6 Clay tobacco pipe bowl fragments, English.
8 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-8.
2 Delftware, blue and white: fragments, 2.
4 Delftware, plain: fragments, 4; 1 glaze chip.
2 Delftware, unglazed: fragments, 2.
5 Rhenish stoneware, Westerwald: jug fragments, 3; tankard fragment, 1; fragment, 1.
1 Whieldon ware: plate fragment, 1, burned.
1 White saltglazed stoneware, slip dipped: hollow ware fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass.
Wine glass fragment.
27 Nails: wrought.
11 Nails: fragments.
Sickle blade: iron.
4 Straight pins: brass.
4 Straight pins: fragments.
2 Unidentified iron objects: (conserve).
Bone.
Brick: highly fired, warped.
Oyster shell.
Pan tile fragments.

44PG151/2/1D

Outbuilding, brick-lined.
1 Coarseware, Dutch: hollow ware fragment.
9 Coarseware, Pennsylvania Slipware: bowl rim, 9(1).
2 Creamware: plate fragments, 2.
1 White saltglazed stoneware: hollow ware fragment, 1.
Window glass.
Wine bottle glass.
9 Nails: wrought.
6 Nails: fragments.
1 Straight pin: brass.
1 Unidentified iron plate.
Bone: some turtle shell.
Brick tile.
Mortar: oyster shell.
Pan tiles.
Shell.

**44PG151/2/1E**

Outbuilding, brick-lined.
1 Clay tobacco pipe stem fragment, English: stem hole diameter 5/64.
1 Delftware, blue and white: plate fragment, 1.
1 Delftware, plain: fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass: including 1 kick and 1 neck.
1 Button face: copper, domed.
6 Nails: wrought.
Bone.
1 Fan blade: bone.
Pan tiles.

**44PG151/2/1F**

Outbuilding, brick-lined.
Window glass.
Wine bottle glass: including 1 neck ca.1770.
6 Nails: wrought.
1 Nail: fragment.
Scrap brass: large pieces.
Bone: including turtle shell.
Mortar: oyster shell.
Plaster: oyster shell.
Shell.
Crossmends: Wine bottle glass with 2/1G, 2/1K.

**44PG151/2/1G**

Outbuilding, brick-lined.
Wine bottle glass.
1 Chafing dish support: brass.
6 Nails: wrought.
4 Nails: fragments.
6 Straight pins: brass.
Bone: including turtle shell.
Brick fragments: highly fired.
Mortar: oyster shell.
2 Pan tile fragments.
Plaster.
Shell.
Wood: charred.
Crossmends: Wine bottle glass with 2/1F and 2/1K.

44PG151/2/1H
Outbuilding, brick-lined.
1 Clay tobacco pipe bowl fragment, English.
1 Clay tobacco pipe stem fragment, English: stem hole diameter 6/64.
1 Delftware: unglazed fragment, 1.
Window glass.
Wine bottle glass.
Lead shot.
8 Nails: wrought.
1 Nail: fragment.
Bone.
Pan tile fragment.

44PG151/2/1J
Outbuilding, brick-lined.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
Window glass.
5 Nails: wrought.
Scrap lead.

44PG151/2/1K
Outbuilding, brick-lined.
1 White saltglazed stoneware: plate fragment, 1, bead and reel.
Window glass.
Wine bottle glass.
3 Nails: wrought.
2 Nails: fragments.
Ball of fired clay (?)..
Wood: possibly cedar.
Crossmends: Wine bottle glass with 21F and 21G.

44PG151/2/1L
Outbuilding, brick-lined.
Case bottle glass.
Window glass.
Wine bottle glass.
8 Nails: wrought.
4 Nails: fragments.
Pintle: iron.
Bone.
Brick tile: 2" x 7 3/8" x ?.
Oyster shell.
Pan tile fragments: including 2 exhibiting very thick mortar.
Plaster.

44PG151/2/1M

Outbuilding, brick-lined.
5 Coarseware, Dutch: storage jar fragments, 4(1); storage jar fragment, 1.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
Window glass.
Wine bottle glass: including 2 necks and 1 base ca. 1730-50.
50 Nails: wrought.
67 Nails: fragments.
1 Spike: wrought.
2 Straight pins: brass.
Bones.
Plaster: oyster shell.
Wood.

44PG151/2/1N

Outbuilding, brick-lined.
1 Clay tobacco pipe stem fragment, stem hole diameter 5/64.
1 Coarseware, Dutch: hollow ware fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass: including 1 bottle with "RB" bottle seal.
Corking wire: brass.
Knife blade: iron.
7 Nails: wrought.
5 Nails: fragments.
1 Nut and bolt: iron.
Unidentified iron object.
Bone.
2 Cinders.
1 Flint.
Wood.

345
44PG151/2/1P
Outbuilding, brick-lined.
Wine bottle neck.
4 Nails: wrought.
4 Nails: fragments.

44PG151/2/2
Outbuilding, brick-lined.
Wine Bottle glass: including 1 neck ca.1680-1730.

44PG151/2/2A
Outbuilding, brick-lined.
1 Brown stoneware, English: hollow ware fragment, 1.
3 Clay tobacco pipe bowl fragments, English.
3 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-3.
1 Coarseware, New England, slipware: jug fragment, 1.
1 Delftware, blue and white: fragment, 1.
1 Delftware, plain: fragment, 1.
3 Delftware, unglazed: fragments, 3.
2 White saltglazed stoneware: hollow ware fragment, 2.
Window glass.
Wine bottle glass.
6 Nails: wrought.
13 Nails: fragments.
Cinder (pumice?).

Outbuilding, brick-lined.
1 Brown stoneware, English: tankard fragment, 1.
2 Chinese porcelain, underglaze: tea bowl fragments, 2.
1 Clay tobacco pipe bowl fragment, English.
9 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-5; 6/64-2.
1 Clay tobacco pipe stem fragment, local.
2 Coarseware, Dutch: milkpan fragment, 2.
1 Delftware, blue and white: fragment, 1.
2 Delftware, plain: fragments, 2.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
2 White saltglazed stoneware: tankard fragment, 1; hollow ware fragment, 1.
Case bottle glass.
Window glass.
Wine bottle glass.
Lead shot: 1/2
13 Nails: wrought.
13 Nails: fragments.
3 Strap iron: fragments.
1 Straight pin: brass.
Bone.
1 Flake: flint.
Pan tile.

44PG151/2/2C

Outbuilding, brick-lined.
2 Brown stoneware, English: bottle fragment, 1; hollow ware fragment, 1.
6 Clay tobacco pipe bowl fragments, English: 6(4).
12 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-3, 5/64-9.
1 Coarseware Dutch: milkpan fragment, 1.
2 Delftware, plain: fragments, 2.
1 Delftware, polychrome: hollow ware fragment, 1.
4 Delftware, unglazed: fragments, 4.
2 Rhenish stoneware, Westerwald: jug fragments, 2.
4 White saltglazed stoneware: saucer fragments, 3; hollow ware fragment, 1.
Case bottle glass.
Mirror glass.
Window glass.
Wine bottle glass: including 2 bases ca.1800 and ca.1730-50.
Wine glass: including 4 bowl and 2 folded foot fragments.
Hammer head: iron.
30 Nails: wrought.
32 Nails: fragments.
Snaffle bit: iron.
2 Straight pins: brass.
Turned lead.
Bone.
1 Flake: flint.
Oyster shell.
Pan tiles.
Plaster.

44PG151/2/2D

Outbuilding, brick-lined.
1 Delftware, unglazed: fragment, 1.
Window glass.
1 Lithic.
1 Prehistoric pottery sherd.
Outbuilding, brick-lined.

2 White saltglazed stoneware: unidentifiable fragments, 2.
Mirror glass.
Window glass.
Wine bottle glass.
1 Wine glass: fragment.
1 Wine glass stem.
11 Nails: wrought.
8 Nails: fragments.
1 Pewter fragment.
1 Pistol grip knife handle: brass.
Scrap brass.
4 Straight pins: brass.
1 Strap hinge: iron (conserve).
1 Strap fragment.
1 Triangular file: iron.
Bone.
Pan tile fragments.
Wood: charred.
Crossmends: Rhenish stoneware, Westerwald with 2/4B, 2/4C.

44PG151/2/4J

Outbuilding, brick-lined.
1 Brown stoneware, English: tankard fragment, 1.
1 Brown stoneware, Yorktown: bottle lip/neck fragment.
2 Clay tobacco pipe bowl fragments, English.
6 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-5.
1 Delftware, blue and white: plate rim.
1 Delftware, plain: fragment.
1 Delftware, unglazed: plate rim.
4 Rhenish stoneware, Westerwald: jug fragments, 4.
2 White saltglazed stoneware: tankard fragments, 2, ca. mid 18th century.
Window glass.
Wine bottle glass.
Wine glass fragment.
36 Nails: wrought.
19 Nails: fragments.
Scrap brass.
2 Straight pins: brass.
1 Straight pin: fragment.
1 Upholstery tack: brass.
Bone.
Flint.
Oyster shell.
Pan tile fragment.
Plaster.
Wood: charred.
Crossmends: White saltglazed stoneware tankard with 2/4K, 2.
Rhenish stoneware Westerwald jug with 2/3K.
Brown stoneware, English with 2/3C.

44PG151/2/4K

Outbuilding, brick-lined.
3 Clay tobacco pipe bowl fragments, English.
11 Clay tobacco pipe stem fragments, English: stem hole diameter 4/64-5, 5/64-6.
1 Coarseware, Dutch: jar base.
1 Delftware, blue and white: plate fragment.
7 Delftware, plain: chamber pot rim fragments, 2(1); fragments, 5.
8 Rhenish stoneware, Westerwald: jug fragments, 7; fragment, 1.
4 White saltglazed stoneware: including tankard fragments, 4.
Bead: glass, blue.
1 Decanter stopper.
Mirror glass.
1 Snuff or blacking bottle fragment.
Tableware glass: including gadrooned fragment, probably from wine glass.
Window glass: including 1 fragment with writing "window".
Lead shot.
47 Nails: wrought.
37 Nails: fragments.
1 Pewter fragment.
1 Pothook: iron.
1 Shoe buckle: brass.
4 Straight pins: brass.
2 Straight pins: brass, fragments.
Bone.
Brick.
Plaster.
Crossmends: White saltglazed stoneware tankard with 2, 2/4J.

44PG151/2/4M

Outbuilding, brick-lined.
4 Clay tobacco pipe stem fragments, English: stem hole diameter 4/64-3, 5/64-1.
2 White saltglazed stoneware: base fragments, 2(1).
Mirror glass.
Wine bottle glass: including 3 kicks ca.2nd quarter of 18th century.
6 Nails: wrought.
1 Nail: fragment.
1 Shoe buckle: brass (same as 2/4K).
1 Silver strip with leather attached.
1 Straight pin: brass.
1 Oarlock: iron.
Bone.
Egg shell.
Mortar.
Oyster shell.
Plaster.
Wood: charred.

44PG151/2/4P

1 Brown stoneware, English: pipkin fragment, 1.
2 Delftware, plain: chamber pot fragments, 2(1).
Case bottle.
Decanter glass.
Phial glass.
Window glass.
Wine bottle glass: including 2 kicks, 3 necks, 6 "RB" wine bottle seals.
1 Jetton: brass.
3 Nails: wrought.
1 Nail: fragment.
Scrap: brass.
2 Straight pins: brass, fragments.
Bone.
Shell.
Crossmends: Brown stoneware pipkin with 2/3R, 2/2M, 2/2N, 2/2P.

44PG151/2/4R

Outbuilding, brick-lined.
Window glass.
Wine bottle glass.
Bone.
Shell.

44PG151/2/4S

Outbuilding, brick-lined.
22 Delftware, plain: chamber pot fragments, 22.
Wine bottle glass.
Corking wire: brass.

365
1 Nail: wrought.  
1 Nail: fragment.  
1 Padlock hasp: iron.  
Bone.  
Shell.  
Wood: charred.  
Crossmends: Delftware chamber pot with 2/4, 2/4V.

44PG151/2/4T  
Outbuilding, brick-lined.  
1 Clay tobacco pipe bowl fragment, English.  
1 Clay tobacco pipe stem fragment, English: stem hole diameter 5/64.  
Wine bottle glass: including 1 kick ca. 2nd quarter of 18th century.  
1 Nails: wrought.  
1 Nail: fragment.  
Bone.  
Pan tile fragment.

44PG151/2/4V  
Outbuilding, brick-lined.  
1 Brown stoneware, English: jar fragment, 1.  
1 Clay tobacco pipe bowl fragment, English.  
1 Clay tobacco pipe stem fragment, English: stem hole diameter 4/64.  
1 Delftware, plain: chamber pot fragment, 1.  
Wine bottle glass.  
1 Butterfly hinge: iron.  
1 Cauldron rim: iron.  
Corking wire: brass.  
6 Nails: wrought.  
3 Nails: fragments.  
Bone.  
Shell.  
Wood: charred.  
Crossmends: Delftware chamber pot with 2/4S, 2/4.

44PG151/3  
Dwelling, post structure.  
Wine bottle glass.
44PG151/3A

Dwelling, post structure.
1 Clay tobacco pipe bowl fragment, English.
8 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-4, 6/64-2.
2 Delftware, blue and white: plate rim fragment; plate fragment.
Mirror glass.
Phial glass.
Window glass.
Wine bottle glass.
10 Nails: wrought.
4 Nails: fragments.
Bone: including turtle.
Pan tile fragments.

44PG151/3B

Dwelling, post structure.
1 Clay tobacco pipe stem fragment, English: stem hole diameter 6/64.
1 Nails: wrought.
2 Nails: fragments.
Bone.
Mortar: oyster shell.
2 Pan tile fragments.

44PG151/3C

Dwelling, post structure (posthole).
1 Nail: wrought.
Bone.
Mortar: oyster shell.
Wood: charred.

44PG151/3D

Dwelling, post structure (posthole).
1 Clay tobacco pipe bowl fragment, English.
3 Delftware, blue and white: drug jar fragment, 1; fragments, 2.
2 Delftware, plain: hollow ware fragments.
Phial glass.
Window glass.
Wine bottle glass.
1 Lead bar.
16 Nails: wrought.
6 Nails: fragment.
1 Unidentified iron fragment.
Bone.
Flake: flint.
Oyster shell.
Pan tile fragments.

1 Bolt: iron.
Fireplace tong: iron.
7 Harness ornament fragments: brass, tinned (1 small piece of leather), round; 25 peanut-shaped.
1 Hoe: iron.
55 Nails: wrought.
17 Nails: fragments.
1 Spade: iron.
1 Upholstery tack: brass.
Bone.
Oyster shell.
Pan tile fragments: -2(1).
1 Roofing tile: slate.
Crossmend: Pan tile with 5/2B.

44PG151/5/3D

Root cellar in dwelling.
Case or window glass.
Wine bottle glass.
2 Harness: leather decorations, brass, tinned.
1 Fishhook: iron.
1 Straight pin: brass, whole.
1 Straight pin: fragment.
1 Triangular file: iron.
20 Nails: wrought.
3 Nails: fragment.
Bone.
Brick.
Mortar: oyster shell.
Wood: charred.
44PG151/5/3E

Root cellar in dwelling.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
Window glass.
Wine bottle glass.
4 Harness leather decorations: fragments, brass, tinned, round, 2; peanut-shaped, 2.
16 Nails: wrought.
6 Nails: fragment.
1 Strap: iron, unidentified.
2 Straight pins: brass.
Bone.
Brick fragment.
Wood: charred.

44PG151/5/3F

Root cellar in dwelling.
1 Clay tobacco pipe bowl fragment, English.
1 Delftware, blue and white: plate fragment, 1.
Case or window glass.
1 Nail: fragment.
1 Strap: iron, unidentified.
1 Straight pin: brass, fragment.
Bone.
Fan blade: bone.

44PG151/5/3G

Root cellar in dwelling.
12 Clay tobacco pipe bowls, English: including 2 heelless, 1 with relief "RM" astride heel, ca.1720-70.
17 Clay tobacco pipe stems, English: including 3 stem ends, stem hole diameter 5/64-11, 6/64-4, fragments, 2.
6 Delftware, blue and white: coffee/chocolate cup fragments, 2; punch bowl fragments, 2(1); fragments, 2.
5 Delftware, polychrome: tea bowl fragments, 4(1); plate fragment, 1.
Case or window glass.
Phial glass.
Wine bottle glass.
4 Nails: wrought.
1 Nail: fragment.
2 Straps: iron, unidentified.
23 Straight pins: brass, whole.
2 Straight pins: brass, fragments.
Bone.
Shell.

44PG151/7A

Outbuilding, post structure.
1 Brown stoneware, Burslem: tankard fragment, 1.
1 Brown stoneware, English: tankard fragment, 1.
1 Delftware, unglazed: fragments, 7; glaze chip.
Window glass.
Wine bottle glass: including 1 neck ca.1700.
1 Nail: wrought.
Wood: charred.

44PG151/7B

Outbuilding, post structure.
1 Lead shot.

44PG151/7C

Outbuilding, post structure.
1 Delftware, blue and white: fragment, 1.
Window glass.
1 Nail: fragment.
Bone.
Brick fragments.
Oyster shell.

44PG151/7D

Outbuilding, post structure.

44PG151/7E

Outbuilding, post structure.
Bone.
Oyster shell.
1 Soapstone fragment.

44PG151/7F

Outbuilding, post structure.
Brick fragments.
Outbuilding, post structure.  

44PG151/7H

Outbuilding, post structure.

44PG151/7L

Outbuilding, post structure.

44PG151/7M

Outbuilding, post structure.
Bone.

44PG151/7Q

Outbuilding, post structure.

44PG151/8A

1 Rhenish stoneware, Westerwald: tankard fragment, 1.
1 Case bottle glass: fragment.
2 Window glass: fragments.
4 Nails: fragments.
1 Unidentified object.
Pan tile fragment.

Root cellar, post structure.

44PG151/8B

5 Delftware, blue and white: basin fragments, 5.
Window glass.
Wine bottle glass.
9 Nails: wrought.
5 Nails: fragments.
Brick: including 1 complete brick 2 1/2" x 9" x 3 1/2" and 2 fragments.
Flint.
Pan tile fragments.
Crossmends: Delftware dish with 44PG151/8C, 8D.

Root cellar, post structure.

44PG151/8C

1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
1 Coarseware, North Devon, gravel-tempered: hollow ware fragment, 1.
16 Delftware, blue and white: basin fragments, 16.
5 Window glass fragments.
Wine bottle glass: including 1 base ca. 1st quarter of 18th century.
21 Nails: wrought.
16 Nails: fragments.
Brick fragment 4" x 2 1/2" x ?,
Pan tile fragment.
10 Plaster: with blue paint, 1; fragments, 9.
Wood: charred, (appears like oak furniture fragments).
Crossmends: Delftware dish with 8D, 8B.

44PG151/8D

Root cellar, post structure.
1 Clay tobacco pipe bowl, English: complete ca. 1720-1820; stem hole diameter 5/64.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-2.
1 Clay tobacco pipe bowl, local.
1 Clay tobacco pipe stem, local: attached to nail.
3 Delftware: drug jar rim fragments, 3(1).
39 Delftware, blue and white: basin fragments, 18; fragments, 21, glaze chips.
1 Delftware, plain: fragment, 1.
Window glass.
Wine bottle glass.
1 Candlestick: brass.
1 Hinge (?): butterfly.
98 Nails: wrought.
86 Nails: fragments.
1 Strap end buckle: brass.
Bone.
Daub.
Flint fragments: including 1 calcined.
Mud Daubers: nest.
46 Plaster with blue paint fragments.
Crossmends: Delftware dish with 8B, 8C.

44PG151/9

Root cellar, post structure.
3 Delftware, plain: fragments, 3(2); including 2 burnt fragments.
6 Wine bottle glass fragments.
4 Nails: wrought.
Bone: rib.
Oyster shells: 3.
Wood: charred.
44PG151/9A
Root cellar, post structure.
Brick: burnt.

44PG151/9B
Root cellar, post structure.
2 Delftware, plain: base fragments, 2; both partially burned.
5 Wine bottle glass fragments.
1 Nails: wrought.
Bricks.
Oyster shells.
Plaster: charred.
Wood: charred.
Crossmend: Delftware, plain base fragment with 9E.

44PG151/9C
Root cellar, post structure.
3 Clay tobacco pipe bowl fragments, English.
1 Clay tobacco pipe stem, English: stem hole diameter 6/64.
2 Clay tobacco pipe bowl fragments, local.
2 Coarseware, Dutch: milkpan fragments, 2.
1 Coarseware, North Devon, gravel-tempered: milkpan fragment, 1.
1 Colono ware: fragment, 1.
1 Delftware, blue and white: plate fragment, exterior surface burnt.
8 Delftware, plain: including fragments with only interior surface glazed, burnt; fragments, 8.
Tableware glass fragment.
1 White glass bead.
Wine bottle glass.
Molten brass: probably part of candlestick from 8C.
50 Nails: wrought.
5 Bone: vertebra fragments, 4; burnt long bone fragment, 1.
Brick sample with heavy pebble inclusions.
Mortar shell.
Oyster shell.
Pan tile fragments.
Wood: charred.

44PG151/9D
Root cellar, post structure.
6 Clay tobacco pipe bowl fragments, English.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
5 Colono ware: bowl fragments, 5.
6 Delftware: drug jar fragments, 1; fragments, 5.
1 Delftware, blue and white: drug jar fragment, 1.
Phial glass.
13 Wine bottle glass fragments.
1 Hook: iron.
62 Nails: wrought.
37 Nails: fragments.
19 Unidentifiable: iron.
Bone: some calcined.
Brick: fragment with heavy pebble inclusions; 4" x 2 1/4" x ? and 4" 2 1/2" x ?.
Daub.
Oyster shell.
Pan tile.
Wood: charred.
Crossmend: Colono ware bowl rim with 9E.

44PG151/9E

Root cellar, post structure.
5 Clay tobacco pipe bowl fragments, English: rouletted rim, 1.
4 Clay tobacco pipe stems, English: incl. 1 stem end; stem hole diam 5/64-1, 6/64-2, 7/64-1.
2 Clay tobacco pipe stems, local.
1 Colono ware: bowl fragment, 1.
6 Delftware: fragments, 6.
1 Rhenish stoneware, Westerwald: chamberpot fragment, 1.
1 Bead: glass, white.
1 Complete wine bottle with seal; "FP" for Francis Poythress; 4th quarter of 17th century.
186 Wine glass bottle fragments: including mouths, 3; necks, 3; shoulder piece; base fragments, 7; fragments, 176.
1 Lead shot.
195 Nails: wrought.
1 Straight pin.
3 Tinker's dam (?): brass; fragments.
Bone: some burnt.
Bricks: one with wood impression.
Daub.
Egg shell.
Mortar: shell.
Oyster shell.
Pan tiles.
Wood: charred.
Crossmends: Colono ware rim with 9D.
Delftware drug jar base with 9B.
Complete wine bottle with 9F.
44PG151/9F

Root cellar, post structure.
2 Clay tobacco pipe bowl fragments, English.
2 Colono ware: bowl fragments, 2.
2 Delftware, blue and white: drug jar fragments, 2.
Phial glass.
4 Wine bottle glass fragments.
1 Hoe blade: iron.
7 Nails: wrought.
12 Nails: fragments.
Bone: small mammal, bird and cranial.
Charcoal.
Egg shell.
Flint.
Mud dauber's nest.
Oyster shell.
Crossmends: Wine bottle fragments with 9E.

44PG151/10

Tree hole.
1 Clay tobacco pipe bowl fragment, local: facetted.
1 Clay tobacco pipe stem, local.
2 Delftware, Dutch: tile fragments, 2(1 unglazed) ca.1st quarter of 17th century.
1 Delftware, unglazed: fragment, 1.
Case bottle glass: including 1 neck fragment.
1 Nail: wrought.
Bone.
Brick: Dutch.
Crossmend: Dutch tile fragment with 10C.

44PG151/10A

1 Delftware, unglazed: fragment, 1.

44PG151/10B

Tree hole.
1 Brown stoneware, Rhenish, Frechen: hollow ware fragment, 1.
4 Clay tobacco pipe stems, local.
1 Rhenish stoneware, Westerwald: jug fragment, 1, 1st quarter of 17th century.
10 Case bottle fragments.
5 Nails: wrought.
5 Nails: fragments.
Scrap brass.
Bone: flat bone fragments, some calcined; dog's tooth; turtle shell fragments.
Daub.
Flint.
Oyster shell.

44PG151/10C

Tree hole.
1 Clay tobacco pipe stem, English:
4 Delftware, Dutch, polychrome: tile fragments, 4.
10 Nails: wrought.
1 Straight pin: brass.
Bone.
Flint.
Wood: charred.
Crossmend: Dutch tile with 10A.

44PG151/10D

Tree hole.
1 Slipware, Staffordshire, mottled: hollow ware fragment, 1.
Wine bottle glass fragment.
1 Strap hinge: iron.
1 Strap end: iron.
Bone.
Brick.
Daub.
Oyster shell.

44PG151/11A

Root cellar, outbuilding.
1 Clay tobacco pipe bowl fragment, English.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-2.
1 Delftware, blue and white: punch bowl fragment, 1.
30 Delftware, unglazed: fragments, 30.
1 Rhenish stoneware, Westerwald: tankard fragment, 1.
Mirror glass.
Tableware glass.
Window glass.
1 Cauldron rim.
12 Nails: wrought.

391
6 Nails: fragments.
Scrap: brass.
2 Straight pins: brass, whole.
2 Straight pins: fragments, brass.
Bone.
Mortar: shell.
Pan tiles.
Shell.

44PG151/11B

Root cellar, outbuilding.
1 Brown stoneware, Yorktown: tankard fragment, 1.
1 Chinese porcelain, underglaze: saucer fragment, 1.
24 Clay tobacco pipe bowl fragments, English: including 8 "heels", 1 bowl with crowned harp astride heel, 1 bowl ca.1620-60, stem hole diameter 7/64-1; 6 bowls ca.1720-1820.
34 Clay tobacco pipe stems, English: including 8 stem ends; stem hole diameter 4/64-1, 5/64-29; 6/64-3.
2 Clay tobacco pipe bowl fragments, local.
16 Colono ware: bowl fragments, 3(1); fragments, 13(12).
1 Coarseware, Dutch: milkpan fragment.
1 Coarseware, Staffordshire: hollow ware fragment.
4 Delftware, blue and white: drug jar fragments, 2(1); fragments, 2.
3 Delftware, plain: fragments, 3.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
1 Slipware, Staffordshire, combed: hollow ware fragment, 1
1 Slipware, Staffordshire, mottled: hollow ware fragment, 1.
1 White saltglazed stoneware: tankard fragment, 1.

Mirror glass.
2 Window glass fragments.
Wine glass: including rim fragment.
Wine bottle glass: including base ca.1750s.
1 Buckle: knee, brass (with iron chape?).
1/2 Button: brass, tinned.
1 Drawer pull backplate: brass.
1 Hoe: iron.
2 Jettons: brass, "Wolf Lavfer" (c.1618-60).
2 Harness leather decorations: brass.
1 Lead Shot.
235 Nails: wrought.
72 Nails: fragments.
1 Pot leg: iron.
26 Straight pins: whole.
5 Straight pins: fragments.
Tack: brass.
2 Tacks: iron.
1 Thimble: brass.
Turned lead.
2 Tenter hooks (?)..
2 Unidentified iron objects.
1 Upholstery tack: brass.
Wire: brass.
Bone.
1 Clay marble.
Flint.
Mortar: oyster shell.
Pan tile fragments.
Shell.
Slate.
Wood: charred.

44PG151/11C

Root cellar, out building.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
2 Colono ware: bowl fragments, 2.
Window glass.
Wine bottle glass.
12 Nails: wrought.
1 Nail: fragment.
2 Straight pins: brass.
Bone.
Clay sample.

44PG151/12

Root cellar, dwelling.
1 Clay tobacco pipe bowl, English.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
2 Nails: wrought.
3 Nails: fragments.
Bone.
Mortar: oyster shell.
Wood: charred.
44PG151/12A

Root cellar, dwelling.
4 Clay tobacco pipe bowls, English: including 1 with incised mark.
6 Clay tobacco pipe stems, English: stem hole diameter 5/64-5.
1 Coarseware, Dutch: milkpan fragment.
1 Coarseware, North Devon, gravel -tempered: hollow ware fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
1 Delftware, plain: chamber pot fragment, 1.
Mirror glass.
Window glass.
Wine bottle glass.
1 Clasp knife fragment: iron.
1 Pewter spoon handle.
1 Skillet (?): rim, iron.
1 Tinker’s dam: brass.
19 Nails: wrought.
7 Nails: fragments.
Bone.
Pan tile fragments.
Shell.

44PG151/12B

Historic. Root cellar, dwelling.
1 Clay tobacco pipe bowl, English.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-1.
1 Colono ware: fragment, 1.
1 Delftware, blue and white: plate fragment, 1.
1 Rhenish stoneware, Westerwald: jug fragment, 1.
Wine bottle glass.
10 Nails: wrought.
3 Nails: fragments.
Bone.
Pan tile fragment.
Oyster shell.

44PG151/12C

Root cellar, dwelling.
1 Brown stoneware, English: tankard fragment, 1.
1 Clay tobacco pipe bowl fragment, English.
3 Clay tobacco pipe stems, English: stem hole diameter 5.64-3.
Pharmaceutical phial base.
Window glass.
6 Nails: wrought.
3 Nails: fragments.
Scrap brass.
Bone.
Pan tile fragments.
Plaster.

44PG151/12D

Root cellar, dwelling.

Post structure.

Tree hole.
2 Clay tobacco pipe stem fragments, English.
4 Clay tobacco pipe bowl fragments, local: facetted.
5 Clay tobacco pipe stems, local: including 1 stem end.
1 Clay tobacco pipe shaving, local.
1 Delftware, plain: fragment, 1.
1 Delftware, unglazed, fragment, 1.
Case bottle glass.
2 Brass wires.
1 Clothing fastener: brass.
1 Drawer pull: iron.
23 Nails: wrought.
23 Nails: fragments.
7 Straight pins: brass.
1 Straight pin: brass, fragment.
Bone.
Daub.
Shell.
Wood: charred.

Tree hole.
2 Clay tobacco pipe stems, English: stem hole diameter 7/64.
1 Clay tobacco pipe bowl fragment, local: facetted.
4 Clay tobacco pipe stem fragments, local.
1 Clay tobacco pipe shaving, local.
1 Jetton: brass.
1 Lead shot.
32 Nails: wrought.
4 Nails: fragments.
1 Rivet: brass.
4 Straight pins: brass.
1 Trigger guard: snapshance, iron.
12 Unidentified iron fragments.
1 Wire: iron.
Bone.
Daub.
3 flint: calcined fragments.
Shell.
Wood: charred.

44PG151/23A
Posthole, outbuilding.
1 Chinese porcelain, underglaze: bowl fragment, 1.

44PG151/24A
Prehistoric human burial.

44PG151/25A
Shallow pit.
1 Strap: iron.

44PG151/26B
Probably tree hole.
1 Flooring tile fragment.

44PG151/27
Tree hole.
1 Nail: fragment.

44PG151/28A
Storage pit.
1 Clay tobacco pit stem, English: stem hole diameter 5/64.
1 Nail: wrought.
1 Straight pin: brass.
2 Turned lead fragments.
Pan tile fragment.
Shell.
44PG151/28B

Storage pit.
1 Clay tobacco pipe bowl, English.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-1.
1 Clay tobacco pipe bowl, local.
Turned lead.
Brick fragment.
Oyster shell.
1 Chunk: quartz.

44PG151/28C

Storage pit.
Wine bottle glass.
3 Nails: wrought.
Turned lead (no inscription).
Bone.
Pan tile or brick fragment.
Shell.

44PG151/28D

Storage Pit.
1 Clay tobacco pipe bowl, English.
3 Clay tobacco pipe stems, English: stem hole diameter 6/64-2; 5/64-1.
2 Clay tobacco pipe bowl fragments, local.
2 Clay tobacco pipe stem fragments, local.
Case or window glass.
Wine bottle glass.
8 Nails: wrought.
5 Nails: fragments.
9 Turned lead: fragments.
Bone.
Oyster shell.
1 Pan tile fragment.

44PG151/28E

Storage pit.
1 Clay tobacco pipe bowl, English.
1 Clay tobacco pipe stem, English: stem hole diameter 5/64.
3 Clay tobacco pipe stems, local.
Window or case bottle fragments.
Wine bottle neck: ca.1680-1690.
Lead sprue.
4 Nails: wrought.
3 Nails: fragments.
Turned lead (no inscription).
Bone.
Brick.
Mortar: oyster shell.
Oyster shell.
Pan tile fragments.
Wood: charred.

44PG151/28F
Storage pit.
1 Clay tobacco pipe bowl, English.
1 Clay tobacco pipe stem, English: stem hole diameter 4/64.
4 Clay tobacco pipe stems, local.
Window or case bottle glass.
19 Nails: wrought.
3 Nails: fragments.
8 Turned lead pieces.
1 Upholstery tack: brass.
Bone.
Oyster shell.

44PG151/28G
Storage pit.
2 Clay tobacco pipe stems, English: stem hole diameter 6/64-1; 5/64-1.
1 Clay tobacco pipe stem, local.
Window or case bottle glass.
5 Nails: wrought.
3 Nails: fragments.
Bone.
Shell.

44PG151/28/1B
Storage pit.
3 Clay tobacco pipe bowl fragments, English.
2 Clay tobacco pipe stems, English: stem hole diameter 5/64-1; 6/64-1.
1 Clay tobacco pipe bowl, local.
Window or case bottle glass: molten.
6 Nails: wrought.
3 Turned lead fragments.
Bone.
Daub: charred.
Mortar: oyster shell.
1 Pan tile fragment.
Shell.

44PG151/28/1C

Storage pit.
1 Clay tobacco pipe bowl, English.
3 Clay tobacco pipe stems, English: stem hole diameter 5/64-1; 6/64-1.
3 Clay tobacco pipe bowl fragments, local: 3(2).
3 Clay tobacco pipe stem fragments, local.
Wine bottle glass.
6 Nails: wrought.
1 Nail: fragment.
Bone.
Oyster shell.

44PG151/28/1E

Storage pit.
1 Clay tobacco pipe bowl, English.
2 Clay tobacco pipe bowls, local.
4 Clay tobacco pipe stems, local.
Window or case bottle glass.
Wine bottle glass.

1 Rhenish stoneware, Westerwald: jug body fragment, sprig-molded with the letter "R".
3 Nails: wrought.
1 Brick fragment.
The analysis of the prehistoric collection can be readily broken down into lithic and ceramic categories. The reader will note many artifact descriptions are annotated beyond the most cryptic entries in order to: (1) clarify the finds as was deemed necessary; (2) to facilitate further study; or (3) to indicate associated limitations to the find's identification while striving to make the notations still generally useful. Obviously many of these reasons are essentially complimentary.

The project benefitted from restricted consultation with Mary Ellen Norrissey Hodges who helped the cataloguer identify a minimal amount of troublesome lithic and ceramic finds. Despite this, Charles Hodges is responsible for any mistakes made in the Native American catalog or text.

Lithic debitage was divided into two basic categories: noted as a flake (without cortex) or decertification flake. Fire-cracked rock was counted but not weighed. Lithic finds that were deemed in various stages of lithic manufacture were given preliminary designations based on Errett Callahan's (1979:11) "Production Key: Stages of Manufacture" for perceived unifaces and bifaces. Quartzite and quartz are notoriously difficult materials in which to distinguish fine lines of stages of lithic reduction. The use of these identifications as well as those for projectiles or tools was based upon feel along the edges. Identified projectile points and blade forms were based on Mid-Atlantic typologies developed primarily by Coe (1964), Stephenson (1963), and Ritchie (1971), as revised in 1989. Miscellaneous ground stone and knapped tools were identified based on their general characteristics.

Ceramic finds are listed by temper and surface treatment and named series or type when possible. In some cases temper and/or surface treatment was made difficult due to small sherd size and/or eroded surface condition. When the temper could not be readily identified, breaks in the sherds were examined by an 8X loupe to clarify. This loupe, and a lower power 4X magnifying glass - in concert with raking light - was employed to identify less obvious surface treatments when necessary. Occasionally a soft clay imprint was employed to capture fine details of relief surfaces. The standard Virginia and Mid-Atlantic typology developed by Evans (1955) as revised by Egloff and Potter (1982) formed the basis of most named ceramic identifications. Also consulted were works by Phelps and colleagues (1983), and Mouer (et al. 1987). No sherd was forced into a regional typology without considerable deliberation. As there seems to be considerable variation between Cashie and Gaston Simple Stamped wares and Rappahannock Fabric Impressed (Townsend series) and similar wares without clear or abundant shell as tempering additives, the catalog modestly addresses regional problems (as much as possible given time and budgetary constraints).

A fair number of Native American artifacts could not be located in the collections transferred to JRIA during the allotted time to write this report. Sometimes field notes employing field identifications compensated for these missing finds. Missing materials prohibited weighing fire-cracked rock.
151-SC
2 sherds Gaston simple-stamped (1 possibly incised)
1 stemmed projectile point, white quartz, untyped similar to Halifax (or small Savannah River variant), asymmetrical stem (straight 1 side; contracting the opposite), concave base perhaps lightly ground, shoulder lost one side to probable reworking
1 stemmed projectile point, quartzite, like Morrow Mountain I, narrow contracting stem comes to asymmetrical point at base (length 6.21 cm.)
1 bifacial shaped piece (preform), quartzite in the form of a knife or projectile point w/rudimentary stem/shoulders
1 broken preform, quartzite, probably stage 2, medial snap above base runs to tip
1 broken preform, quartzite, approximately stage 3, w/approximately medial lateral snap
1 small biface, quartzite, approximately stage 2
4 decortification flakes, quartzite
13 flakes, quartzite
2 flakes (shatter), quartz

SC-3
1 triangular projectile point, quartzite, medium sized, Yadkin, w/one corner snapped off, max. length 3.86 cm.

SC-4
1 distal section of broken knife or projectile point, quartzite

SC-5
1 stemmed projectile point, quartzite, small Savannah River Variant, contracting stem, slightly concave base, w/distal lateral snap removing tip
7 flakes, quartzite
2 decortification flakes quartzite
1 sherd, atypical Townsend, with fine fabric wicker, and minimal shell additives to excellent natural paste
1 sherd, untyped aboriginal, with obscured surface, fine sand temper
2 ceramic nerts, aboriginal w/sand temper (1 burned)
1 cobble spall w/cortex used as stage 1 preform, quartzite (has primarily unifacial work w/3 bifacial flakes)
1 sherd Gaston simple-stamped (surface smoothed; stamping still evident)
1 projectile point, Kirk Corner Notched
1 broken stemmed projectile point stage 5 preform, not diagnostic as unfinished, with expanding stem, asymmetrical edges, lateral snap - distal 1 broken (uncompleted?) projectile point, not diagnostic, a narrow long blade, with rudimentary tapering at base (angular break), and distal lateral snap
1 basal section of Savannah River broadspear, w/contracting stem (max. width 4.8 cm.)
1 chopper, quartzite, made from large cobble w/basal cortex left intact, otherwise crude bifacial work w/steep cutting edge opposite cortex, (find could also be interpreted as a Guilford ax preform, or a simple expedient wedge)
1 section of broken biface, shouldered at point where line of primary flaking (wide) meets secondary flaking (tapering), distal or basal (?) and medial lateral snaps, max. width 4.5 cm.

1 large discoidal w/bifacial and unifacial sections, made from a quartzite cobble with much cortex showing on reverse side where one edge is left unifacial, 9.55 cm long by 7.4 cm wide, (could be interpreted as oval scraper but no distinct edge wear felt except at ground zone at basal end to prepare new striking platform)

1 broken biface, quartzite w/medial lateral snap, max. width 4.36 cm. wide
1 preform blank, quartzite (5.1 cm long)
1 leaf-shaped preform w/distal angular snap, quartzite approximately stage 3 or 4, 4.92 cm. long at break
1 small broken preform discard, white quartz, has medial lateral snap and high medial ridge

1B 1 sherd Townsend, Rappahannock Fabric Impressed (shell temper)
1-2A 1 broken core, white quartz
1 decortification flake, quartz
2 flakes, quartz
2 sherds, untyped aboriginal, w/absent or obscured surface, crushed quartz and/or coarse sand temper

1-3 1 sherd Gaston simple-stamped
2 flakes quartzite

1-4 1 broken biface, white quartz, small and rough w/lateral snap
1 fire-cracked rock

1-4B 1 flake, quartzite
1-5 1 flake, quartzite

1-6 1 fragment black (local?) chert, or ballast grade English flint water worn rind

1-7 1 sherd untyped aboriginal, shell-tempered, w/obscure surface

1-9 1 rim sherd, aboriginal, w/finely crushed quartz temper, rough and obscured surface

1 broken stage 4 or 5 preform, white quartz (for a small stemmed projectile point [stem is rounded button], has uncontrolled edge break running to medial surface + distal lateral snap

1-10 3 flakes, quartzite
1 decortification flake quartzite
1 decortification flake, white quartz
1 basal section of a triangular projectile point, white quartz, Clarksville, medial lateral snap, pressure flaking leaves small serrations to one side, 1.085 cm wide at base

1-11 1 quartzite flake
1 medium small triangular projectile point, w/concave edges (retouched?) and base, Madison like, has distal lateral snap max. width 2.38

1-12A 2 quartzite flakes
| 1-13   | 1 sherd Gaston simple-stamped  
|        | 1 ceramic nerd, aboriginal, crushed quartz temper  
|        | 1 flake, quartzite  
| 1-14   | 1 sherd untitled aboriginal, w/obscure surface, coarse sand and crushed quartz temper  
| 1-15   | 1 decortification flake, quartzite  
|        | 7 flakes quartzite  
|        | 1 micro-flake quartzite (bag wear?)  
|        | 1 flake, white quartz  
|        | 1 sherd, untitled aboriginal, w/plain or obscured surface, coarse and crushed quartz temper  
| 1-17   | 1 sherd Gaston simple-stamped  
|        | 4 flakes white quartz  
|        | 1 flake, crystalline quartz  
|        | 1 shattered pebble fragment w/cortex, white quartz  
|        | 1 flake quartzite  
| 1-18   | 1 shatter flake white quartz  
|        | 1 distal (?) fragment of projectile point, white quartz, the result of a lateral snap  
| 1-19   | 2 flakes quartzite  
|        | 1 broken rejected triangular preform, crystalline quartz, has zones of bifacial edges probable concave base (similar to triangular projectile form [?])  
|        | 1 broken preform for broad blade, chalcedony, 4.52 cm. max width, (present though incomplete form similar to Savannah River broadspear w/short rounded contracting stem)  
| 1-20A  | 1 large oval side scraper (made from a cobble spall w/obverse side retaining cortex, two opposite zones of bifacial work 1 with chisel shaped working edge - 1 with steep bevel; the flaking seems to preclude pure stage 2 bifacial reduction)  
| 1-21   | 1 sherd Gaston simple-stamped  
|        | 1 ceramic nerd, aboriginal w/crushed quartz temper  
|        | 1 sherd Roanoke simple-stamped  
|        | 2 decortification flakes, quartz  
|        | 3 flakes quartzite  
| 1-22   | 1 flake quartzite  
|        | 1 decortification flake quartzite  
| 1-24   | 5 quartzite flakes (2 mend)  
|        | 1 quartzite decortification flake  
|        | 1 decortification chunk, white quartz (reduction of pebble)  
| 1-25   | 1 decortification flake quartzite  
|        | 1 flake quartz  
|        | 1 flake white quartz  
| 2      | 1 sherd Gaston simple-stamped  
| 2-1A   | 1 sherds Gaston simple-stamped  

428
2 sherds Roanoke simple-stamped (small worn)
1 sherd untyped aboriginal, w/worm simple-stamped or fabric surface treatment?, tempered w/coarse sand and crushed quartz
decortification flakes, quartz
1 stemmed projectile point, quartzite, small Savannah River Variant, w/contracting stem, concave base, distal lateral snap
4 decortification flakes, quartz
decortification flakes and chunks, white quartz
3 flakes, quartz
1 flake, green silicified slate, Carolina Greenstone
decortification flakes, quartz
1 small flake, dark brown chert (Virginia) or flint (English)
decortification flakes and chunks, white quartz
1 piece of quartz gravel, not cultural
1 fire-cracked rock
1 sherd Roanoke simple-stamped, thin
10 sherds Gaston simple-stamped
damaged sherd untyped aboriginal, probably a punctate decorated Gaston folded rim
miscellaneous small sherds untyped aboriginal, w/obscure surfaces, sand or crushed quartz temper
1 triangular (unfinished?) projectile point (arrow head), quartzite, w/asymmetrical edge, concave base, distal lateral snap, high ridges may suggest reworking from an originally larger (small Yadkin?) point
1 small edged piece (preform), white quartz
distal section of preform, quartzite, approximately stage 3, approximately medial lateral snap
decortification flakes, quartzite
23 flakes, quartzite
2 flakes, quartz
2 fragments, slate (probably not cultural)
1 sherd Gaston simple-stamped
miscellaneous damaged sherds untyped aboriginal, Gaston-like temper
1 large broken preform, quartzite, primarily thinned piece w/approximately medial lateral snap
small preform for knife or projectile point, quartzite, leaf shaped edged piece
1 small blank, white quartz, high ridge both sides
8 flakes, quartzite (1 possibly also burned)
decortification flakes, white quartz (pebble spalls)
small flake or chunk, white quartz
broken cobble, quartzite (break is well water worn -not cultural)
decortification flake, quartzite
1 flake, quartzite
1 flake, quartz
1 fire-cracked rock
429
2-1E  1 rim sherd Gaston simple-stamped, lip section absent, well compressed fold-over evident
1 flake, quartzite

2-1F  1 sherd Gaston simple-stamped
1 rim sherd, untyped aboriginal, w/smoothed lip curved out, and smoothed or brushed surface below, tempered w/fine and coarse sand
2 decortification flakes, quartzite
2 flakes, quartzite
1 pebble, quartzite, polished at various ends, possibly non-cultural

2-1H  1 aboriginal sherd, atypical Townsend, w/worn fine wicker fabric surface impressions, sand temper (w/shell?)
3 miscellaneous untyped aboriginal sherds, w/crushed quartz or coarse sand temper, obscure surfaces
4 fire-cracked rock, 3 perhaps decortification chunks (?), quartzite
1 flake, quartzite (unifacial w/high ridge opposite)
1 flake, quartz
1 decortification flake (shatter), quartz (pebble spall)

2-1J  1 flake, quartzite
1 flake, quartz

2-1N  1 rim sherd, Gaston simple-stamped, lip is nicked, no fold over apparent, a thin sherd

2-2A  4 sherds Gaston simple-stamped
6 sherds and ceramic nerds untyped aboriginal, all w/obscured or damaged surfaces, fine sand, coarse sand, or crushed quartz-tempered
1 sherd untyped aboriginal, w/obscured fabric or simple-stamped surface impression (?), sand and shell (?) temper
1 large unifacially worked broken core from cobble spall w/cortex (unifacial), quartzite
1 bifacially worked large flake, quartzite, bifacial 1 edge
5 flakes, quartzite
2 flakes, quartz

2-2AA  2 sherds, probable Colono ware, unburnished, w/coarse and fine sand temper
1 flake, white quartz
1 cobble spall w/cortex, quartzite

2-2B  2 sherds untyped aboriginal, obscure surfaces sand and crushed quartz temper (prob. associated w/Gaston)
1 distal section of knife or projectile point (unfinished), white quartz, high medial ridge, short distal lateral snap
2 decortification flakes, quartzite
6 flakes, quartzite
6 flakes and small chunks, quartz
2 fragments of charcoal or carbonized hickory shell

2-2C  1 rim sherd, Townsend (Rappahannock Fabric Impressed), (shell temper rare w/hematite/ferric concretions in clay matrix) plain, w/fabric impression
carried to lip, lip decorated with a series of shallow punctations

1 broken preform, quartzite at incomplete edged piece stage, approximately medial irregular snap

1 broken preform, amber quartz, at stage of primarily thinned piece, approximately medial lateral snap

2 decortification flakes, quartz

5 flakes, quartzite

3 flakes, quartz (1 partially crystalline)

2-2D 1 sherd untyped aboriginal, shell-tempered, traces of simple stamps? smoothed over (thin sherd, perhaps related to Roanoke)

1 core, quartz, made form cobble spall cortex reverse, w/incomplete bifacial edge work, high ridge obverse

2-2E 1 sherd Gaston simple-stamped

2-2F 1 sherd, Gaston simple-stamped

5 sherds untyped aboriginal, all w/obscure or damaged surfaces sand or crushed quartz temper

1 projectile point, green grainy silicified slate, perhaps unfinished (?), a thin piece probably made from single flake, retouched w/pressure flaking along edges, poorly defined shoulders as w/general leaf shape, base rounded tapering, perhaps related to Piscataway?

7 flakes, quartzite

1 unifacially worked decortification flake, quartz perhaps intended as core

4 flakes, quartz

1 flake, green silicified slate, Carolina Greenstone

1 pebble spall, brown and grey chert, w/worn rind (could be also ballast grade European flint)

1 decortification flake, brown and white chert (probably local)

2 fire-cracked rocks

2-2J 4 sherds Gaston simple-stamped

2-2L 1 fire-cracked rock

2-2M 1 sherd Gaston simple-stamped

2 sherds untyped aboriginal, w/obscure surface, crushed quartz and coarse sand temper

1 decortification flake, white quartz

2-2N 5 flakes, quartzite

3 micro-debitage, quartzite (or bag wear)

2-2P 1 projectile point or knife, quartzite, Savannah River, w/contracting stem, slightly concave base (max. length 7.68 cm.)

2-3A 1 broken preform, quartzite, approximately stage 2 or 3, w/possible rudimentary stem, approximately lower medial lateral snap

2 flakes, quartzite

2-3B 4 sherds Gaston simple-stamped

2 sherds untyped aboriginal, w/worn surfaces ferric sand and coarse quartzite
sand temper
2 decortification flakes, quartzite (1 cobble spall)
4 flakes, quartzite
2 flakes, white quartz
1 stemmed projectile point, white quartz, untyped Late Archaic, w/short contracting stem w/concave base (lightly ground), the blade is utterly exhausted, short, and asymmetrical, perhaps a small Savannah River variant

2-3C
5 sherds Gaston simple-stamped
1 sherd atypical Townsend (Rappahannock Fabric Impressed), w/shell and sand temper; worn fine wicker fabric impression
2 miscellaneous aboriginal sherds, w/worn or obscured surfaces, coarse sand temper
1 projectile point or knife, dark grey quartzite (?), Savannah Broad blade form, w/short contracting stem, small relatively straight base (length 6.61 cm.)
1 broken and reworked projectile point or knife, quartzite, well made stem w/straight base and expanding stem, blade has medial lateral snap, (probably associated w/Savannah River)
1 broken biface (shoulder section above unfinished stem) to shaped piece (stage 5?), white quartz, 2 opposite zones of bifacial work
1 small preform, quartzite, approximately stage 3
4 flakes, quartz
7 decortification flakes and pebble spalls, quartz
3 flakes, quartzite
6 decortification flakes, quartzite
2 fire-cracked rock (1 possibly a geofact)

2-3J
3 sherds Gaston simple-stamped
1 sherd untyped aboriginal, w/obscuraed surface crushed quartz temper
3 decortification flakes, quartzite
2 flakes, quartzite
1 decortification flake, white quartz
3 flakes, white quartz

2-3K
1 sherd Gaston simple-stamped
1 decortification flake, quartzite
1 flake, quartzite
1 flake, white quartz

2-3K-N
1 possible broken core or flake, quartzite, perhaps stage 1 unifacial w/high ridge

2-3L
1 sherd Gaston simple-stamped
1 flake, quartzite
1 flake (shatter), quartz

2-3N
2 sherds Gaston simple-stamped
1 broken preform blank (stage 1), grey silicified slate
1 hammer stone, quartzite, rounded outer edges are abraded (overall light wear), 1 battered zone, may have also doubled as abrader

2-3Z
3 sherds Gaston simple-stamped
1 decortification flake, quartz
1 flake, quartz
1 decortification flake, quartzite
3 flakes, quartzite

2-4B
1 sherd Gaston simple-stamped
1 preform for stemmed projectile point, quartzite, at stage of basically shaped piece
1 broken preform or spall w/bifacial work, semi-crystalline quartz, edges water worn or ground
1 distal section of broken knife or projectile point, white quartz, a finished piece (?), angular approximately medial snap
1 short distal section of knife or projectile point, quartz
4 decortification flakes, quartzite
9 flakes, quartzite
2 decortification flake (shatter), quartz
3 chunks and flakes, quartz

2-4C
1 sherd Gaston simple-stamped
1 biface, quartzite, originally roughly triangular, w/longitudinal break from base to shoulder, approximately stage 3
3 decortification flakes, quartzite
7 flakes, quartzite
1 flake, white quartz

2-4D
1 sherd Gaston simple-stamped
3 flakes, quartzite
1 sherd, atypical Townsend (Rappahannock fabricImp.) w/crushed quartz and shell admixture to temper, fine fabric wicker
1 sherd Gaston simple-stamped
1 flake, quartzite

2-4E
1 cobble spall, quartzite, perhaps utilized w/possible steep edge wear or more likely ground to create striking platform towards preform

2-4J
5 sherds Gaston simple-stamped
2 sherds untyped aboriginal, w/rough eroded surfaces, coarse and fine sand temper
1 decortification flake or chunk, quartzite
3 flakes, quartzite
1 broken biface, quartzite, w/basal lateral snap, approximately stage 2

2-4K
4 sherds Gaston simple-stamped
1 sherd Roanoke simple-stamped
1 sherd untyped aboriginal, w/obscure surface and coarse sand temper (probably Gaston associated)
1 broken biface, quartzite, w/angular snap

433
1 decortification flake, quartzite
7 flakes, quartzite
1 decortification flake, quartz
1 flake, milky blue/grey and white chert (Virginia)

2-4M
1 sherd Gaston simple-stamped

2-4S
1 preform, white quartz, made from large flake, retouched bifacially except for zone of original striking platform

2-24
2 flakes quartzite
1 flake quartz
1 biface fragment, white quartz

3A
1 biface, quartzite, approximately stage 2
5 flakes, quartzite
1 decortification flake, quartzite
1 fragment (distal?) biface, white quartz
1 flake, white quartz
1 sherd untyped aboriginal, w/smoothed surface, crushed quartz temper, associated w/Gaston simple-stamped

3B
1 sherd Gaston simple-stamped
1 sherd untyped aboriginal, w/coarse sand temper and obscure surface
1 flake, quartzite

3C
11 sherds, Gaston simple-stamped
1 rim sherd, atypical Townsend (Rappahannock Fabric Impressed) w/fine wicker fabric impression, lip smooth w/simple short fold
1 micro-debitage flake, quartzite
2 flakes, quartzite
1 decortification flake, quartzite
1 pebble spall w/cortex, white quartz
1 fire-cracked rock

3D
6 sherds Gaston simple-stamped
1 sherd, probable Colono ware, bowl, w/well pulverized shell temper

3E
1 projectile point or knife, Savannah River, w/contracting stem slightly concave base (max. length 8.8 cm.), small break distal
3 flakes, quartzite
17 sherds, Gaston simple-stamped
1 sherd, untyped aboriginal, associated w/Gaston, obscure surface
2 ceramic nerds, aboriginal
1 sherd atypical Townsend, w/fine wicker fabric impression, reduced shell temper, hematite of ferric sand natural to matrix?
2 sherds, Roanoke Plain, including 1 with original simple-stamped surface smoothed over (?)
1 miscellaneous aboriginal sherd, shell temper

3G
9 sherds Gaston simple-stamped
1 sherd Gaston/Cashie brushed or lab scrubbed
1 sherd, untyped aboriginal, w/shell temper and obscure surface
1 sherd, untyped aboriginal, w/grit temper and obscure surface
1 ceramic nerd, aboriginal
3 flakes, quartzite
3 shatter flakes, white quartz
1 flake, crystalline quartz

3F
7 sherds Gaston simple-stamped
2 sherds untyped Native American, hypothetically late Gaston simple-stamped?, simple stamping has been smoothed to plain surface, superficially resembles Colono ware
3 sherds, atypical Townsend Ware (Rappahannock Fabric Impressed) w/fine fabric wicker, tempered w/reduced quantity of well pulverized shell
(1 possible plain rim has artifact label across)
1 projectile point, Morrow Mountain II like (similar to Piscataway), quartzite, has been reworked shortening original blade length (max. length 3.5 cm., max. width 2.2 cm.)
1 broken portion broken biface, quartzite appears similar to a roughed out projectile point or knife stem broken during bi-polar thinning
6 small flakes, quartzite

3J
2 Gaston rim sherds from two vessels, 1 plain folded (well flattened) w/slightly everted lip, 1 folded w/lower fold nicked periodically
4 Gaston body sherds
2 flakes, quartzite

3J1
2 sherds Gaston simple-stamped

3K
1 large flake, white quartz
1 decortification flake (pebble spall), white quartz
1 flake, quartzite

3H
2 sherds Gaston simple-stamped
1 sherd Roanoke simple-stamped
1 sherd untyped aboriginal, w/obscure surface, fine sand temper
2 flakes, quartzite
1 flake, white quartz

3L
6 flakes, quartzite
2 decortification flakes (shatter), white quartz
1 fire-cracked rock
3 sherds, Gaston simple-stamped

3N
6 sherds Gaston simple-stamped
1 rim sherd Gaston simple-stamped, with well flattened fold-over simple-stamped, narrowed lip is damaged
1 ceramic nerd, crushed quartz temper, exterior absent
1 sherd untyped aboriginal, w/obscured net and knot or fabric-impressed surface, coarse sand temper
1 stemmed projectile point or knife, white quartz, associated w/characteristic Perkiomen form, asymmetrical blade, slightly
expanding stem w/light basal grinding
1 flake, quartzite

3P
1 sherd Roanoke simple-stamped
4 sherds Gaston simple-stamped
2 sherds untyped aboriginal, w/obscured surfaces fine and coarse sand temper
3 decortification flakes, quartzite
1 decortification flake, white quartz
1 flake, white quartz

3R
1 sherd Roanoke simple-stamped
1 sherd Gaston simple-stamped

3S
10 Gaston sherds, (including 1 possible rim sherd damaged at lip [note fold], 1 possible Gaston/Cashie brushed or lab scrubbed)
4 miscellaneous untyped aboriginal sherds, w/obscured surfaces, fine sand temper
1 Roanoke simple-stamped sherd
1 decortification (shatter flake w/cortex) flake, white quartz
2 flakes, white quartz
1 flake, quartzite
1 fire-cracked rock

3T
1 sherd Gaston simple-stamped

4A
1 broken distal section knife or projectile point, quartzite (w/approximately medial lateral snap)
1 broken biface, quartzite, lateral and longitudinal snaps
1 broken cobble core, quartzite 2 zones bifacial, 1 unifacial
1 large decortification spall, white quartz
2 flakes, white quartz
3 decortification flakes, quartzite
5 flakes quartzite
7 sherds Gaston simple-stamped
1 rim sherd Gaston simple-stamped, w/paddled lip and simple fold
1 sherd Roanoke simple-stamped

4B
14 sherds Gaston simple-stamped
2 sherds, untyped aboriginal, from same vessel, reduced shell and coarse sand temper, simple-stamped surface, associated w/Gaston
2 sherds Roanoke simple-stamped, including 1 rim sherd w/lip marked parallel to lip line, short simple fold
2 sherds, untyped aboriginal, w/grit temper, smoothed surface
1 decortification flake (shatter), white quartz
1 distal section of knife or projectile point, white quartz, w/approximately angular medial lateral snap
1 flake, brown chert (Virginia)
1 piece of sandstone gravel, not cultural

4D
7 sherds Gaston simple-stamped
1 sherd, untyped aboriginal, w/fine and rare coarse sand temper and possible
shell (rare), associated w/Gaston
1 sherd, untyped aboriginal, w/eroded surface, fine sand temper
1 sherd Roanoke simple-stamped
1 rim sherd, atypical Townsend (Rappahannock Fabric Impressed) w/minor
obscure shell and most evident fine and coarse sand temper, fine wicker
fabric -impressed, plain rim
2 fire-cracked rock
1 decortification flake, quartzite
3 flakes, quartzite
1 shatter flake, white/yellow quartz
4E 1 decortification flake (shatter), white quartz
4F 6 sherds Gaston simple-stamped
4H 8 sherds Gaston simple-stamped
1 rim sherd Gaston simple-stamped, w/smoothed lip, and well
flattened fold-over w/traces of a series of diagonal marks applied w/tool
pushed in horizontally to surface
1 sherd, untyped aboriginal probably associated w/damaged Gaston rim
1 sherd Roanoke simple-stamped (smoothed over)
1 untyped aboriginal, w/shell temper and fully smoothed surfaces
probably associated w/Roanoke Plain or swiped simple-stamped
1 fire-cracked rock
4J 1 sherd Gaston simple-stamped
2 sherds, untyped aboriginal, associated w/Gaston w/obscura
surfaces
1 sherd untyped aboriginal, w/obscure surface possibly shell temper
1 flake, translucent brown and grey chert (probably Virginia, perhaps English
flint [definitely knapped if so])
2 flakes, white quartz (1 shatter)
1 fire-cracked rock
4K 1 projectile point, Orient Fishtail like, quartzite, w/small distal break,
asymmetrical blade/stem due to reworking, max. length 5.78 cm. by
max. width 2.34 cm.
4L 2 sherds untyped aboriginal, w/brushed surfaces perhaps over simple stamping,
associated w/Gaston/Cashie
4M 12 sherds Gaston simple-stamped
2 sherds Townsend (Rappahannock Fabric Impressed), w/shell and perhaps
sand temper
3 miscellaneous sherds untyped aboriginal, w/obscura surfaces
1 fragment of broken biface, quartzite
2 flakes, quartzite
3 fire-cracked rock
4N 7 sherds Gaston simple-stamped (1 swiped over)
1 fire-cracked rock
4P 4 fragments fire-cracked rock
1 probable decortification flake, quartzite (perhaps heated)
1 flake, quartzite
8 sherds Gaston simple-stamped
1 rim sherd, untyped aboriginal, w/notches along rim, possible shell temper
   with some fine grit
1 sherd, untyped aboriginal, w/remains of compressed coil brake lateral to
   surface, fine sand temper?
4Q 1 sherd Gaston/Cashie, simple-stamped w/zones of brushed surfaces
4R 3 sherds, untyped aboriginal, w/obscured surfaces, grit or crushed quartz
   temper
5A 1 sherd, untyped aboriginal, w/obscured or plain surface, well-
   pulverized shell and fine sand (?) temper
5B 5 flakes, quartzite (1 possibly chalcedony)
5C 1 sherd Gaston simple-stamped
1 sherd associated w/Gaston, stamping swiped over
1 flake, quartzite
1 flake, quartz
5D 1 sherd Gaston simple-stamped
1 large cobble spall, quartzite, (w/cortex)
1 decortification flake, quartzite
6 flakes, quartzite
5E 1 rim sherd Gaston simple-stamped, recurved profile, w/nicked lip
6 body sherds Gaston simple-stamped
1 sherd atypical Townsend, fine wicker fabric impression, tempered w/crushed
   quartz and coarse sand
2 miscellaneous sherds untyped aboriginal, both w/obscured surfaces,
   (including 1 basal coil break shell-tempered, 1 body sherd tempered
   w/fine sand)
1 crude small broken biface, quartzite (stage 1 blank)
5 decortification flakes and chunks, quartzite (1 perhaps heated)
4 flakes, quartzite
2 decortification flakes, quartz
5F 2 sherds Gaston simple-stamped
1 sherd Roanoke simple-stamped
1 sherd untyped aboriginal, w/worn fine wicker fabric surface-
   impressed (?), shell (?) and fine sand temper
2 decortification flakes, quartz (including 1 large example w/cortex distal and
   proximal not unlike a blade core, fractured material)
2 flakes, quartzite
5G 5 sherds Gaston simple-stamped
1 sherd untyped aboriginal, w/Gaston like temper, obscure surface
1 sherd untyped aboriginal w/fine wicker fabric surface impression and
   crushed quartz temper (Gaston/Townsend hybrid)
1 flake, white quartz

438
5H
1 sherd Roanoke simple-stamped (w/partially obscured surface)
5 sherds Gaston simple-stamped
3 sherds miscellaneous untyped aboriginal all w/obscured surfaces, tempered w/: fine or coarse sand, or crushed quartz temper,
2 decortification flakes, quartzite

5J
2 rim sherds Gaston simple-stamped (including 1 sherd w/paddle-impressed lip presumably broken above fold line, 1 sherd w/smoothed lip paddle-impressed w/vertical lines)
2 sherds untyped aboriginal, w/Gaston like temper/obscure surfaces
3 sherds Roanoke simple-stamped (1 swiped over)
1 sherd, atypical Townsend w/fine fabric wicker surface -impressed coarse sand (and shell?) admixture
2 decortification flakes, white quartz
1 flake, white quartz
4 flakes, quartzite
2 flakes, dark grey chert or flint (1 w/suspected chalk rind)
8 sherds Gaston simple-stamped 1

5K
1 sherd, Colono ware, well burnished both sides, shell-tempered and perhaps fine sand

5L
1 sherd Gaston simple-stamped
1 sherd untyped aboriginal, associated w/Gaston w/smoothed surface
1 decortification flake, quartzite
4 flakes, quartzite

5M
5 sherds Gaston simple-stamped (1 partially swiped over)
1 possible small broken blank, white quartz (stage 1)
1 flake, quartzite
1 possible large decortification flake, quartzite

5N
1 sherd Gaston simple-stamped
1 flake, white quartz

5-1D
3 sherds Gaston simple-stamped
1 projectile point, white quartz, slightly contracting stem, slightly concave base; blade considerably reworked down, associated w/Savannah River "Variant" (max. length 3.32 cm.)
2 decortification flakes, quartzite
8 flakes, quartzite

5-1E
5 sherds Gaston simple-stamped (2 w/partially smoothed surfaces)
3 flakes, quartzite

5-1F
5 sherds Gaston simple-stamped (2 w/partially obscured surfaces)

5-3B
2 rim sherds Gaston simple-stamped, no decorations or folds evident, (including one w/smoothed lip, 1 w/paddle -impressed and swiped lip)
2 body sherds Gaston simple-stamped

5-3C
2 rim sherds, Gaston simple-stamped, (including 1 w/impressed vertical lines interior of rim creating a scalloped effect as seen from above, one w/fold and paddle -impressed lip then smoothed over)
1 body sherd Gaston simple-stamped
1 sherd untyped aboriginal, w/obscured traces of fine wicker fabric surface impression, tempered w/sand and shell admixture (related to atypical Townsend R.F.I.)
1 ceramic nerd, untyped aboriginal w/Gaston temper characteristics
1 decortification flake, quartzite
2 flakes, quartzite

5-3D
1 flake, quartzite

5-3F
1 stemmed projectile point, brown/grey chert, untyped, superficially similar in form to crudely flaked Randolph type (?), contracting pointed stem, asymmetrical blade (reworked down) medial/distal interface lateral snap

7A
2 sherds Gaston simple-stamped
1 fragment charcoal

7B
1 rim sherd, untyped aboriginal, w/scraped surface treatment, tempered w/fine sand and shell (?) admixture, smooth lip w/short recurved protrusion to exterior, a thin vessel approximately diameter 3.9 cm., in cross section narrows to lip
1 sherd untyped aboriginal, w/traces of fine wicker fabric surface impression, sand and shell temper admixture (?)
1 sherd, untyped aboriginal, rough obscured surface, coarse sand temper
1 broken stemmed projectile point-shaped piece, quartzite, medial lateral snap

7C
2 sherds Gaston simple-stamped
1 broken triangular projectile point, quartzite, associated w/Yadkin type, reworked narrow blade, concave base, medial lateral snap, (max. width 3.02 cm.)
1 flake, white quartz, w/lenticular cross section
2 flakes, quartzite

7D
1 sherd Gaston simple-stamped
1 sherd untyped aboriginal, w/obscured fine fabric surface treatment (?), crushed quartz temper
5 flakes, quartzite

7E
1 fragment broken quartzite

7F
1 flake, quartzite

7H
1 sherd Gaston simple-stamped
2 ceramic nerds, untyped aboriginal (prob. Gaston associated)
5 flakes, quartzite

7L
3 sherds Gaston simple-stamped
1 broken preform w/primary thinning, quartzite, w/longitudinal snap
2 flakes, quartzite

7Q
1 sherd Gaston simple-stamped
2 flakes, quartzite

8A
1 sherd Gaston simple-stamped

8B
1 sherd Gaston simple-stamped
1 sherd Gaston/Cashie brushed (or lab scrubbed)
1 sherd untyped aboriginal, w/worn fine wicker fabric impressions?, coarse
sand and crushed quartz temper
1 sherd untyped aboriginal, eroded surface, sand and finely crushed quartz (?) temper
1 decortification flake, quartzite
7 flakes quartzite
3 micro-flakes, quartzite (labelled not bag wear)
1 decortification flake, quartz
1 flake, quartz
1 fire-cracked rock
8C 1 rounded leaf shaped blank, white quartz, w/unifacial work, obverse w/cortex, made from cobble core
5 sherds Gaston simple-stamped
3 miscellaneous untyped aboriginal sherds, obscure surfaces fine sand temper
1 decortification flake or chunk, quartzite
2 flakes, quartzite
8D 2 sherd Gaston simple-stamped (1 swiped over)
1 flake, quartz
3 flakes, quartzite
1 fire-cracked rock (broken cobble, no apparent bulb of percuss.)
9 1 flake, quartzite
9B 1 decortification flake, quartzite
1 flake, quartzite
9C 9 sherds Gaston simple-stamped
1 sherd atypical Townsend (R.fabricImp.) w/shell and sand admixture for temper (?)
7 miscellaneous sherds untyped aboriginal, all /worn,obscured,eroded surfaces; sand or crushed quartz temper
1 sherd, untyped aboriginal, w/eroded surface, shell temper
4 decortification flakes, quartzite
6 flakes, quartzite
1 decortification flake, quartz
5 flakes, quartz
9D 1 rim sherd, Gaston simple-stamped, paddle -impressed and then smoothed lip with no expansion towards exterior, interesting because it has no evidence of vessel curvature yet it is quite thin at 0.4 cm., thus suspected to be associated with tray like form
4 sherds Gaston simple-stamped
1 sherd untyped aboriginal, sand temper, w/eroded traces of linear streaks on surface
1 flake, quartzite
9E 2 sherds Gaston simple-stamped
1 sherd, atypical Townsend (R. fabric-impressed, rare shell (and sand admixture?)) for temper
1 sherd, untyped aboriginal, irregular obscured surface indicates longitudinal
break removing surface (?), shell-tempered

9F
2 flakes, quartzite
1 sherd Gaston simple-stamped
1 small diamond-shaped blank, white quartz (approximately stage 1)
2 flakes, white quartz
1 decortification flake, quartzite (cobble spall)
2 flakes, quartzite
2 fire-cracked rock

10B
24 sherds Gaston simple-stamped
3 sherds untyped aboriginal, w/fine sand temper, obscure, eroded surfaces
11 ceramic nerds and sherds, all untyped aboriginal
1 sherd untyped aboriginal, tempered w/shell, surface irregular and obscured
1 triangular projectile point (arrow head), white quartz associated w/Clarksville, approximately equilateral triangle, slightly concave base, upper medial lateral snap
1 decortification flakes, quartzite
9 flakes, quartzite
1 decortification flake, quartz
1 flake, quartz
1 possible hammer stone, egg shaped quartzite cobble, perhaps
1 battered distal section, other abrasion determined by shape of cobble/geological action (?)

10C
(note: found in bag labelled 151/2/10c, but w/artifacts labelled 151/10C except lithics)
12 sherds Gaston simple-stamped (1 w/partially eroded surface)
2 sherds atypical Townsend, w/fine wicker fabric impressions, and rounded and less frequent crushed quartz temper
1 rim sherd, untyped aboriginal, w/smoothed lip w/break directly below obscuring surface treatment, w/rounded coarse sand and shell (?) temper admixture
2 miscellaneous aboriginal sherds, w/obscure surfaces, crushed quartz and rounded quartz sand temper
1 fire-cracked rock
2 flakes, quartz
2 flakes, quartzite (1 possibly burned)
1 flake, chert or flint w/bluish streak

10D
4 sherds Gaston simple-stamped
1 rim sherd, Gaston simple-stamped, broken above would be fold, nicked or paddle-impressed lip (diagonal strike)
2 sherds untyped aboriginal, both w/absent original surface
4 flakes, quartzite

11A
2 flakes, quartzite
1 flake quartz
3 sherds Gaston simple-stamped
1 sherd untyped aboriginal, w/obscured surface (fine net ?) and irregular
eroded coarse sand temper impressions

11B
52 sherds Gaston simple-stamped
3 rim sherds Gaston
6 sherds Roanoke simple-stamped
2 sherds untyped aboriginal, shell-tempered w/plain or obscured surfaces (?)
8 miscellaneous small ceramic finds, aboriginal w/obscure surfaces, grit, coarse sand, and crushed quartz temper
1 fragment of fire-cracked rock
2 decortification flake, quartzite
2 decortification flakes quartz
1 flake quartz

11C
4 sherds Gaston simple-stamped
1 sherd untyped aboriginal w/obscured surface and crushed quartz and coarse sand temper
1 quartzite flake

12A
2 flakes, quartzite

12B
2 flakes quartzite
1 sherd Gaston simple-stamped
1 probable rim, untyped aboriginal (almost certainly Gaston)

12C
1 large cobble spall w/cortex, quartzite
3 sherds Gaston simple-stamped

12-1C
3 flakes quartzite
3 sherds Gaston simple-stamped
1 sherd untyped aboriginal, w/obscured surface, coarse sand temper
3 sherds quartzite
1 flint or chert pebble (probably ballast-grade English w/water worn white chalk rind)
1 sherd Gaston simple-stamped
2 sherds untyped aboriginal (almost certainly Gaston)

12E
2 flakes quartzite
1 decortification shatter flake, white quartz
1 sherd Gaston simple-stamped
2 sherds, untyped aboriginal, w/brushed (?) surface re:Gaston/Cashie, crushed quartz temper

12F
1 quartz pebble shatter flake (w/cortex)
2 flakes quartzite
3 sherds Gaston simple-stamped

12-1D
1 broken small triangular projectile point, Clarksville Small, w/distal lateral snap, 1.56 cm. wide at straight base
4 sherds Gaston simple-stamped
1 decortification flake, amber quartz

13B
7 sherds Gaston simple-stamped
2 rim sherds Gaston simple-stamped, 1 w/plain lip (broken at fold?),
1 with single rows of oblique stab and drag punctations w/a hollow reed or bone
1 sherd, untyped aboriginal, w/obscured fine net and knot (?) surface impression, crushed quartz/coarse sand temper
1 sherd untyped aboriginal, w/obscured surface minimal well crushed shell temper
5 flakes, quartzite
2 decortification flakes, quartzite
1 broken stemmed projectile point, w/medial lateral snap, and second snap at very base of stem
1 water worn fragment of micaceous schist (not cultural)

13-1B
1 flake quartzite
1 decortification flake quartzite
3 sherds Gaston simple-stamped
1 sherd Gaston/Cashie brushed

13C
6 sherds Gaston simple-stamped
12 sherds (2 mended) Colono ware, w/unburnished surface grit or coarse sand temper
1 sherd Roanoke simple-stamped
1 sherd Townsend (R.Fab.) w/fine wicker fabric-impressed surface, minimal shell temper
4 miscellaneous sherds, untyped aboriginal w/obscured surfaces, grit of crushed quartz temper
12 quartzite flakes
2 quartzite decortification flakes

13D
1 large cobble spall, w/partially unifacially battered edge, one small zone bifacial
13 sherds Gaston simple-stamped
4 sherds, untyped aboriginal w/obscured surface, coarse sand or crushed quartz temper
1 sherd atypical "west" Townsend, with fine wicker fabric-impressed surface, coarse sand temper
7 flakes, quartzite
3 decortification flakes, quartzite
1 flake, quartz
1 distal section of a finished knife or projectile point, quartzite, medial lateral snap

13-1A
1 flake quartzite
1 decortification shatter flake quartz
2 sherds Gaston simple-stamped
1 sherd, untyped aboriginal - almost certainly Roanoke simple-stamped

13-1C
3 decortification flakes quartzite
3 flakes quartzite
1 decortification flake quartz
1 flake quartz
1 fragment of water worn quartz gravel (perhaps not cultural)
4 sherds Gaston simple-stamped
3 sherds untyped aboriginal, obscured surfaces, crushed quartz temper (prob. associated w/Gaston)

13-1D
3 sherds Gaston simple-stamped (1 with atypical narrow and well defined coil break, gritty paste)
1 sherd, untyped aboriginal, w/lab scrubbed (?) surface, crushed quartz temper
2 shatter flakes, white quartz
2 flakes, quartzite
1 decortification flake, quartzite
1 rounded flattened pebble (not cultural)

14A
1 projectile point, Morrow Mountain I, w/small distal lateral snap
1 projectile point, Savannah River, w/slightly expanding stem and straight base
1 ground basalt double-bitted adze, max. length 6.6 cm by max. width 2.18
side view is elliptical, has one narrow (1.22 cm wide) and one wider (1.7 cm. wide) bit, wider bit shows small breaks from use wear
1 fragment granite (not cultural)
1 flattened and rounded quartzite pebble (not cultural)

14B
1 decortification flake quartzite
1 flake, quartzite
1 flake white quartz
3 sherds Gaston simple-stamped
1 sherd, untyped aboriginal w/worn fine wicker surface -impressed crushed quartz temper
1 sherd untyped aboriginal w/obsured surface, w/grit and possible minimal shell temper

14D
2 decortification flakes, quartzite
4 sherds Gaston simple-stamped
1 sherd, untyped aboriginal, with fine wicker (?) surface treatment shell and coarse sand temper

15
1 flake quartzite
1 decortification (shatter) flake, quartz

15A
1 flake quartzite
3 sherds Gaston simple-stamped
1 sherd Roanoke simple-stamped
1 sherd, untyped aboriginal, w/obscured surface minimal shell and coarse sand temper

15B
2 ceramic nerds, untyped aboriginal (1 w/coarse sand temper,
1 w/shell and coarse sand, latter burned)

16
1 sherd Gaston simple-stamped

17B
1 sherd, untyped aboriginal (almost certainly Gaston)

20A
2 sherds Gaston simple-stamped
1 broken large biface, quartzite, at least stage 5 shaped piece, broad and
relatively thin, approximately medial lateral snap

20B 1 rim sherd Townsend Series, Rappahannock Fabric Imp, smoothed rounded lip, no modification of fabric -impressed near lip, a thin sherd from a small vessel

21A 1 sherd Gaston simple-stamped
21D 1 small decortification flake, quartzite
21E 1 sherd Gaston/Cashie brushed or lab scrubbed
2 flakes, quartzite
21F 1 sherd Roanoke simple-stamped
21H 1 sherd Gaston/Cashie brushed (or lab scrubbed?)
1 decortification flake, quartzite
21K 1 flake, quartzite
21R 1 sherd Gaston simple-stamped
1 decortification flake, quartz
1 decortification flake, quartzite
21T 1 leaf shaped preform, quartzite, approximately stage 3 reverse w/high medial ridge, stage 4 obverse
1 decortification flake, quartzite
21V 1 flake, quartzite
22A 9 sherds Gaston simple-stamped
2 sherds Roanoke simple-stamped (very well crushed shell temper)
1 sherd untyped aboriginal, w/shell temper and worn pebble surface perhaps once fabric -impressed ?
2 sherds untyped aboriginal, w/eroded surfaces, shell temper (one w/heavily eroded surface and edges)
3 flakes, quartzite
3 fragments grey/white chert or flint (2 definitely burned)
22B 6 sherds Gaston simple-stamped
1 sherd Townsend (Rappahannock Fabric Imp.), w/reduced shell temper
1 sherd untyped aboriginal, w/eroded surface, shell and micaceous sand temper
24A 1 broken stemmed projectile point, quartzite, Morrow Mountain II, w/high medial ridge, lower portions intact, w/ distal lateral snap
26B 4 sherds Gaston simple-stamped
2 flakes, quartzite
28A 1 sherd Gaston simple-stamped w/admixture of shell to normal temper
3 flakes, quartzite
28B 1 sherd untyped aboriginal, associated w/Gaston, fully eroded surface, crushed quartz temper
1 decortification flake, quartz
28C 1 flake, quartzite
28E 1 interesting and unusual sherd Gaston simple-stamped surface; polished smooth probably while leather hard, (not technically burnished since the stamping still shows the resulting finish enough to catch light), interior
surface smoothed to press temper into body, lip slightly flared and then flattened off on exterior and interior leaving a groove in center of lip resulting from this compaction when the top of the lip was also flattened, vessel profile suggests a steep walled jar (while only one sherd this find may be the first step towards "Colono ware" from Gaston)

2 sherds Gaston simple-stamped
1 broken preform, quartzite, two converging snaps occurred between transition from stage 4 to 5 (?) shaped piece looks like rudimentary stem of Late Archaic projectile point
1 decortification flake, quartzite
1 decortification flake, quartz  
28F  
1 sherd Gaston simple-stamped, decorated w/vertical pairs of punctuation marks made w/hollow reed or bone forming images like a figure "eight" written in Arabic
1 decortification flake, quartz  
1 flake, quartz  
1 flake, quartzite  
28G  
1 sherd Townsend Series, Rappahannock Fabric Impressed  
3 flakes, quartzite  
28-1B  
1 sherd Gaston simple-stamped  
1 flake, quartzite  
28-1C  
1 flake, quartzite  
28-1D  
3 sherds Gaston simple-stamped (1 w/smoothed surface)  
1 sherd untyped aboriginal, w/eroded surface crushed quartz and coarse sand temper  
1 sherd untyped aboriginal, w/pronounced coil break fine sand or uncertain temper  
2 sherds Townsend (Rappahannock Fabric Imp.), w/reduced quantity shell temper, fine and ferric sand admixture?  
1 flake, quartzite  
28-1E  
1 rim sherd Gaston simple-stamped, paddled parallel to plain lip, no fold, stamping carried to rim  
6 sherds Gaston simple-stamped (2 w/worn surfaces)  
1 sherd untyped aboriginal, plain lip, no fold, tempered w/crushed quartz, eroded exterior surface  
2 flakes, quartzite  
28-1H  
2 sherds Gaston simple-stamped, probably over fired, w/unusual crushed white stone temper (vitrified quartz?)  
1 decortification flake, quartz  
28-1J  
1 sherd Gaston simple-stamped  
28-2C  
1 decortification flake, quartzite  
1 flake, quartzite  
1 decortification flake, quartz
| 28-2D | 1 flake, quartz  
3 sherds Gaston simple-stamped  
1 sherd Townsend (Rappahannock Fabric Imp.), w/abundant shell temper  
2 large decortification flakes, quartzite (cobble spalls)  
1 flake, quartzite  
1 decortification flake, quartz (pebble spall)  
1 fully grooved ground stone ax, basalt, groove is not centered but shifted to near basal section which is slightly convex, zones at base are left rough (pecked), distal section is ground to a chisel edge and has evidence of battering resulting in small breaks, shaft of tool is gently curved and tapered to distal section |
| 28-2G | 1 sherd Townsend Series, Rappahannock Fabric Incised, ferric concretions present are probably natural to clay source, rare almost invisible shell temper |
| 28-2K | 5 sherds Gaston simple-stamped  
2 sherds atypical Townsend (Rappahannock Fabric Imp.), 1 w/traces of small oval punctations forming line across fabric structure, one w/partially obscured surface, tempered w/well crushed shell w/fine sand probably natural to clay source |
| 3 flakes, quartzite  
1 flake, quartz  
1 fire-cracked rock |
| 29A | 7 sherds Gaston simple-stamped (including 1 probable basal sherd for small jar, two sherds w/partially obscured surface) |
| 29B | 4 sherds Gaston simple-stamped  
3 miscellaneous sherds untyped aboriginal, w/typical Gaston characteristics, surface obscure  
1 sherd Roanoke simple-stamped  
1 decortification flake, quartzite  
1 flake, quartzite  
1 flake, quartz |
| 30A | 2 sherds, Gaston simple-stamped  
1 sherd, untyped aboriginal w/obscured surface, grit temper  
1 sherd, untyped aboriginal, w/traces of fabric (?) impression shell temper, associated w/Townsend  
18 flakes, quartzite  
6 decortification flakes, quartzite  
1 pebble spall w/cortex, quartz  
1 probable utilized flake, spokeshave, crystalline quartz, unifacial retouch creates steeply beveled cutting edge, made from flake w/small portion cortex remaining |
| 32 | 1 flake, quartzite |
| 32A | 1 flake, quartzite  
1 decortification flake, quartzite  
1 pebble spall, quartz (fractured interior) |

32-13A
2 decortification flakes, quartzite
8 flakes, quartzite
2 decortification flakes, quartz
3 fragments of fire-cracked rock
12 sherds Gaston simple-stamped
2 sherds untyped aboriginal, w/grit temper
1 sherd untyped aboriginal, w/shell temper

32-14A
23 sherds Gaston simple-stamped
16 miscellaneous small sherds untyped aboriginal, obscured surfaces
4 sherds, Townsend (Rappahannock Fabric Imp.) low amount shell in temper
due to excellent paste
1 Townsend rim (R.F.I.)
2 miscellaneous unidentified aboriginal sherds w/possible shell temper
23 flakes quartzite
11 decortification flakes quartzite
2 flakes, quartz
1 decortification flake (pebble spall), quartz
1 section of a broken broad blade, once massive and thin, 6.895 cm. max width, associated w/Savannah River
1 discarded preform leaf shaped, white quartz, approximately stage 4 or 5
1 section of broken preform, quartzite, w/distal and medial lateral snap
1 section of broken knife or projectile point, quartzite, w/distal and medial lateral snap
2 fragments of broken water worn granite (not cultural)

32-15A
12 flakes, quartzite
4 decortification flakes, quartzite
1 flake, quartz
1 decortification flake quartz
1 preform, quartz (discard probable due to high medial ridge)
2 broken preforms, quartzite (both w/lateral snaps)
1 distal section of knife or projectile point, quartzite
1 small broken core, quartzite (w/some cortex remaining)
4 sherds Gaston simple-stamped
1 sherd, untyped aboriginal w/probable fabric impression, grit temper
2 miscellaneous aboriginal sherds w/eroded or obscured surfaces, grit tempered

32-15B
1 projectile point, black and grey chert, Brewerton Side Notched w/slightly convex base
1 projectile point, Savannah River, w/contracting stem, slightly concave base
8 decortification flakes and spalls, quartzite (some water worn)
11 flakes, quartzite
1 fire-cracked rock
1 large broken biface, quartzite, approximately stage 3-4, max. width 6.67
3 sherds Gaston simple-stamped
1 sherd atypical Townsend (R. fabric-impressed) fine fabric wicker, w/reduced shell temper, gritty paste
2 sherds untyped aboriginal w/brushed or lab scrubbed surfaces, grit (and minor shell?) temper

32-16A
1 basal sherd, Gaston simple-stamped
1 body sherd, Gaston simple-stamped
1 untyped aboriginal, w/obscured water worn surface, coarse sand temper
1 large decortification flake, quartzite

32-17A
17 flakes, quartzite
4 decortification flakes, quartzite
3 fragments fire-cracked rock
1 fragment basalt (w/possible ground edge)
1 distal section of knife or projectile point, w/medial lateral snap
14 sherds Gaston simple-stamped
1 rim sherd Gaston simple-stamped, w/simple fold, paddled lip
5 sherds untyped aboriginal, w/obscured (fine wicker fabric?) surface, tempered w/coarse sand (minor shell?)

32-18A
1 decortification flake, quartzite
4 flakes, quartzite
1 flake, quartz
1 fragment sandstone cobble (not cultural)
3 sherds Gaston simple-stamped
1 sherd atypical Townsend, fine fabric wicker, low shell temper content (grit present natural to clay?)

33A
29 flakes, quartzite
8 decortification flakes, quartzite (1 perhaps also heated)
2 flakes, quartz
1 small chunk, quartz
1 pebble, fractured and water worn quartz (not cultural)
1 decortification flake, grey chert
1 section of broken projectile point, white quartz, undiagnostic, zone of base of blade w/tapering section of upper stem, basal lateral snap just above shoulders
5 sherds Gaston simple-stamped
1 rim sherd, Gaston simple-stamped w/out-curving lip, lip paddled
2 sherds, atypical Townsend (Rap. fabricImp.) w/reduced shell temper also w/fine grit and rare rounded coarse sand

34A
47 sherds, Gaston simple-stamped
9 sherds, untyped aboriginal w/obscured surfaces, grit and crushed quartz temper
1 rim sherd, Gaston simple-stamped, folded and broken at fold (?) w/punctuation double or bifurcated stick
1 rim sherd, w/simple fold, bulging lip, untyped aboriginal, w/coarse sand and crushed quartz temper brushed or lab scrubbed surface
1 body sherd, w/smoothed surface grit temper, early Colono ware?
1 body sherd, aboriginal, w/shell temper, smoothed surface Roanoke Plain
1 sherd, untyped aboriginal, w/corn cob impressions (?), coarse sand temper
8 flakes, quartzite
2 decortification flakes quartzite
2 decortification flakes, quartz
2 fragments of grey/green schist (not cultural)
1 leaf shaped preform, quartzite
1 exhausted and discarded, Savannah River knife or projectile point, quartzite w/parallel stem and straight base, blade has been reworked to a short asymmetrical form exaggerating size of stem
1 projectile point, white quartz, short (2.50 cm.) w/contracting stem and rounded base, is probably a Rossville Point, reworked
5 human teeth in 6 pieces, only the enamel survives, 1 incisor (shoveled), 2 premolars, 2 molars (1 broken into 2 pieces), all are small and of complimentary size, based on the shovel incisor all are presumed Mongoloid, based on common presence and non-yellow color they are not thought to be deciduous
1 sherd Gaston simple-stamped
1 sherd, Townsend (Rappahannock Fabric Impressed), w/low amount of shell in paste
1 decortification chunk, quartzite
6 flakes, quartzite
1 flake, quartz
2 pebbles, 1 sandstone, 1 quartzite (broken), not cultural
1 fragment of broken grey/green schist (not cultural)
36A 4 large sherds (2 mended), Varina Net
37B 1 sherd, untyped aboriginal w/coarse sand temper, obscure surface
1 flake, quartzite
37E 1 sherd untyped aboriginal, w/brushed or lab scrubbed surface plus smooth linear dashes (simple stamps?), fine and coarse sand temper
37F 1 cobble spall w/cortex, amber quartz
37H 2 flakes, quartzite
1 decortication flake, quartzite
1 rough thin fragment, earthenware or brick?
38B 2 sherds Gaston simple-stamped
38C 2 sherds, Gaston simple-stamped (1 w/obscure surface)
38D 5 sherds (including 3 mended basal sherds up to 1.64 cm. thick) untyped aboriginal, w/coarse sand temper, the surface is eroded w/occasional traces of net impressions (?), perhaps associated w/Varina Net
1 sherd untyped aboriginal, w/obscured surface (simple-stamped?) w/crushed quartz temper
2 flakes quartzite
38F
4 sherds, Gaston simple-stamped (2 w/obscure surfaces)
1 flake quartzite
38J
1 basal sherd, untyped aboriginal coarse sand temper, obscured surface treatment
2 quartzite flakes
38L
2 fire-cracked rock (mendable)
1 flake, quartzite
1 sherd, Gaston simple-stamped
38P
1 chunk, quartzite
1 flake, quartzite
5 sherds Gaston simple-stamped (2 grit-tempered)
38S
1 broken base or stem section of projectile point or knife, w/concave base (slight grinding) below and contacting stem or blade, quartzite, obverse side has a short channel flake (probably the stem of a projectile point)
1 flake, quartzite
39A
1 sherd untyped aboriginal, coarse sand (and crushed quartz?) temper, brushed or lab scrubbed surface
39B
1 sherd, Gaston simple-stamped
40A
3 flakes, quartzite
40D
2 flakes, quartzite
40F
2 sherds Gaston simple-stamped
3 decortification flakes, quartzite (1 also heated)
3 flakes, quartzite
40G
1 sherd Gaston simple-stamped, stamped and swiped
40H
1 decortification flake, quartzite
6 flakes, quartzite
41D
1 flake, quartzite
1 flake, quartz
1 fire-cracked rock
42
1 sherd Gaston simple-stamped
1 sherd Roanoke simple-stamped
1 sherd, Townsend Rappahannock Fabric Imp.
1 sherd untyped aboriginal, eroded surface w/linear streaks, sand and shell temper admixture?
1 core, quartzite, made from cobble spall w/cortex reverse, unifacial w/high ridge obverse
3 quartzite, flakes
42-50
1 broken bifacial core, quartzite
4 decortification flakes and chunks, quartzite
9 flakes, quartzite
2 flakes, quartz
43
9 sherds Gaston simple-stamped
1 rim sherd, untyped aboriginal, w/smoothed surface shell temper (associated
w/Roanoke?), has 1 punctuation penetrating both surfaces
4 miscellaneous sherds, untyped aboriginal, small w/worn/obscured surfaces, w/sand or crushed quartz temper
1 decortification flake, quartzite
2 flakes, quartzite
1 decortification flake, quartz
1 flake, quartz
1 stemmed projectile point, quartzite Savannah River, weak shoulders due to reworking?, contracting stem, concave base, small distal lateral snap

44PG300 HISTORIC ARTIFACT INVENTORY

The following is a list of historic artifacts excavated at Jordan’s Point, Site 44PG300. The historic artifacts are categorized according to ceramic, glass, metal, miscellaneous and prehistoric items.

44PG300/Transect 1A

1 Clay tobacco pipe stem fragment, English: stem hole diameter 7/64-1
1 Rhenish Stoneware, Westerwald: fragment
1 Unidentified Refined Earthenware: hollow ware fragment
4 Nails: fragments
1 Shot
1 Brick bat
2 Clay pigeon
1 Daub
1 Oyster shell
12 Stones
1 Unidentified fragment: plastic
1 Ground stone

44PG300/Transect 2A

2 Clay tobacco pipe stem fragments, English: stem hole diameter
1 Porcelainous: bowl fragment.
1 Rhenish Stoneware, Westerwald: fragment.
1 Slipware, Dutch: hollow ware fragment.
1 Wine bottle glass: fragment.
1 Casting debris.
1 Nail: cut.
1 Nail: wrought.
1 Stone
1 Unidentified oval shaped object: wrought
2 Cores

44PG300/Transect 3A

1 Clay tobacco pipe bowl fragment, English
3 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-1; 8/64-1
7 Brown Stoneware, Rhenish, Frechen: jug fragments, 7
2 Whiteware: hollow ware fragments, 2
1 Bottle glass: base; burned
1 Wine bottle glass: fragment
1 Ammunition cartridge: stainless steel
2 Nails: fragments
2 Unidentified flat fragments
1 Biface
1 Chopper
1 Ground stone

44PG300/Transect 4A
1 Clay tobacco pipe stem fragment, local
Oyster shell

44PG300/1SC
1 Midlands Purple: butter pot fragment
1 Unidentified glass: clear
4 Unidentified glass: flat
7 Wine bottle glass: fragments
1 Buckle fragment
1 Bone

44PG300/SC
4 Clay tobacco pipe bowl fragments, English: stem hole diameter 7/64-1
17 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-1; 6/64-2; 7/64-8; 8/64-13; 9/64-1
4 Clay tobacco pipe stem fragments, local
1 Brown Stoneware, English: tankard fragment
8 Brown Stoneware, Rhenish, Frechen: jug fragments, 4, 2(1), 2(1)
3 Coarseware, Dutch: milkpan fragment, 1; fragments, 2
1 Coarseware, Jamestown: fragment
1 Coarseware, Spanish: Costrel fragment
3 Coarseware, North Devon Fine Gravel Temper: baluster jar fragment, 3
1 Coarseware, Staffordshire Mottled: pan fragment
2 Delftware: dish fragment, 1; fragment, 1
2 Midlands Purple: butter pot fragment, 1; fragment, 1
1 Porcelain, Unidentified: hollow ware fragment
7 Rhenish Stoneware, Westerwald: jug fragments, 5; fragments, 2
1 Slipware, Dutch: bowl fragment
1 Slipware, North Devon Sgraffito: charger fragment
2 Whiteware, Flow Blue: bowl fragment, 1; plate fragment, 1
3 Whiteware: hollow ware fragment, 1; plate fragment, 1; teacup fragment, 1
3 Bottle glass: brown, molding technique unknown
4 Bottle glass: clear, molding technique unknown
1 Plate glass: fragment
10 Wine bottle glass: including base fragments, 5; body fragments, 4; neck with applied lip
5 Wine bottle glass: molding technique unknown; body fragments
2 Unidentified glass: flat fragment
5 Bullet: civil war type
1 Construction "hanger"
1 Horse shoe: with nails
3 Nails: cut
1 Nail: wrought
12 Nails: fragments
1 Pommel handle
1 Pot rim: tin fragment
2 Washers
11 Shot: lead
1 Spike
2 Unidentified metal objects
2 Bone
3 Charcoal
21 Daub
1 Mortar
10 Oyster shell
1 Seal-top, spoon top
2 Stone
1 Unidentified fragment: plastic

44PG300/1A
1 Clay tobacco pipe bowl fragment, English: includes base
4 Clay tobacco pipe stem fragment, English: stem hole diameter 8/64-3
2 Clay tobacco pipe stem fragment, local
1 Bottle glass: clear; technique unknown
1 Bottle glass: green; technique unknown
8 Nails: fragments
1 Unidentified flat fragment

44PG300/1B
10 Clay tobacco pipe bowls, English: including 1 wheel maker’s mark on the base; 1 Tudor Rose maker’s mark on the base
124 Clay tobacco pipe bowl fragments, English: including 6 with bases
163 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-4; 7/64-39; 8/64-52; 9/64-6
2 Clay tobacco pipe bowl, local
19 Clay tobacco pipe bowl fragments, local
22 Clay tobacco pipe stem fragments, local

457
2 Borderware: hollow ware fragments, 2
9 Brown Stoneware, Rhenish, Frechen: Bartmann jug fragment, 2; jug fragment, 7
8 Coarseware, Dutch: bowl fragments, 2(1); storage jar fragments, 5(1), 1; fragment, 1
2 Coarseware, Iberian Olive Jar: fragments, 2
1 Coarseware, Jamestown: fragment
18 Coarseware, Spanish: Costrel fragments, 18
1 Coarseware, North Devon Fine Gravel Temper: cup fragment
6 Delftware: ointment pot fragment, 1; fragment, 4; drug jar fragment, 1
2 Delftware, Portuguese?: dish(charger) fragments, 2
4 Delftware, ?: plate fragments, 4
2 Midlands Purple: fragments, 2
2 Midlands Purple: butter pot fragments, 2
2 Slipware, Dutch: jug fragments, 2
2 Slipware, North Devon (poss Sgraffito): hollow ware fragments, 2(1)
2 Slipware, North Devon Plain Slip: dish fragment, 1; hollow ware fragment, 1
1 Slipware, North Devon Sgraffito: charger fragment
1 Armor rivet: diamond shape
2 Blades: possible knife blades
1 Bottle glass: clear
1 Button: sleeve
22 Case bottle glass: incl. lip fragments, 2; neck frags, 2; shoulder frag, 1; base frag, 1
136 Casting debris
1 Jetton
23 Wine bottle glass: fragments
2 Nails: wrought
1325 Nails: fragments
1 Pestle
208 Shot
1 Slag
9 Snaphaunce fragments
12 Sprue
9 Stones
20 Unidentified metal fragments
250 Bones
21 Brick: fragments
4 Charcoal
268 Daub: fragments
4 Mortar
10 Pitch

44PG300/1C
3 Clay tobacco pipe bowl, English: including 1 with rosette maker's mark on base; c1600-1630

458
35 Clay tobacco pipe bowl fragments, English: stem hole diameter 7/64-1; including 1 with spur
82 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-6; 8/64-31; 9/64-3
4 Clay tobacco pipe stem fragments, local
3 Coarseware, Spanish: Costrel fragments, 3
1 Delftware, Dutch?: drug jar fragment
4 Case bottle glass: fragments
23 Casting debris
2 Jettons
2 Nails: wrought
743 Nails: fragments
34 Shot
1 Spike
1 Sprue
5 Unidentified metal objects
3 Unidentified tool fragments
1 Unidentified: possible spokeshave
288 Bone
9 Brick: fragments
1 Brick tile fragment
1 Charcoal
61 Daub
4 Stones: including one exhibiting a fossil
1 Core

44PG300/1D
2 Clay tobacco pipe bowl, English: base maker's marks "WI" c 1600-1630, incuse
21 Clay tobacco pipe bowl fragments, English: including 1 with spur; 1 with base; stem hole diameter 7/64-2
2 Clay tobacco pipe base fragment, English: including base maker's mark "B" encircled, incuse, c 1730-60
85 Clay tobacco pipe stem fragments, English: stem hole diameter 5/64-2; 7/64-4; 8/64-32; 9/64-5
2 Clay tobacco pipe bowl fragments, local
1 Clay tobacco pipe stem fragment, local
2 Brown Stoneware, Rhenish, Frechen: jug fragments, 2
3 Coarseware, Dutch: mug fragment, 1; storage jar fragment, 1; fragment, 1
1 Coarseware, Jamestown: fragment
7 Coarseware, Spanish: Costrel fragments, 7
1 Delftware: dish fragment
1 Delftware, Dutch?: drug jar fragment
1 Delftware, Portuguese?: dish(charger) fragment
5 Midlands Purple: butter pot fragments, 2(1), 3
1 Slipware, Dutch: hollow ware fragment
1 Slipware, North Devon (poss Sgraffito): hollow ware fragment
6 Case bottle glass: fragments
3 Wine bottle glass: fragments
48 Casting debris
2 Hinge: fragments
1 Jetton
718 Nails: fragments
34 Shot
1 Spike
1 Sprue
1 Straight pin
1 Straight pin: fragment
4 Tacks: furniture
15 Unidentified metal objects
117 Bone
25 Brick: fragments
1 Brick tile fragment
1 Charcoal
59 Daub
1 Mortar

44PG300/1E
7 Clay tobacco pipe bowl fragments, English: including 1 with a base
12 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-4; 8/64-3; 9/64-1
1 Clay tobacco pipe base fragment, local
3 Borderware: pipkin fragments, 3
2 Coarseware, North Devon Fine Gravel Temper: baluster jar fragments, 2
1 Aglett
8 Armor: fragments; copper rivets
2 Axe
1 Breast plate
4 Breast plate: fragment
1 Button: sleeve; metal shank set in place
12 Casting debris
6 Helmet: with fragment
2 Hilling hoe
2 Hoe
1 Jetton
1 Long axe
1 Nail: wrought
123 Nails: fragments
1 Pot: with lug handle; fragment
18 Shot
1 Sickle
11 Unidentified metal objects
19 Bone
9 Brick: fragments
6 Brick tiles: fragments
99 Charcoal
5 Daub
1 Core

44PG300/1F
3 Clay tobacco pipe bowl, English: including base
3 Casting debris
1 Axe
1 Gun barrel
2 Nails: fragments
3 Brick: fragments
1 Brick tile: fragment
1 Daub

44PG300/1G
1 Midlands Purple: butter pot fragment
1 Brick: fragment
6 Charcoal

44PG300/3A
1 Clay tobacco pipe bowl fragment, English: including base
1 Clay tobacco pipe stem fragment, English: stem hole diameter 8/64-1
1 Borderware: hollow ware fragment
1 Brown Stoneware, Rhenish, Frechen: jug fragment
1 Coarseware, Dutch: fragment
1 Coarseware, Iberian Olive Jar: fragment
8 Coarseware, Spanish: Costrel fragments, 8
1 Coarseware, North Devon Fine Gravel Temper: baluster jar fragment
3 Delftware: fragment, 3
1 Button: sleeve: 2 pieces; shank set in place
5 Nails: fragments
1 Pot: fragment
3 Daub
44PG300/5A
1 Bottle glass: brown; machine-molded
3 Bottle glass: clear; machine-molded
4 Bottle glass: olive; machine-molded; base and body fragments
4 Nails: fragments

44PG300/5B
1 Bottle glass: green; molding technique unknown
1 Glass: possible headlight rim fragment; clear
5 Unidentified metal objects

44PG300/6B
19 Nails: fragments
3 Unidentified metal objects
5 Bricks: fragments
18 Daub: fragments
1 Jetton

44PG300/6C
4 Clay tobacco pipe stem fragments, English: stem hole diameter 8/64-1
1 Nail
2 Shot
1 Bog iron
4 Brick: fragments

44PG300/7A
8 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-1; 8/64-1
1 Bottle glass: clear; molding technique unknown
2 Unidentified metal objects

44PG300/7B
4 Clay tobacco pipe bowls with bases, English: stem hole diameter 6/84-1; 7/64-3
35 Clay tobacco pipe bowl fragments, English: including 1 with base maker's mark, Tudor Rose in relief, c 1670-80; 1 with base maker's mark, "RTP" over a "V" in relief
2 Clay tobacco pipe base fragments, English
32 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-1; 7/64-27; 8/64-22; 9/64-1
3 Clay tobacco pipe bowl fragments, local
1 Clay tobacco pipe stem fragments, local
2 Borderware: hollow ware fragments, 2(1)
3 Brown Stoneware, Rhenish, Frechen: Bartmann jug fragment, 1; jug, 2
1 Coarseware, Dutch: fragment
4 Coarseware, Iberian Olive Jar: fragments, 4
8 Coarseware, Spanish: Costrel fragments, 8
3 Coarseware, North Devon Fine Gravel Temper: baluster jar fragments, 2, fragment, 1
2 Delftware: fragments, 2
2 Delftware, Dutch?: drug jar fragments, 2
1 Midlands Purple: fragment
2 Slipware, Dutch: jug fragments, 2
11 Slipware, South Somerset: dish fragments, 11
2 Bottle glass: clear; molding technique unknown; letters in relief
34 Case bottle glass: fragments
1 Unidentified glass object: crimped, olive
1 Bale seal
3 Buttons: sleeve
32 Casting debris
3 Jettons
2 Nails: wrought
364 Nails: fragments
43 Shot
2 Spike
6 Sprue
18 Unidentified metal objects
1 Unidentified metal object: circular
108 Bone
3 Brick: fragments
96 Daub
1 Snail fragment

44PG300/7C
13 Clay tobacco pipe bowl fragments, English: including 1 with a base
7 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-1
1 Coarseware, North Devon Fine Gravel Temper: hollow ware fragment
2 Coarseware, Spanish: Costrel fragments, 2
1 Delftware: fragment
3 Case bottle glass: fragments
1 Aglett
1 Armor fragment bottom
14 Casting debris
1 Claw hammerhead
1 Nail: wrought
101 Nails: fragment
12 Shot
1 Unidentified metal objects
2 Bead
2 Bog iron
51 Bone
36 Daub

44PG300/7E

1 Clay tobacco pipe bowl, English
1 Clay tobacco pipe base, English: including gauntlet maker’s mark on the base
34 Clay tobacco pipe bowl fragments, English: including 1 rosette base maker’s mark; 1 wheel base maker’s mark; 1 gauntlet base maker’s mark
109 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-3; 7/64-31; 8/64-24; including one with base maker’s mark of a right hand gauntlet
8 Clay tobacco pipe stem fragments, local
2 Coarseware, Iberian Olive Jar: fragments, 2
7 Coarseware, Spanish: Costrel fragments, 4, 3(1)
2 Delftware, Dutch: drug jar fragments, 2
1 Delftware, Dutch?: drug jar fragment
17 Delftware, Majolica, Portuguese: cauldle cup fragments, 17(1)
3 Slipware, South Somerset: dish fragments, 3(1)
1 Rhenish Stoneware, Westerwald: fragment
63 Case bottle glass: fragments; including neck, lip, shoulder fragments
6 Bottle glass: including base fragment, 1; fragments, 2
1 Wine bottle glass: base fragment
1 Axe
1 Bale seal
1 Boot Scraper
1 Bottle collar: pewter
1 Carving tool: wood attached
22 Casting debris
1 Chain mail
1 Gun barrel
1 Hilling hoe: broken and remodified
2 Jettons
1 Lock
14 Nails: wrought
178 Nails: fragments
1 Pot hook: (possible)
1 Rivet
2 Seed
36 Shot
4 Sprue
1 Sword hilt
19 Unidentified metal objects
1 Bead
62 Bones
20 Bricks: fragments
6 Charcoal
83 Daub

44PG300/7G
7 Clay tobacco pipe bowls, English: including 3 bowls bases; 1 bowl with a spur; stem hole diameter 8/64-1
2 Clay tobacco pipe bowl fragments, English: stem hole diameter 7/64-1
1 Clay tobacco pipe bowl, local
35 Clay tobacco pipe stem fragments, English: 7/64-9; 8/64-16
2 Coarseware, Dutch: storage jar fragment, 1; fragment, 1
1 Coarseware, North Devon Fine Gravel Temper: baluster jar fragment
2 Delftware, Majolica, Portuguese: caudle cup fragments, 2(1)
5 Armor collar with rivets
2 Candle snuffer
1 Cannon ball
3 Casting debris
1 Escutcheon plate to a door
5 Furniture hardware: including 2 handles
2 Handles
3 Hinges
1 Key
1 Latch trunk part
18 Nails: wrought
18 Nails: fragments
5 Shot
1 Trunk hinge: including pintle
1 Trunk key escutcheon
1 Unidentified flat fragment with nail
6 Unidentified metal objects
26 Bones
2 Bricks: fragment
3 Daub

44PG300/7J
8 Back plate, bottom part
3 Nails: fragments
1 Brick: fragment

465
1 Nail: fragment
4 Daub

1 Clay tobacco pipe spur, English

5 Nails: fragments
3 Shot
18 Daub

1 Clay tobacco pipe bowl fragment, English
5 Clay tobacco pipe stem fragments, English
1 Coarseware, Iberian Olive Jar: fragment
3 Nails: fragments
3 Shot: including 1 with a spure
1 Bones
2 Daub

2 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-2
1 Slipware, Dutch: jug fragments
2 Wine bottle glass: fragments
6 Nails: fragments
1 Shot
25 Daub

1 Clay tobacco pipe bowl, English: including base
3 Clay tobacco pipe stem fragments, English: stem hole diameter 6/64-1; 8/64-1
1 Coarseware, North Devon Fine Gravel Temper: baluster jar fragment
4 Nails: fragments
1 Shot
8 Daub

3 Clay tobacco pipe stem fragments, English: stem hole diameter 8/64-1
1 Brown Stoneware, Rhenish, Frechen: fragment
2 Wine glass bottle: body fragments
1 Nail: wrought
5 Nails: fragments
2 Daub

**44PG300/22B**
1 Clay tobacco pipe bowl fragment, English
5 Clay tobacco pipe stem fragments, English: 6/64-1
3 Coarseware, North Devon Fine Gravel Temper: baluster jar fragments, 3
1 Rhenish Stoneware, Westerwald: fragment
1 Slipware, North Devon Dorset Type: hollow ware fragment
1 Wine bottle glass: body fragment
13 Nails: fragments
1 Shot
1 Sprue
18 Daub
2 Tar

**44PG300/23A**
5 Clay tobacco pipe bowl fragments, English
13 Clay tobacco pipe stem fragments, English: 7/64-1; 7/64-3
1 Coarseware, Iberian Olive Jar: fragment
1 Delftware: fragment
1 Wine bottle glass: body fragment
3 Casting debris
41 Nails: fragments
3 Shot
1 Slag
21 Daub
8 Debitage

**44PG300/24A**
1 Clay tobacco pipe stem fragment, English: stem hole diameter 8/64-1
10 Nails: fragments
1 Slag
7 Daub
2 Mortar
44PG300/25A
1 Casting debris
2 Nails: fragment
25 Daub

44PG300/26A
1 Rock: fire cracked; sandstone
1 Stone: possible gaming stone

44PG300/27A
3 Clay tobacco pipe bowl fragments, English
2 Clay tobacco pipe stem fragments, English
1 Casting debris
2 Nails: fragments
2 Shot
2 Sprue
1 Charcoal
2 Daub

44PG300/28A
2 Clay tobacco pipe bowl fragments, English
8 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-1; 8/64-2
1 Coarseware, North Devon Fine Gravel Temper: fragment
1 Slipware, Dutch: jug fragment
1 Casting debris
2 Nails: fragments
2 Shot
1 Sprue
1 Asphalt
1 Charcoal
1 Daub

44PG300/29A
1 Clay tobacco pipe stem fragment, English: stem hole diameter 8/64-1
1 Glass: flat fragment; clear
1 Nail: fragment
1 Shot
1 Slag

468
44PG300/30A
1 Bowl rim fragment: incised; ground; steatite
1 Button: sleeve
1 Nail: fragment
1 Shot
2 Bone
1 Charcoal
67 Daub
2 Tar

44PG300/31A
2 Clay tobacco pipe stem fragments, English: stem hole diameter 7/64-1
3 Coarseware, North Devon Fine Gravel Temper: baluster jar fragments, 3
1 Furniture tack
3 Nails: fragments
9 Daub

44PG300/32A
6 Daub

44PG300/33A
2 Daub

44PG300/35
1 Coarseware, North Devon Fine Gravel Temper: hollow ware fragment
1 Wine bottle glass: body fragment
2 Nails: fragments
3 Daub

44PG300/50SC
1 Clay tobacco pipe bowl, English
1 Clay tobacco pipe stem fragment, English: stem hole diameter 7/64-1
1 Clay tobacco pipe stem fragment, local
1 Wine bottle glass: shoulder fragment
1 Knife blade: including partial handle
1 Nail: wrought
1 Spike
1 Bone
1 Clay pigeon

469
1 Toy GI Joe boot

44PG300/51B

5 Clay tobacco pipe stem fragments, English: stem hole diameter 8/64-1
1 Coarseware, Iberian Olive Jar: fragment
1 Coarseware, North Devon Fine Gravel Temper: baluster jar fragment
2 Casting debris
19 Nails: fragments
2 Shot
1 Bone
13 Daub
1 Oyster shell fragment

44PG300/51SC

1 Clay tobacco pipe stem fragment, English: stem hole diameter 7/64-1
1 Slipware, Dutch: jug fragment
1 Nail: fragment
2 Unidentified metal objects

44PG300/52A

1 Clay tobacco pipe bowl, English: including base
11 Clay tobacco pipe bowl fragments, English
46 Clay tobacco pipe stem fragments, English: including 1 base with gauntlet maker’s mark;
   1 base with wheel maker’s mark; 6/64-2; 7/64-13; 8/64-12
13 Coarseware, Dutch: milkpan fragment, 1; pipkin fragments, 9(1), 3
1 Coarseware, Iberian Olive Jar: fragment
4 Coarseware, Spanish: Costrel fragments, 4

</table>
large flake, rejected due to uncontrolled shatter)

1B-360 1 sherd Gaston simple-stamped
1B-362 1 sherd Gaston simple-stamped
1B-387 1 sherd Gaston simple-stamped
1B-389 1 Gaston simple-stamped rim sherd, lip paddle-impressed, interior rim
stabbed and dragged (short distance) w/bifurcated reed (single row) --
1 sherd unidentified aboriginal, with obscured surface, coarse and fine
micaceous sand temper

44PG300/1C

1C-20 1 large decortification flake, quartzite (possibly also burned)
1C-33 1 sherd Gaston simple-stamped
1C-55 2 sherds Gaston simple-stamped
1C-61 1 sherd Gaston simple-stamped
1C-63 1 triangular preform, crystalline quartz, shaped like a triangular projectile
point, concave base, w/some bifacial retouch, made from small
unifacial flake, (probably rejected as too small and w/uncontrolled
fractures leading to high medial ridge (length 1.85 cm.)
1C-104 1 sherd Gaston simple-stamped
2 sherds, untyped aboriginal, with coarse rounded sand temper, gritty paste,
obscure surface treatment
1 fragment of a carved and polished soapstone object (pipe?) both surfaces
polished (only one finished finely), 0.48 cm. thick
1C-111 1 decortification flake quartzite
1C-124 1 sherd Gaston simple-stamped
1C-130 1 small sherd untyped aboriginal, w/smoothed surface and shell temper
1 ceramic nerds, aboriginal, w/plain surface and shell temper (associated
w/above)
1C-131 1 sherd untyped aboriginal, w/obscure surface treatment, coarse sand temper
1C-132 1 sherd untyped aboriginal, w/swiped over/worn fine wicker fabric impression,
and minor shell temper inclusions (due to naturally good paste quality,
and associated w/Townsend?)
1C-139 1 sherd Gaston simple-stamped (low temper additives)

44PG300/1D

1D-7 1 large quartzite decortification flake, possibly also burned w/later iron oxide
stain
1D-28 2 sherds Gaston simple-stamped
1D-30 1 utilized flake, green silicified slate, has 1 unifacially worn/retouched edge
for use as small end scraper (length 2.8 cm.)
1D-31 1 broken preform, quartzite, w/approximate medial lateral snap, approximate
stage 2 (width 3.2 cm.)
<table>

</table>
| 1D-36 | 10 small flakes, whitish chert or flint (probably English and possibly burned)  
1 fragment unidentified whitish cherty mineral (non-porous), possibly English flint fossil/ or nodule impurity with curvilinear surface, (looks superficially like bone or pipe stem) |
| 1D-66 | 1 fragment fire-cracked quartzite |
| 1D-94 | 1 sherd Gaston simple-stamped |
| 1D-96 | 1 small flake, (grainy) quartz |
| 1D-106 | 2 sherds, untyped aboriginal, both with smoothed over surfaces w/linear traces, coarse sand and/or crushed quartz temper |
| 1D-107 | 1 projectile point or knife, untyped, white quartz, w/approximate medial lateral snap, asymmetrical broken stem, 3.18 cm. wide |
| 1D-108 | 1 Morrow Mountain II projectile point, quartzite, w/distal lateral snap, high medial ridge (width 2.0 cm.) |
| 1D-109 | 1 projectile point, Morrow Mountain II, 3.87 cm long by 1.69 wide |
| 1D-110 | 1 large decortification flake, quartzite (possibly utilized as side scraper) |
| 1D-171 | 1 sherd Gaston simple-stamped |
| 1D-189 | 1 sherd Gaston simple-stamped |

44PG300/1E

1E-5 | 1 sherd Gaston simple-stamped (smoothed over surface) |

44PG300/1F

1F-2 | 1 sherd Gaston simple-stamped |

44PG300/1G

1G-3 | 1 small flake, white quartz |

44PG300/5A

5A-3 | 1 unidentified stemmed projectile point, tan quartzite, Archaic form and size (with a distal lateral snap, and a second basal stem snap) |
44PG300/5B
5B-1 1 sherd Gaston simple-stamped
5B-2 1 flake gray quartzite, secondary flake with primary flake scars
5B(Bag 13) 2 sherds Gaston simple-stamped

44PG300/7B
7B-7 5 body sherds Gaston simple-stamped
1 rim sherd Gaston simple-stamped (folded and broken at coil break below and across fold)
7B-22 3 sherds untyped aboriginal, crushed quartz temper, obscured probably simple-stamped surface associated w/Gaston
7B-45 3 sherds Gaston simple-stamped
7B-115 7 sherds Gaston simple-stamped
1 untyped aboriginal sherd, obscured fabric or distorted net surface with irregular eroded temper particles of low frequency

44PG300/7C
7C-21 2 small flakes, quartz
1 small flake, quartzite
7C-40 1 sherd Gaston simple-stamped, (sandy paste w/low temper additives)

44PG300/7E
7E-14 1 sherd Gaston simple-stamped
7E-62 1 sherd untyped aboriginal, with sandy paste w/irregular rounded eroded temper particles, obscured surface
7E-77 1 sherd, atypical Townsend (Roanoke fabric-impressed) with fine wicker fabric (partly obscured), almost no visible shell temper
7E-81 1 sherd Gaston simple-stamped
7E-89 2 sherds Gaston simple-stamped, mendable
7E-116 1 sherd Gaston simple-stamped
7E-118 2 sherds Gaston simple-stamped
7E-122 1 sherd, untyped aboriginal, shell-tempered ware w/scraped or lab scrubbed surface
4 sherds Gaston simple-stamped
5 sherds untyped aboriginal, with obscured surfaces and rounded coarse sand temper
5 sherds, untyped w/smoothed or swiped over and otherwise obscured surfaces coarse sand temper
7E-124 1 chunk quartzite
7E-131 1 small flake quartz
1 small flake quartzite
7E-141 1 sherd, untyped aboriginal, w/crushed quartz temper and obscured surface (almost certainly associated w/Gaston)
7E-161 1 rim sherd, untyped aboriginal, with flattened oval eroded temper impressions and simple-stamped surface, probably associated w/Gaston
7E-169 1 sherd Gaston simple-stamped
7E-180 1 basal sherd, untyped aboriginal, w/abundant crushed quartz temper, obscured surface
7E-181 1 sherd untyped aboriginal, with crushed quartz temper probable traces of simple stamping, (probably associated w/Gaston)

44PG300/7J
7J-3 1 sherd Gaston simple-stamped

44PG300/9C
9C-1 1 sherd, Gaston simple-stamped (some rounded temper particles, possibly brushed or lab scrubbed surface)
9C-2 1 sherd, untyped aboriginal, with probable Gaston associated
9C-3 1 sherd, unidentified aboriginal, w/fine fabric wicker, reduced temper w/some coarse sand in clay matrix

44PG300/10B
10B-1 1 sherd Gaston simple-stamped

44PG300/11B
11B-3 1 sherd, Roanoke simple-stamped
11B-4 1 sherd, Gaston simple-stamped
11B-5 1 sherd, Gaston simple-stamped (swiped surface)
11B-8 1 sherd Gaston simple-stamped (reduced temper)
11B-10 1 sherd untyped aboriginal, smoothed surface obliterates probable original simple-stamped surface, reduced crushed quartz temper (Gaston associated?)
11B-11 1 sherd Gaston simple-stamped
11B-12 1 sherd Gaston simple-stamped (reduced temper, smoothed interior)
11B-14 1 sherd Gaston simple-stamped (swiped over surface)
11B-15 1 sherd Gaston simple-stamped
11B-16 1 decortification flake, gray cherty material with white rind (English flint?)

        2 fragments brown/white and gray cherty material
52B-12 3 sherds Gaston simple-stamped
        5 sherds, untyped aboriginal, almost certainly associated w/Gaston but
        w/smoothed or obscured surfaces
52B-44 1 flake, quartzite
52B-45 1 flake, quartzite
52B-54 1 sherd Gaston simple-stamped (smoothed)
52B-65 1 flake, quartzite
52B-83 1 sherd Gaston simple-stamped
52B-89 2 flakes, quartzite
52B-112 1 sherd untyped aboriginal, smoothed or obscured surface, minor coarse sand
        in temper (black speckles on surface may suggest black hematite sand
        in clay matrix or inclusion ?)
        1 sherd untyped aboriginal, obscured but possible brushed or lab scrubbed
        surface, crushed quartz temper (associated with Gaston/Cashie?)
52B-116 1 flake, quartzite
52B-146 13 flakes, quartzite
        1 decortification flake, quartzite
52B-150 2 sherds untyped aboriginal, with plain or plain swiped surface (1 revealing
        traces of simple stamping?), and w/shell temper probably associated
        with Roanoke simple-stamped Ware
52B-151 6 sherds Gaston simple-stamped
52B-196 2 sherds untyped aboriginal, crushed and coarse quartz sand temper
        obscured surfaces (probably associated w/Gaston)
52B-197 6 sherds of Gaston simple-stamped
52B-200 10 flakes quartzite
        2 decortification flakes quartzite
52B-215 1 sherd Gaston simple-stamped
52B-216 1 sherd Gaston simple-stamped
52B-217 1 fragment of crystalline quartz, w/portions of two bifacial edges, general
        triangular shape w/uncontrolled break
52B-271 1 sherd Gaston simple-stamped
52B-272 1 sherd Gaston simple-stamped (smoothed)

44PG300/52E

52E-24 1 flake, quartzite
52E-54 3 quartzite flakes
        1 fragment fire-cracked rock
52E-64 6 sherds Gaston simple-stamped
52E-87 3 sherds Gaston simple-stamped

504
1 sherd untyped aboriginal, w/fine fabric wicker surface treatment; sandy paste with minimal shell temper (associated w/variant Townsend Roanoke fabric-impressed?)

1 sherd untyped aboriginal, shell-tempered, smoothed surface (associated w/Roanoke Plain?)

3 sherds Gaston simple-stamped
2 sherds untyped associated w/Gaston (surface obscured)

2 flakes quartzite
1 decortification flake quartzite

1 sherd Gaston simple-stamped

1 broken biface, quartzite, 4th or 5th stage, appears similar to the base of a medium small triangular projectile point

1 broken projectile point, undiagnostic, white quartz, w/shallow serrations from pressure flakes, remains of one shoulder or basal corner indicating smaller parent size

1 fragment aboriginal pipe bowl, probable tube or elbow pipe, w/burnished surface, fine sand and perhaps minor shell temper, lip of bowl burnished flat

1 sherd untyped aboriginal, with obscured smoothed surface, micaceous sand and eroded coarse rounded temper particle impressions, thin wall at 0.35 cm. thick

1 sherd untyped aboriginal, smooth surface, fine sand with minor crushed quartz temper inclusions

1 sherd Roanoke Plain (artifact # illegible ?)
1 sherd untyped aboriginal, simple-stamped, with fine sand temper and perhaps some shell (artifact # illegible in same bag as above)

2 shatter flakes quartz

3 quartzite flakes
2 quartzite decortification flakes, possibly also burned

1 sherd untyped aboriginal, plain surface with obscure traces of simple stamping (smoothed over), shell temper

1 sherd Roanoke simple-stamped

1 flake, quartzite

7 sherds Gaston simple-stamped

2 flakes, white quartz
11 flakes, quartzite (some also apparently burned)
2 decortification flakes (shatter), quartzite

1 sherd, Roanoke Ware, probably swiped over simple-stamped otherwise similar to a Roanoke Plain surface

1 sherd untyped aboriginal, w/rounded quartzite sand temper particles, perhaps a net surface (obscured)

3 sherds Gaston simple-stamped

8 flakes, quartzite

1 sherd untyped aboriginal, probably associated with Gaston

</table>

506
2 decortification flakes (shatter), quartzite
1 shattered pebble fragment, water worn and grainy, quartzite (not cultural)
52F-116 1 small flake, white quartz
52F-135 3 flakes, quartzite
52F-129 1 sherd untyped aboriginal, shell-tempered, traces of simple stamps (?),
(probably associated w/Roanoke simple-stamped?)

44PG300/52G
52G-19 1 flake, quartzite
52G-33 1 sherd untyped aboriginal, w/traces of simple stamping smoothed, probably associated w/Gaston
52G-41 1 flake, quartzite

44PG300/53SC
53SC-5 1 distal and medial section of a projectile point, unidentified, surface collected; tapering, high medial ridge, probably highly reworked, tan quartzite

44PG300/53A
53A-15 1 triangular projectile point (arrow head), white quartz, Clarkesville Small, with concave base
53A-18 1 small flake, quartzite
53A-38 2 sherds Gaston simple-stamped
53A-45 1 flake, brown quartzite
53A-52 1 tan quartzite flake with primary flake scars
53A-57 1 shatter flake cherty material (probably gray English flint as with iron oxide stain adhering)
53A-58 1 sherd earthenware, smoothed, thin walled, with rounded sand in temper (probably aboriginal with obscured surface)
53A-68 2 small flakes, quartzite

44PG300/53B
53B-17 1 decortification flake, quartzite (water worn)
53B-22 1 sherd, untyped aboriginal, small, with coarse quartz sand or crushed quartz temper and obscure surface
53B-39 1 probable rim sherd, untyped aboriginal, with plain smoothed and swiped surface, not folded, crushed quartz temper (probable Gaston associated)
53B-41 1 sherd Gaston simple-stamped
53B-46 2 flakes, quartzite
53B-54 1 shatter or decortification flake, jasper (from pebble core)
53B-61 12 small quartzite debitage flakes
1 decortification flake, light gray quartzite
1 water worn natural quartzite flake (not cultural)
53B-67 6 small retouch or shatter flakes, white and translucent quartz
53B-68 3 sherds Gaston simple-stamped
2 sherds untyped aboriginal, probably associated w/Gaston with coarse rounded sand temper, obscured surfaces
53B-79 1 decortification flake, quartzite
22 flakes and chips, quartzite
1 flake, white quartz
53B-82 1 triangular projectile point, tan quartzite, Clarkesville Small, with distal lateral snap and concave base (2.0 cm. wide)
53B-92 1 sherd untyped aboriginal, coarse rounded sand temper, possible net knots showing (perhaps related to Varina Net)
1 sherd untyped aboriginal, smoothed or worn surface w/minor coarse sand temper (probably red ferric sandstone/hematite present is natural to clay matrix)
53B-93 1 side scraper, yellow jasper, with two opposite retouched edges,
1 side w/unifacial retouch, 1 side w/partial bifacial retouch, edges well worn
53B-94 2 chips, quartz (1 white, 1 translucent amber)
53B-119 1 flake, quartzite (secondary)
53B-128 1 flake, quartzite
53B-134 1 utilized flake, cherty material or English Flint, w/unifacial and bifacial retouch in 2 zones, employed as a side scraper and small spokeshave
53B-135 2 flakes, quartzite
53B-136 1 small triangular preform brown chert (local Virginia) with high medial ridge, projectile point, size appropriate to Clarkesville Small range, attempted from small pebble flake, 2nd or 3rd stage
1 decortification flake, quartzite
1 flake, quartzite
53B-137 5 flakes, quartzite
1 decortification flake, quartzite
53B-140 1 flake, quartz
53B-145 1 flake, quartzite
53B-146 1 flake, quartzite
53B-147 4 flakes, quartzite
53B-148 1 flake, quartzite (almost quartz)
53B-141 1 distal section broken finished biface (probably projectile point), white quartz, with medial lateral snap and second converging break (water worn)
53B-164 6 flakes, quartzite
1 flake, quartz
53B-165 2 flakes, quartzite
53B-183 1 flake, tan and pink quartzite
53B-199 1 small lanceolate projectile point, white quartz (2.66 long X 1.2 cm. wide)
crude heavily reworked, probably originally more triangular

53B-206 2 flakes, quartzite
1 piece fire-cracked rock

53B-209 1 sherd, Townsend Series, Rappahannock Fabric Impressed with reduced shell temper due to naturally good paste quality

53B-225 1 untyped aboriginal sherd, small, with obscured surface, with large rounded gravel temper but thin walls (0.65 cm.), perhaps related to late (i.e. thin) Prince George

53B-233 2 small flakes, quartzite (1 pink, 1 tan)

53B-282 1 flake, jasper, lipped (soft hammer)
5 small white quartz flakes (shatter and chips)
6 decortification flakes, quartzite

30 small flakes and chips, quartzite

53B-294 1 sherd Gaston simple-stamped

53B-295 1 section of aboriginal stone drill or perforator, gray quartzite, bit section with distal lateral snap with a second snap near the shoulder expansion, water worn edges (perhaps reworked from exhausted projectile point)

53B-310 5 sherds Gaston simple-stamped
1 sherd untyped aboriginal, possible plain rim or water worn coil break, crushed quartz and irregular coarse sand temper
1 sherd, untyped aboriginal, worn surface, with temper of crushed quartz and perhaps some shell

53B-312 2 sherds untyped aboriginal, with irregular quartz sand temper (some crushed), very small w/obscure surfaces

53B-326 6 decortification flakes, quartzite (some water worn)
31 flakes, quartzite (some water worn)

53B-332 1 small triangular projectile point, white quartz, Clarkesville Small (1.21cm L X 1.2cm W, has probably been reworked; tiny pressure flakes along edges create small scale serrations, often associated w/Gaston ceramics

53B-351 3 sherds Gaston simple-stamped

53B-352 3 sherds Gaston simple-stamped (surfaces partially smoothed)

53B-354 1 pottery nerd, aboriginal, crushed quartz temper

53B-356 1 rim sherd, untyped aboriginal, has rows of exterior punctuations over smoothed exterior surface, tempered with coarse rounded small pebbles, perhaps a late Prince George Ware jar

53B-433 1 flake, tan quartzite

53B-441 1 sherd, untyped aboriginal, with worn fabric impression, sandy paste with obscured minor shell (?) temper inclusions

53B-442 1 sherd Gaston simple-stamped

53B-500 4 fragments (mendable) geofact, whitish gray silicified slate (?), looking superficially like a wet stone or crude pendant

53B-509 1 sherd, untyped aboriginal, with probable shell temper damaged surface

53B-510 1 sherd, Gaston simple-stamped, small

53B-511 1 sherd, Gaston simple-stamped, small

44PG300 Surface Collections

SC-1 1 sherd Gaston simple-stamped
SC-8 1 flake, green silicified slate
SC-12 2 sherds Gaston simple-stamped
SC-15 2 small flakes, quartz
SC-18 1 projectile point, quartzite, Morrow Mountain II, blade has been re-worked to the point that the shoulder width is exaggerated, 2.02 cm. max. width
SC-26 4 flakes, quartzite
SC-31 1 broken projectile point, quartzite, perhaps break at base a stage 5 mishap, (not diagnostic)
SC-34 1 sherd untyped aboriginal, w/coarse sand and/or crushed quartz temper, worn surface
SC-35 1 basal section of broken preform, quartzite (approximate stage 5), shape associated w/Savannah River broad blade form, short contracting stem, max. width 4.12 cm., made from large thin flake
SC-45 2 sherds Gaston simple-stamped
SC-48 1 distal section broken broad blade, quartzite, has approximate medial lateral snap, width at break 3.56 cm. (probably associated w/Savannah River)
SC-49 1 broken blade, possibly drill or perforator fragment, has distal break and approximate medial lateral snap, blade edge is shouldered in a fashion that probably precludes taper as stem of projectile point(?)
SC-52 1 sherd untyped aboriginal, w/crushed and/or irregular coarse quartz sand temper, obscure surface
SC-54 1 flake, pink quartzite
SC-55 1 flake, quartzite
SC-58 1 broken/incomplete projectile point, quartzite, w/distal lateral snap, one break at base, opposite basal side has evidence of weak side notch (incomplete?)
SC-60 1 flake, white quartz
2 decortification flakes quartzite (1 possibly also burned)
1 fragment possibly natural gravel, dark gray quartzite w/1 polished (natural?) surface
SC-64 1 preform, quartzite, asymmetrical rough triangular form approximate stage 3 (cannot detect edge wear on well thinned piece)
SC-74 4 flakes, quartzite
SC-79 1 flake, quartzite
SC-81 1 sherd, untyped aboriginal, crushed quartz temper, obscure surface, probably associated w/Gaston
SC-85 1 fragment, quartz
SC-87 2 flakes, quartzite (water worn)
SC-88 1 flake, quartz
SC-102 1 flake, granular pink quartzite
SC-107 2 large flakes, quartzite
1 broken preform for large blade, quartzite, with approximate medial and

515
distal lateral snaps (4.6 cm. wide), approximate stage 2 or 3

SC-111 1 small flake, white quartz
SC-116 1 projectile point, quartzite, though perhaps unfinished blade form distinctive and associated w/Bare Island type, lanceolate form w/crude/incomplete shoulders (?), 1 section has very high medial ridge perhaps reason for discard
SC-129 1 small flake, quartzite
SC-131 1 decortification flake, quartzite
SC-135 1 sherd Gaston simple-stamped
SC-141 1 cobble core, quartzite, with four large flakes taken off one end, superficially like a chopper but steep edge more like plane (?)
SC-138 1 broken tapering preform, quartzite, stage 3 or 4
SC-142 1 large fire-cracked cobble
SC-143 1 flake, quartzite
SC-148 1 broken approximate stage 4 preform or rejected reworked blade, quartzite, probably associated with Savannah River as characteristic wide contracting stem evident
SC-153 1 broken preform, quartzite, approximate stage 2 or 3
SC-165 1 flake, quartzite
SC-169 3 flakes, quartzite
SC-197 1 sherd Gaston simple-stamped

44PG300 - Transects

44PG300/1A

1A-12 1 large quartzite flake, unifacial and bifacial zones
1A-14 1 small oval cobble, granite, displays no evidence of battering - not cultural

44PG300/2A

2A-2 1 large quartzite flake
2A-3 1 portion of large cobble core with cortex, quartzite
2A-4 1 sherd Gaston simple-stamped
2A-5 1 uniface from large flake of quartzite, with two opposite worked edges (stage 1 and 2)
2A-7 1 flake, white quartz
2A-12 1 decortification flake, quartzite
2A-13 1 sherd, untyped aboriginal, swiped over surface, minimal shell in gritty paste
2A-14 1 small flake, quartzite
2A-15 1 broken preform, Stage 4 or 5, quartzite
2A-16 1 sherd of white tin enameled earthenware
2A-17 6 flakes, quartzite
2A-20 1 preform fragment, quartzite, stage 4 or 5 shaped piece, contracting base with lateral snap above
2A-27 1 small flake, white quartz

44PG300/3A
3A-7 3 large decortification flakes, quartzite
3A-9 1 quartzite cobble with fire reddened and cracked edges
3A-19 1 large elliptical unifacial and bifacial core, quartzite
3A-20 1 large unifacial decortification flake w/primary bifacial work, quartzite, (approximate stage 1 w/two primary bifacial edges)

44PG300/4A
4A-4 1 sherd Gaston simple-stamped

44PG300/900B
900B-1 2 sherds Roanoke Plain
1 probable rim, untyped aboriginal, smoothed surface, gritty paste
900B-5 2 sherds atypical Townsend like (Roanoke fabric-impressed) w/very low shell temper additives, clayey paste
900B-9 1 basal section broken bifacial blank, large (3.57 cm. wide), tan quartzite
900B-10 1 sherd Gaston simple-stamped
900B-13 1 sherd Gaston simple-stamped
900B-15 1 sherd Gaston simple-stamped
900B-20 1 sherd Gaston simple-stamped
900B-25 1 sherd Gaston simple-stamped
900B-26 1 sherd untyped aboriginal, gritty paste, obscure surface
900B-27 5 flakes, quartz
10 flakes, quartzite
1 fire-cracked rock
900B-28 3 sherds Gaston simple-stamped
900B-37 1 sherd Roanoke Plain
900B-39 1 Savannah River Broad Blade, tan quartzite, slightly contracting stem, irregular essentially straight base (8.02 cm. max. length X 3.6 cm. max. width)
44PG300/901A

901A-22 1 sherd Gaston simple-stamped
901A-23 1 shattered pebble spall brown flint or chert w/worn cortex, probably local, (England has brown flint cobbles)
901A-24 1 sherd Roanoke Plain (low amount of well crushed shell temper) thin body
0.34 thick, well fired, curvature indicates small jar
901A-33 1 sherd Gaston simple-stamped
901A-37 1 biface, gray quartzite, asymmetrical edges (5.7 cm. max. length X 2.71 cm. max. width) thought to be a discarded preform or reworking reject
901A-44 1 sherd Gaston simple-stamped

44PG300/901B

901B-8 1 sherd, unidentified aboriginal, thin walled (0.29cm. thick) with no apparent curvature, w/gritty paste, obscure surface treatment (perhaps simple-stamped) and temper additives
901B-20 1 sherd, untyped aboriginal, probably associated w/Gaston
901B-22 1 sherd, untyped aboriginal, simple-stamped or brushed surface gritty paste with low temper, probably associated w/Gaston
901B-23 1 sherd, untyped aboriginal, probably associated w/Gaston (surface obscure)
901B-25 1 sherd Gaston simple-stamped w/crushed and rounded quartz
901B-28 1 sherd, untyped aboriginal, obscured surface, minimal shell temper
901B-29 1 flake, tan quartzite
901B-32 1 sherd Gaston simple-stamped
901B-33 1 Dover Flint fragment, gray
901B-34 2 sherds Gaston simple-stamped
901B-35 1 sherd Gaston simple-stamped
1 sherd untyped aboriginal (probably associated w/Roanoke Plain) shell temper
3 sherds, untyped aboriginal w/some shell temper, obscure surfaces
901B-37 1 broken biface, white quartz, approximate 5th stage w/medial lateral snap
1 shatter flake, white quartz
901B-38 6 flakes, quartzite
901B-46 1 sherd Gaston simple-stamped
901B-47 1 flake, quartzite
901B-53 1 pebble spall, probably local brown chert (has whitish impurities)
901B-56 1 sherd Frechen Stoneware, w/iron oxide glaze
901B-57 4 flakes, quartzite (tan and amber)
901B-66 3 shatter flakes, quartz
901B-70 1 Savannah River Broad Blade, w/short contracting stem, irregular straight base, has been heavily reworked (max. length 5.61 X max. width 3.86)
901B-74 2 sherds Gaston simple-stamped
901B-75 1 sherd untyped aboriginal, probable fabric impression is obscured, apparent temper fine sand
901B-76 1 sherd untyped aboriginal, gritty paste, plain surface
1 sherd untyped aboriginal, w/some shell temper additives and obscure surface

901B-77
3 sherds Gaston simple-stamped

901B-78
3 sherds untyped aboriginal, obscured surface (probably associated w/Gaston)
2 sherds Gaston simple-stamped

901B-80
1 rim sherd, untyped aboriginal, possible punctuations inner lip gritty paste, obscure temper and surface treatment
1 sherd, untyped aboriginal, w/gritty paste (surface obscured and unclear)

901B-81
1 sherd, untyped aboriginal, shell temper, plain or obscured surface
1 sherd, Gaston simple-stamped
1 sherd, untyped aboriginal, Gaston-like
1 sherd, untyped aboriginal, tempered with some shell added to gritty paste, surface obscured

901B-83
2 sherds Gaston simple-stamped
1 sherd untyped aboriginal, minor shell temper, plain or obscured surface

901B-87
1 sherd, untyped aboriginal, thin walled, shell temper, w/traces of simple stamping (?)
1 sherd Gaston simple-stamped

901B-89
1 rim sherd, Townsend (Rappahannock Fabric Impressed) like, plain rim w/double punctuations to interior lip, ferric coarse sand/hematite temper additives (?) or natural to clay source
1 sherd, atypical Townsend (Rappahannock Fabric Impressed) like, w/minor shell, gritty paste

901B-90
1 sherd, atypical Townsend (Rappahannock Fabric Impressed) like, with ferric coarse sand temper
1 sherd, untyped aboriginal, shell temper, w/possible traces of simple stamping perhaps associated w/Roanoke simple-stamped

901B-92
1 sherd, untyped aboriginal, with gritty paste showing eroded rounded temper particle impressions

901B-93
2 sherds Gaston simple-stamped

901B-94
1 sherd, untyped aboriginal, associated w/Roanoke War (Roanoke Plain or surface near rim), possible plain rim
4 sherds Gaston simple-stamped

901B-95
1 sherd, untyped aboriginal, with gritty paste showing eroded rounded temper particle impressions

901B-96
1 sherd, atypical Townsend (Rappahannock Fabric Impressed) like, w/minor shell, gritty paste

901B-97
1 sherd, atypical Townsend (Rappahannock Fabric Impressed) like, with ferric coarse sand temper
1 sherd, untyped aboriginal, shell temper, w/possible traces of simple stamping perhaps associated w/Roanoke simple-stamped

901B-104
3 flakes, quartzite

901B-112
1 sherd Gaston simple-stamped

901B-124
1 sherd Gaston simple-stamped

901B-135
1 flake, fine grained quartzite (almost quartz)

901B-136
1 sherd Gaston simple-stamped

901B-137
1 untyped aboriginal sherd, rare crushed quartz temper and obscure surface

44PG300/901C

901C-3
1 sherd, untyped aboriginal, fabric-pressed surface, w/gritty paste, otherwise similar to Townsend (Rappahannock Fabric Impressed)
1 flake, gray quartzite

519

44PG302 ARTIFACT INVENTORY

11  17th century English female burial,
11-4 Upper burial shaft fill
    1 fire-cracked rock
11-9 Upper burial shaft fill
    3 fire-cracked rock

44PG303 ARTIFACT INVENTORY

Surface Collections

SC-2: General Surface:
    3 sherds Gaston Simple Stamped
    1 rim sherd Cashie Simple Stamped, sand-tempered, surface, assoc. w/ Gaston
      (water worn surface, plain rim)
    1 sherd untyped aboriginal, plain or worn surface, sand-tempered
    1 sherd untyped aboriginal, crushed quartz temper, unidentifiable surface

SC-3: General Surface
    1 Native American or Colono pipe stem, buff earthenware, sand temper no
    surface treatment

SC-4: North half of Site "Topsoil" (Plowzone)
    1 triangular projectile point, white quartz, assoc. w/ Roanoke Large Triangular
    and Clarkesville Small Triangular, size ranges, isosceles form with a
    slightly concave base, length 2.3 cm., width 1.5 cm. (small corner
    break present)

SC-6: North Half of Site Scraping
    1 fire-cracked rock

SC-8: General Site Scraping and pan
    1 broken biface/preform, white quartz, w/ approx. medial lateral snap

SC-9
    1 broken biface, quartzite, thin piece appears finished, with two parallel lateral
    snaps isolating find

SC-10
    1 utilized flake, quartzite, w/ one unifacial edge (may also pertain to stage of
    lithic production)
SC-11: South Half of Site Scraping
1 basal sherd Gaston Simple Stamped, probably a small vessel

SC-12: South Half of Site Scraping
1 broken biface/preform, quartzite, with high medial ridge

SC-13: North Half of Site Scraping
1 broken crude biface, quartzite, made from a spall, approx. stage 1 reject
1 broken tested cobble, red quartzite w/ red jasper or very fine grained quartz
7 decortification flakes, quartzite (mostly large)
9 flakes, quartzite (mostly large)

SC-28
1 broken biface/preform, quartzite, with medial lateral snap
1 broken biface, quartzite, tapering, appears finished, w/ approx. medial and distal (?) lateral snaps

SC-31
1 triangular preform or projectile point, untyped white quartz, retains high medial ridge w/areas of rough flaking, concave base, distal lateral snap

Native American Structure 16

All designations below Native American Postmolds:
16-AA 5 sherds Roanoke Simple Stamped, very small
       6 small and tiny sherds untyped aboriginal, shell-tempered, w/ obscured surfaces, almost certainly Roanoke Simple Stamped as above

16-AAA 1 sherd untyped aboriginal, shell temper, unidentified surface appears to be fabric-impressed (Roanoke Fabric Impressed?)

16-CCC 1 sherd untyped aboriginal, w/ probable distorted fine wicker fabric surface impression, coarse sand temper

16-B3 1 sherd Gaston Simple Stamped

16-C 1 sherd Gaston Simple Stamped

16-D 1 flake quartzite
       1 sherd untyped aboriginal, fine fabric wicker impression, low amount crushed quartz temper (Cashie/Gaston)

16-D3 1 decortification flake, quartzite (also heated?)

16-DDD 1 sherd Townsend: Rappahannock Fabric Incised, with incising including two
parallel horizontal incisions linked by two parallel angled incisions

16-E2  1 flake, white quartz

16-F  1 sherd untyped aboriginal, w/ fine sand temper and probable obscured fine wicker fabric impression

16-FFF  1 sherd untyped aboriginal, crushed quartz and rounded coarse sand temper, obscure surface (Gaston ?)

16-G3  1 sherd untyped aboriginal, w/ shell temper, plain or obscured surface

16-H2  1 sherd Gaston Simple Stamped

16-H3  1 tiny ceramic sherd, aboriginal, w/ shell temper

16-HH  1 ceramic nerd (aboriginal), quartz sand and shell (?) temper

16-I2-1  1 flake, quartzite
  1 sherd untyped aboriginal, w/ crushed and rounded quartz temper, obscured surface, almost certainly Gaston

16-K  1 sherd Gaston Simple Stamped

16-K3  1 sherd untyped aboriginal, w/ shell (?) and fine sand temper worn or plain surface, thin: from a small vessel

16-Q  1 flake, white quartz

16-S  1 sherd untyped aboriginal, crushed quartz temper, eroded or smoothed surface, probable Gaston assoc.

16-T  1 sherd Roanoke Plain, small
  1 tiny ceramic sherd, unidentifiable

16-T3  1 small flake, quartzite

16-W3  1 small flake, quartzite

16-WW  1 decortification flake, quartzite w/ vein quartz

16-XX  1 sherd untyped aboriginal, shell, crushed and rounded quartz temper, smooth swiped surface over simple stamping (?)
  1 sherd untyped aboriginal, minor shell (?) and ferric sand-tempered,
smoothed or worn surface

16-YY 1 sherd untyped aboriginal, coarse sand temper, unident. surface
1 sherd Roanoke Simple Stamped, thin body from small vessel, low shell temper count w/ sandy paste

Native American Structure 17
All designations below Native American Postmold fill:

17-A 1 fire-cracked rock, or shatter decortification flake, quartzite
17-P 1 sherd untyped aboriginal, crushed quartz temper, smoothed surface, almost certainly Gaston

Native American Structure 18
All designations below Native American Postmold Fill:

18-MM 1 sherd Gaston Simple Stamped
18-SS: Native American Postmold (unclearly associated with structure’s interior, not labelled on this report’s illustration)
  1 sherd Gaston Simple Stamped
18-TT: Native American Postmold (unclearly associated with structures interior, not labelled on this report’s illustration as labelled)
  1 sherd untyped aboriginal, with traces of fine fabric wicker on surface?, fine sand and shell (?) temper
  1 sherd untyped aboriginal, pebbled surface, sand temper
18-TT2 Native American Postmold (unclearly assoc. with structures interior, not shown on this report’s illustration as labelled)
  1 shattered pebble fragment, quartzite
18-Y 4 sherds Gaston Simple Stamped, relatively thin body sherds all from the same small vessel, almost no curvature to sherds, from tray?
Feature 19: Posthole

19-B 1 sherd untyped aboriginal w/ obscured surface (distorted fabric?) and fine sand temper

Feature 20: Posthole

20-B 1 decortification flake, white quartz
20-B2 1 fragment of burned clay or daub

Feature 22: Posthole

22-A: Postmold
1 sherd Gaston Simple Stamped, swiped over
1 sherd Roanoke Simple Stamped
1 tiny ceramic sherd, shell-tempered

22-A2: Postmold
1 fragment of water rounded burned clay or ferric clay nodule

Feature 23: Historic Fenceline

23-A: Postmold
1 sherd untyped aboriginal, water worn, fine sand temper, obscure/damaged surface treatment
1 fragment of broken biface/uniface, white quartz, small and tapered with longitudinal uncontrolled break opposite a bifacial edge, rather than a utilized flake it is probably a broken finished knife or projectile point

23-B: Posthole
2 flakes, quartzite, one perhaps decortification

23-B2 1 sherd Gaston Simple Stamped
2 unidentifiable aboriginal sherds, one w/ shell (?) and one crushed quartz temper

23-B3: Posthole
12 fragments poorly fired brick, or more likely burned clay
1 sherd Cashie Simple Stamped w/ traces of simple stamped surface, fine sand temper
2 sherds untyped aboriginal one w/ crushed quartz temper, one w/ fine sand
temper, unidentifiable surfaces

Feature 24: Historic Fenceline

24-B 1 sherd untyped aboriginal, with highly eroded surface exposing fine coarse sand temper, surface retains traces of simple stamping (assoc. w/ Gaston?)

Feature 25: Historic Fenceline

25-C 6 small fragments of burned clay or ferric clay nodule(s)

Feature 26: Possible Pit

26-B 1 sherd Gaston Simple Stamped

Feature 28: Possible Pit

28 1 sherd Roanoke Simple Stamped (some temper looks like vitrified limestone, thus shell from oyster or marl?)

Feature 29: Possible Pit

29-A 1 flake, quartzite

Feature 33: Native American Longhouse

All designation below Native American postmold fill:

33-C 1 sherd untyped aboriginal, crushed quartz temper, unidentifiable surface, almost certainly Gaston/Cashie

33-NN 1 sherd untyped aboriginal, fine sand (and shell?) tempered, scraped or lab scubbed surface treatment

33-X 1 sherd untyped aboriginal, fine sand and some shell temper, obscure surface treatment

33-Z 1 sherd Roanoke Simple Stamped
1 sherd untyped aboriginal, shell-tempered, probably associated w/above Roanoke Simple Stamped vessel
Feature 34: Native American Structure
All designations below Native American postmold fill:

34-BB  4 small fragments of burned clay or ferric clay nodules
34-C  1 sherd atypical Townsend: Rap. Fabric Imp., with crushed quartz temper
34-F  2 sherds Gaston Simple Stamped
34-G  1 sherd Gaston Simple Stamped
34-P  1 sherd Roanoke Simple Stamped, small: majority of surface plain
34-GG 1 sherd Gaston Simple Stamped
34-MM 1 sherd Roanoke Plain, small: other surface treat. elsewhere?
34-RR 2 tiny unidentifiable ceramic sherds, shell-tempered
34-WW 1 sherd untyped aboriginal, w/ crushed quartz temper, clear plain scraped surface perhaps near lip, assoc. w/ Gaston/Cashie?
34-X  1 sherd Gaston Simple Stamped, thin body sherd from smaller vessel

Feature 35: Native American Structure
All designations below Native American postmold fill:

35-G  1 sherd Gaston Simple Stamped
35-M  2 sherds untyped aboriginal, w/ shell temper, obscured surfaces
35-R  1 unidentifiable aboriginal sherd, w/ eroded irregular temper particles typical of Gaston, obscure surface
1 unidentifiable fragment of burned clay or highly eroded aboriginal ceramic
35-T  1 sherd Gaston Simple Stamped
3 sherds untyped aboriginal, w/ Gaston like temper, smoothed or obscured surfaces
1 fragment of burned clay or waterworn ceramic sherd, perhaps w/eroded large rounded temper particles, otherwise fine sand-tempered?, eroded surface
35-V  1 sherd untyped aboriginal, shell temper, obscured surface
Feature 36: Native American Structure
All designations below except where noted Native American postmold fill:

36: Surface cleaning within structure
1 sherd Gaston Simple Stamped

36-HH 1 shatter flake, white quartz

36-M 1 sherd untyped aboriginal, fine sand and well-crushed shell-tempered (?), obscure surface

36-P 1 tiny aboriginal ceramic sherd, tempered with fine sand

36-Q 1 decortification flake, white quartz

36-Y 1 sherd Gaston Simple Stamped

36-MM 1 rim sherd untyped aboriginal, lip is nicked, deliberate pinched and smoothed bulge below, tempered with fine sand and well crushed quartz, probably assoc. w/ Gaston

Feature 37: Native American Structure
All designations below except where noted Native American postmold fill:

37: Surface cleaning within structure
1 sherd Gaston/Cashie w/ scraped or brushed surface probably over simple stamping

37-BB 2 sherds untyped aboriginal, tempered with fine sand (also well crushed shell?), slightly pebbled surface is stamped or incised with a toothed stick w/ flat contact edge creating parallel bands w/ parallel interior bands, body sherds are thin suggesting a small vessel

37-J 1 small shatter flake, white quartz

37-II 1 sherd Gaston Simple Stamped, reduced ammt. temper, sandy paste (Cashie tradition?)

Feature 38: Native American Structure

38-K 2 sherds untyped aboriginal, with fine quartz and ferric sand temper, obscured surface is probably fine wicker fabric impressed (Cashie Fabric?)
1 unidentifiable tiny aboriginal ceramic sherd

38-M 1 sherd Gaston Simple Stamped
1 unidentifiable aboriginal ceramic sherd

38-MM 1 sherd Roanoke Plain

38-P 1 sherd Gaston Simple Stamped, swiped over

38-NN 1 sherd Gaston Simple Stamped
SC-10 1 large rounded cobble, quartzite (not cultural)
SC-72 1 large rounded cobble with old dished and water worn geological break to one upper surface, quartzite (not cultural)
1 thin sheet copper frontlet remnant (fragile retained at VDHR)
1 large scale of organic material preserved by copper salts directly below associated copper frontlet, substance unidentified, thought to be leather backing to frontlet or simply remains of human skin from forehead 1 sample of fragmentary leather (?) black and organic, associated with frontlet, one fragment 0.55 cm thick
1 rolled copper tube bead fragment, much reduced by corrosion, currently largest piece 0.8 cm long, diameter at least 0.35 cm., scaly deposits may suggest more than one bead was here (?); ("bead 1" piece plot reference on drawing)
2 fragmentary rolled copper tube beads, fused together, minimum length largest fragment 0.78 cm., minimum width both beads approx. 0.28 cm. ("bead 2" piece plot reference on drawing)
1 large sample organic material preserved with copper salts associated with "bead 2" copper tube bead group (2)
1 sample of possible red ochre, from east end of pit at bottom of same (in foil)
1 Carbon 14 sample (in foil, not processed)
1 fragment of a broken and perhaps burned sandstone pebble
61 flakes, quartzite
2 flakes, unknown grey grainy rock material, rhyolite?
2 decortification flakes, quartzite
1 decortification flake or shatter flake, quartz
1 flake, quartz
1 small fragment of heat stressed quartz
1 factured quartz crystal pebble
1 fragment of scaled bog iron or less likely iron sheet
2 fragments of burned soapstone or steatite
1 broken biface, quartzite, lateral snap
1 broken biface, quartzite, broken along medial ridge once an asymmetrical diamond shape, hinged break
1 probable distal section biface, quartzite, broad parent blade
12 fire-cracked rocks
1 fragment of tabular quartzite with black mineral stains or deposits (body fats?), heat stressed?, has sharp breaks
333/1B Burial Fill (abstracted from field notes M.E.N. Hodges, 1989)
2 sherds Townsend Series: Rappahannock Fabric Impressed Ware
1 charcoal and carbonized organic remain sample
2 (or more) flakes, quartzite

Plate 23. Bone fan blades.
Plate 25. Francis Poythress wine bottle.
Plate 26. Archaic Projectile Points and Blades from 44PG151 and 44PG300.

Row One (top row; left to right): (1) 44PG151/1, Kirk Corner-Notched, tan quartzite; Morrow Mountain I (2 examples); (2) 44PG151/32/14F, brown quartzite; (3) 44PG151/8C, pink and tan quartzite; Morrow Mountain II (2 examples); (4) 44PG300/1D-108, pink and grayish tan quartzite; (5) 44PG300/SC-18, pinkish brown quartzite.

Row Two (3rd): Savannah River Stemmed (entire row): (1) 44PG151/3F, gray/tan quartzite; (2) 44PG300/900B-39, pinkish gray quartzite; (3) 44PG151/2/2P, gray quartzite; (4) 44PG151/32/15B whitish gray quartzite.

Row Three (1st): (1) 44PG300/1D-108, Bute Island style haft on an exhausted blade perhaps last used as a knife (see Ritchie 1971:14.15), tan quartzite; (2) 44PG151/32/14A, Untyped, similar to small Savannah River Variety or Bute Island with a straight (one side) or slighty expanding stem (opposite side), tan quartzite; (3) 44PG300/SC-116, Untyped and perhaps unfinished blade (the high medial ridge in distal zone is not removed and stem is possibly not complete), in present form it is most similar to the Popular Island type (Ritchie 1971:44.45), tan quartzite; (4) 44PG151/4K, Orient Fishtail (Ritchie 1971:39-40), tan quartzite; (5) 44PG151/3N, point in rough condition but almost certainly of the distinctive Penkomen Broad form (Ritchie 1971:42-43), white quartz encrusted with mineral salts.
Plate 27. Terminal Archaic to Contact Period Projectile Points from 44PG151 and 44PG300.

Row One (top row, left to right): (1) 44PG151/32/15B, Brewerton Side-Notched, black chert; (2) 44PG300 1D-107, Vernon, white quartz; (3) 44PG151/5/1D, Lamoka, white quartz; (4) 44PG151/2F, Picataway, tan quartzite.

Row Two (l-r): (1) 44PG300/1D-109, Rossville or "Tear Drop Shaped", tan quartzite; (2) 44PG151/34R; Madison/Clements, tan quartzite.

Row Three (l-r): (1) 44PG151/1-11, Clements or Exhausted Madison, tan quartzite; (2) 44PG300/53B-82, Clements/Uwharrie like, tan quartzite; (3) 44PG300/53A-15, Levana, grey/white quartz; (4) 44PG151/10B Clements/Madison, white quartz.

Row Four (l-r): (1) 44PG300/53B-199, Caraway, white quartz; (2) 44PG300/SC-4, Caraway, grey/white quartz; (3) 44PG300/199C-2, Clarksville Small Triangular, white quartz; (4) 44PG300/53B-332, Clarksville Small Triangular/Gaston (finely serrated and nearly totally exhausted), white quartz; (5) 44PG300/53B-136, Untyped Small Triangular (superficially similar to Clarksville, but roughly flaked and relatively thick, perhaps an unfinished or Historic projectile during the collapse of lithic technology), brown chert (or less likely ballast grade flint); (6) 44PG151/5/3F, Randolph Stemmed, brown chert.
Upper Left: 44PG151/2/3N, Hammer/Abrading Stone, battered and abraded tan quartzite.

Upper Right: 44PG151/32/14A, Double Bitted Chisel, pecked and ground basalt.

Lower Left: 44PG300/53B-212, Polishing Stone (broken, with polished edge up and facing camera). The working edge has a very fine polish from use wear on an unknown apparently relatively soft surface, gray silicified slate.

Lower Right: 44PG151/28-2D, Fully Grooved Ax or Adze (with symmetrical bit), pecked and ground tan quartzite.
Plate 29. Artifacts associated with Burial 44PG151/44.

Left: 44A-1, Stanley Stemmed Projectile Point, ca. 5,000 B.C. (Coe 1964:35-36, 121-122), tan quartzite. The blade has been carefully reworked exaggerating the stem size.

Center: 44A-2, Broken Miocene Shark's Tooth (extinct Carcharodon species).

Note: All items above were piece plotted in close association with a human right radius and ulna and may be observed on the appropriate plan drawing included in this report. Also found in this specific zone was an apparent non-human mammal bone and a smaller triangular projectile point. See text for additional information.
Plate 30. Middle Woodland to Protohistoric/Contact Ceramics from 44PG151 and 44PG300.
MIDDLE WOODLAND TO PROTO-HISTORIC OR CONTACT
NATIVE AMERICAN CERAMICS

Note: All rows noted below should be read from left to right. For comparative purposes, certain ceramic
types are internally clustered horizontally or vertically within the arbitrary row format. When present,
all rims are facing up or towards the top of the plate.

Row One (top row): (1) 44PG300/53B-356, Prince George Plain rim, decorated with circular
punctations; (2) 44PG151/36A, Varina Net-Impressed body sherd; (3) 44PG151/34D, Untyped body
sherd, worn surface with surviving clear impressions of a bifurcated mark (superficially resembling a
corn cob impression, but specifically not corn cob impressed [personal communication, Mary Ellen
Hodges, 1995]).

Row Two: (1) 44PG151/2/2C, Cashie Fabric-Impressed rim sherd (sand tempered); (2) 44PG300/901B-
90, Cashie Fabric-Impressed rim sherd, the compressed inner lip is shallowly decorated with two rows
of punctations (fine sand tempered); (3) 44PG300/900B-3, Townsend series Rappahannock Fabric-Impressed rim sherd. The rim is deeply
nicked with individual marks from a rounded dowel producing a somewhat scalloped edge (finely
crushed shell temper).

Row Three: (1) 44PG151/13D, Cashie Fabric-Impressed rim sherd (sand tempered); (2)
44PG303/16DDD, Cashie Fabric-Impressed and incised body sherd (from a post mold in the King’s
House or Temple), sand tempered; (3) 44PG300/900B-3, Townsend series Rappahannock Fabric-
Impressed rim sherd, this sherd may be from the same vessel as Row Two (#3) above.

Row Four: (1) 44PG151/13D Cashie Fabric-Impressed body sherd (with clear evidence of crushed
quartz and coarse rounded sand temper); (2) 44PG151/28/2G, Cashie Fabric-Impressed and incised
body sherd (fine sand natural to clay source? with one eroded coarse sand temper particle evident); (3)
44PG151/28-20, Townsend series Rappahanock Fabric Impressed body sherd (with abundant shell
temper).

Row Five: (1) 44PG300/1C-124, Cashie/Gaston Simple Stamped rim sherd (tempered with rounded
course sand and crushed quartz); (2) 44PG151/508, Cashie Simple Stamped rim sherd (with paddle
pressed rim and course sand temper); (3) 44PG151/3J, Gaston Simple Stamped rim sherd (the well
compressed folded rim is marked with groups of three diagonal reversed V shaped punctations below
a paddle impressed rim and it is tempered with course sand and crushed quartz); (4) 44PG151/4H,
Gaston Simple Stamped rim sherd, the lip has been folded and decorated with diagonal impressions of
a flattened dowel or reed pressed into the surface from the side (with primarily crushed quartz temper).

Row Six: (1) 44PG300/1B-385, Cashie Simple Stamped rim sherd, the rim is paddle impressed and the
inner lip decorated with rows of slightly bifurcated punctations (coarse sand tempered); (2)
44PG300/52F-21, Cashie Simple Stamped rim sherd. The vessel walls are recurved and the lip is
paddle impressed. The lower exterior surface shows evidence of finger swiping which has eliminated
the surface impressions here. Minimal coarse sand temper has been added to a gritty clay paste. Firing
may have fractured some sand particles; (3) 44PG151/34A, Gaston Simple Stamped rim sherd (crushed
quartz tempered). The lip has been padded, and traces of oblique diagonal punctations are evident;
(4) 44PG151/3J, Gaston Simple Stamped rim sherd (tempered with crushed quartz with some angular
course sand). The lip has been folded and well compressed.
Plate 31. Miscellaneous Native American Artifacts.
MISCELLANEOUS NATIVE AMERICAN CERAMICS INCLUDING:
REMAINING PROTO-HISTORIC WARES,
HYPOTHETICAL CONTACT AND EARLY HISTORIC FINDS,
COMPARATIVE COLONOWARE FINDS, AND SMOKING RELATED FINDS

NOTE: All rows noted below are to be read left to right. Comparative organization may be observed horizontally or vertically but can only be clarified within a simple row organization within these sequential linear captions.

Row One (top row): (1) 44PG151/4B, Roanoke Simple Stamped rim sherd; (2) 44PG300/13B-10, Roanoke Plain body sherd. The surface has been smoothed to the point that it will reflect light, but it has not been burnished. The rim is smooth and has been pushed to the exterior creating a slight protrusion or thickening evident in profile view. The surface has not been slipped prior to firing allowing eroded temper particles to be exposed on the surface; (3) 44PG300/801A-24, Roanoke Plain body sherd from a thin walled vessel. The surface has been polished while the vessel was leather hard to the point that it will reflect light. A few eroded shell temper particles are evident on the surface.

Row Two: (1) 44PG300/137B-33, Gaston/Cashie Simple Stamped body sherd (tempered with crushed quartz and coarse sand). The surface treatment of simple stamps has been smoothed greatly reducing the ridges and valleys thus created. Since no fine lines of finger swiping (finger print lines) are evident this was done with an unknown tool. (2) 44PG151/28E Gaston Simple Stamped rim sherd (tempered with finely crushed quartz). The thin walled vessel has been finely burnished with a small instrument while in leather hard condition to the point that it will reflect light. Despite this the characteristic streaks of simple stamping are still evident. Almost no temper particles are evident on the surface. The lip is well squared with only a minor expansion to the exterior. (3) 44PG151/3F, Colono Ware body sherd. The surface is not burnished, thus the surface scraping lines are still evident. Tempered with fine and coarse sand some of which shows on the surface.

Row Three: (1) 44PG151/13D, Colono Ware, with un-burnished surface and sand temper. (2) 44PG151/17B, Untyped rim sherd from a thin walled vessel tempered with fine quartz sand. Apparent plain surface treatment (although several narrow streaks are evident). Tempering particles are evident on surface. The lip is narrowed and slightly protrudes towards the exterior. (3) 44PG300/53B-434, Untyped rim sherd with buff colored body. The fine sand temper may be natural to the clay source. The surface is smoothed and the thick lip shows a more or less continuous rounded curve. This might be historic Native American or burned Colono though there is no later occupation at 44PG300 currently known to the author.

Row Four (lower right only): (1) 44PG300/SC-3, Native American Pipe stem fragment, with a plain unburnished surface, buff colored body, and fine sand temper. (2) 44PG300/532-124, Historic Native American or "Colono" pipe bowl fragment. The find has a buff colored body with fine sand temper (or naturally gritty "pipe clay" paste). The surface is well burnished with a narrow tool.

OSTEOLOGICAL EXAMINATION
OF SEVENTEENTH CENTURY BURIALS FROM
JORDAN’S POINT, PRINCE GEORGE’S COUNTY, VIRGINIA

Douglas W. Owsley, Kim M. Lanphear, and Bertita E. Compton
Department of Anthropology
National Museum of Natural History
Smithsonian Institution
Washington, DC 20560

BACKGROUND

Early in 1990, bones from 12 human burials excavated during summer 1989 and in January and April 1990 at Jordan’s Point, Prince George’s County, Virginia, were sent to the Division of Physical Anthropology, Smithsonian National Museum of Natural History, for analysis. The burials consisted of four groups, which are described in the archaeological field notes of Mr. Charles T. Hodges.
"At 44PG300, three discrete burial clusters have been recorded.... One cluster...consists of Feature 308, a subadult burial, Feature 309, a large, adult male, and Feature 117, a probable adult burial...." A second cluster "consists of a tight but poorly oriented group of grave shafts, and includes five adults and one infant burial." Burials making up this cluster are 191, 192, 193, 263, 264, and 1001. The infant burial, 192, was beside and only two feet away from Burial 191, who was presumed to have been an adult female. Hodges’s notes state: "The skeletal remains were in poor condition...body stain and remnant bone molds.... The pelvis was broad and deep and arched in marked contrast to the others...." It was concluded, therefore, "that the individual represented is a post-adolescent female." As Burial 192 (the infant) was little more than an outline, it was removed en bloc for laboratory analysis. It was not sent to the Smithsonian Institution with the crania and long bones of the other five burials in this cluster (there being only organic stain and no bone), thus it is not included in the data presented in this report. Burials 193, 263, 264, and 1001 were presumed to be adults, and Burial 1001, because of overall size and the shape of the jaw, is likely to have been male. Just below the mandible of Burial 263 were traces of material stitched with silver thread, suggesting to the excavators the presence of a collar. Further, a line of staining extending from the area between the proximal femora to below the distal terminus of the pelvis was thought to be the lower portion of a doublet (a man’s
closefitting jacket). These finds led to the assumption that Burial 263 was also male and probably of high social status. Because of the extremely poor preservation of all burials in this second cluster, the excavators' conclusions about them were tentative. Only the crania and some of the long bones--principally femora--of the burials in the second cluster at this site were sent to the Smithsonian Institution, the rest of the remains being too friable for osteological analysis.

The third cluster at Site 44PG300 was more than 100 feet east southeast of the other two clusters and consisted of a pair of parallel graves, Features 291 and 292. Both were thought to be adults, and Burial 292, probably female. Muster records together with artifacts from burial fill at 44PG300 suggested that the burials dated from the first quarter, or the beginning of the second quarter, of the seventeenth century.

In addition, two burials, Features 10 and 11, were salvaged in January 1990 from a location designated 44PG302, which was several thousand feet from 44PG300, near the west side of Jordan's Point. A number of sites representing different periods of time had been located in this area previously. This situation, plus the paucity of diagnostic artifacts in the grave and coffin shafts, complicated the dating of these two burials. A pipestem having a bore diameter of 7/64 of an inch and handwrought nails found at the site could date anywhere from AD 1620 to 1710; Hodges's field notes suggest the second half of the
seventeenth century, or the first quarter of the eighteenth, as the likely period of burial. Both burials were presumed to be adults.

The Smithsonian anthropologists found all the remains to be extremely friable. Most were powdery and fragmented--too fragile to be removed from the clay that encased them, or, if removed, to be sufficiently cleaned and stabilized for detailed analysis. In many cases, there was, in fact, no bone present to separate from the clay, only a stain or so-called "ghost." Burial 44PG300-309 yielded more bone for examination than did the other burials. The femoral heads and diaphyses, the humeri, part of the upper thorax, and much of the cranium could be at least partially extracted from the surrounding soil. The femora, though broken, were in large pieces that could be cleaned.

The objectives of the Smithsonian group's analysis of the skeletal remains were to determine age, sex, race, and disease, if present. The poor condition of the bones, especially of those from the five burials in the second cluster at 44PG300, limited the amount of data that could be obtained. With the exception of Burial 44PG300-309, the best preserved of the 12, the analysis was based principally on dentition.
The initial step in analyzing the skeletal remains was to fill out an inventory form for each burial. The coding format, designed for computer analysis, provides a comprehensive inventory of the entire skeleton. Each skeletal element is scored as complete or partial. Additional forms bring together data on the characteristics used to determine age, sex, and race. In the case of these skeletons, there were few data to record on the bone inventory forms.

The dental inventory provides a format for recording data on the presence or absence of maxillary and mandibular incisors, canines, premolars, and molars, the incidence and location of carious lesions (cavities), the occurrence and nature of alveolar abscessing, the presence of artificial abrasions, the presence and degree of calculus, and other characteristics. Dental data are particularly useful in determining age and providing clues to many aspects of health and adaptation. Frequency and patterns of dental caries, for example, tell much about diet. (For a more detailed discussion of the use of the dental and bone inventories employed in this study and of the types of data they yield, see Owsley and Jantz [1989]).
With so small a number of skeletal remains and so few data to be derived from them because of the poor state of preservation, no computer analysis was performed. Instead, several tables were sufficient to summarize the findings, with supplementary descriptions of special conditions that were observed.

FINDINGS

Table 1, based on data recorded in the bone and dental inventories, summarizes the results of the analysis of the 12 burials from Jordan’s Point sites 44PG300 and 44PG302. The burial cluster consisting of 309, 308, and 117 at Site 44PG300 included a large male, aged 25-35 years (Burial 309), a child, possibly female (Burial 308), and a young female of 16 to 22 years of age (Burial 117). The mastoid process and supramastoid crest, the absence of a prominent external occipital crest, and the very small teeth indicated that Burial 117 was female. It was not possible to establish the race of the child (Burial 308), but the two adults were white.

In the second cluster of five at 44PG300, Burial 191 was a white female, 20 to 29 years of age. The attribution of female was based on the size of the mastoid process, shape and size of the mandible, and overall size of the femora. The organic stain, which was all that remained of the pelvis and that had led the

excavators to assume the individual was female, was not sent to the Smithsonian Institution, thus could not be taken into consideration in analysis of Burial 191 and designation of the individual as female.

Burial 193 was judged to be a female between the ages of 25 and 35 years, probably white. The size of the femur and lack of a pronounced occipital protuberance were the main bases for the designation as female. Burial 263, probably also female and probably white, was somewhat younger than Burial 193, being in the 20 to 24 year age range. The size of the femur at midshaft and the very small teeth suggested that the individual was female. Artifacts in this burial (the silver thread stitching at the neck and traces of a doublet), as mentioned in the preceding section, had led the excavators to assume that the individual was possibly male. With virtually no bone present for detailed analysis, the one measurement that suggested that the individual could be female might be an anomaly. Burial 264 was in the same age range as Burial 193, that is, 25 to 35, was white, as indicated by nasal shape, morphology of the nasal sill, and dental morphology, and was female. Sex determination was based on the diameter of the femur, cross-sections (diameters and cortical thickness) of the radius and ulna, the supramastoid crest of the temporal bone, the supraorbital margin and torus, and the shape of the mandible. The fifth burial of the cluster, Burial 1001, was the oldest of all the individuals buried at 44PG300 and 44PG302, being in the 35 to 45 year age range. This individual
was a small male and was probably white. The male designation was based principally on overall size of the postcrania, together with mandibular size and shape, size of mastoid process, presence of a pronounced external occipital protuberance, mental eminence, and supraorbital torus.

Of nearby Burials 291 and 292 at the same site, one was a female more than 30 years of age, and the other, an adolescent 14.5 to 16.5 years old for whom sex could not be determined. Both were white. The length of the clavicle, size of the femur, and small teeth were the indicators of female sex for Burial 291; the absence of a pronounced external occipital protuberance and the gonial angle of the mandible were the indicators for Burial 292. The age of this individual was determined using the dental calcification standards of Moorrees, Fanning and Hunt (1963). Root development of the third molar was nearly (75%) complete.

The more distant third set of burials, 10 and 11 at Site 44PG302, were both white females, one between the ages of 25 and 34, the other, 20 to 24 years old. For Burial 10, the size of the postcrania, the greater sciatic notch, and ten characteristics of the skull (mastoid process and supramastoid crest, supraorbital torus and margin, mandibular shape and size, mental eminence, external occipital protuberance, and cranial shape and size) all indicated female. In the case of Burial 11, there were fewer features of the skull to assess, but all four (mental
eminence, mandibular shape and size, and absence of a developed external occipital protuberance) suggested female, as did the size of the femora.

Data on the incidence of carious lesions and of alveolar abscessing for all but the child, who will be discussed separately, appear in Tables 2 and 3, respectively. As Table 2 shows, the greatest incidence of dental caries occurred in Burials 10 (10 carious teeth) and 291 (8 carious teeth). Burials 309, 193, 263, and 1001 had no caries, and Burials 264 and 11 each had only one carious tooth.

The individual represented by Burial 291 not only had a number of carious teeth but also had experienced alveolar abscessing of three mandibular premolars and five mandibular molars, as well as the loss of two maxillary premolars from the same cause (see Table 3). Burial 10 had lost three mandibular molars and one mandibular premolar from abscessing, and Burial 11 had lost two mandibular premolars, with the alveolar bone sockets completely resorbed.

The right and left maxillary central incisors of Burial 10 showed unusual interproximal grooves, which were examined microscopically. The notches are present on both the mesial and distal surfaces of both maxillary central incisors. They appear to be intentional, not developmental or naturally caused. The grooves originate on the buccal surface, with the interproximal/lingual surface being less affected.

Such grooves would not result from running a threadlike substance or object through the opening, in which case the lingual side would also be affected. Rather, these grooves would result from insertion of an object from the labial side. If Burial 10 was a seamstress who often did fittings while holding pins in her teeth, this kind of grooving could result. Figures 1-3 illustrate the results of Scanning Electron microscopic examination and show the location and morphology of these grooves.

Table 4 presents data on the incidence of enamel hypoplasia by tooth type for the 11 individuals (excluding the child, Burial 308) buried at Jordan's Point. Enamel hypoplasia is visible as depressed lines, or lines of pits, that occur when enamel deposition is slowed or halted during a period of stress in the first seven years of life. Enamel hypoplasia is generally agreed to be the result of chronic periods of poor nutrition and/or disease stress associated with high fever (Cook and Buikstra 1979, Goodman and Armelagos 1985a). By measuring the location of each line relative to the cementoenamel junction, the approximate age at the time of stress occurrence can be determined (Goodman and Armelagos 1985b).

All the teeth of the 11 individuals were examined for evidence of enamel hypoplasia. Because the archaeological site dates from approximately AD 1624 to 1700, it afforded a good opportunity to study the incidence of childhood stress among an early group of American colonists.

Before being examined, the teeth were prepared by cleaning with water and a soft brush. Calculus was removed when necessary. Each tooth was then examined macroscopically for evidence of linear enamel hypoplasia that traversed the labial or buccal tooth surface. Both continuous lines and lines of pits were measured. Single pits were recorded but are not included in this analysis. Only palpable lines that could be viewed with the unaided eye were counted. The distance from the cementoenamel junction to the center of each hypoplastic line was measured using a needle-tip Helios dial caliper.

Of the 260 teeth presented for examination, ten were badly chipped or broken and could not be examined for hypoplasia. Of the 250 remaining teeth, 30 (12.0%) displayed evidence of at least one hypoplastic event. This number is shown in relation to tooth type in Table 4.

Nine (81.8%) of the 11 individuals examined had at least one enamel hypoplastic line. Only two individuals had teeth that displayed more than one event. It appears, therefore, that although one childhood stress event was common in this population, multiple events were not.

Figure 4 shows the age at stress for the Jordan’s Point sample. The percent of teeth with hypoplastic lines is shown in figure 5. Peak age at stress is from 3.5 to 4.0 years of age for this group, slightly older than the peak age at stress demonstrated by nineteenth-century U.S. populations (from 2.5 to 3.5 years), and much older than modern groups (usually between
birth and one year of age) (Lanphear 1990). One individual (Burial 292) displayed extreme enamel hypoplasia consisting of wide bands of thinned enamel on the maxillary central, mandibular central, and right lateral mandibular incisors. The measurement of these defects indicated an extreme stress event between six months and one year of age for this individual.

Burial 308, which does not appear in Tables 2 and 3, was a young child. Dentition was mixed permanent and deciduous, and no tooth wear or dental caries were evident. The second permanent molars were only half erupted, with calculus deposits involving half the crown. Tooth size was very small, and all roots were missing. Hypoplasia was present but not pronounced.

In the archaeological field notes, Burial 309 receives particular attention for several reasons. The gabled coffin was six feet long and the skeleton, that of a robust male, had been crammed into it in such a way as to force the clavicles into a roughly 40-degree angle, giving a "shrugged shoulder appearance," and to have tilted the cranium so that the coronal suture was near the coffin nail line (sides of the coffin) and the mandible rested on the sternum, covering the cervical vertebrae. The lower left leg below the patella was missing. The excavators reported the presence of a stain, but they found no bone below it. They considered amputation as a possible explanation.
In the absence of the proximal ends of the tibia and fibula (suggested only, as the field notes state, by traces of white streaks on the matrix), it was not possible to identify any cut-marks or saw marks on any leg bones. Therefore, amputation of the left tibia and fibula remains a hypothesis based on the lower leg bones not having been present when the remains were excavated.

The femora and right tibia of Burial 309 exhibit inflammation and were x-rayed to assess the nature and extent of pathological condition. The entire lengths of these long bones show periosteal new bone (thickened) and increased trabeculation of the medullary cavities. The cortices are nearly smooth in texture and lack cavitation and cloacae. The circumference of the diaphyses is uniform in thickness, and that of the right tibia is irregular and undulating. The left femur shows greater disease involvement than the right. The pattern of osseous involvement suggests that the individual suffered inflammation of the periosteum (periostitis). The joints are free of degenerative joint disease, and the skull exhibits no disease. There is a roughly circular depression in the frontal bone about two inches above the nasal bridge that could reflect a healed lesion or trauma; however, postmortem processes cannot be ruled out. As the bone was too friable to clean for x-ray examination, a conclusion about the nature of this depression cannot be offered. Other long bones were too fragmentary to yield information on disease.
This report presents the information obtained from osteological examination of 12 seventeenth century burials from Jordan's Point. Although the skeletons were poorly preserved, it was possible to determine the age, sex, and race for most of them. The sample included nine females (two identifications are tentative), two males, and one individual of indeterminate sex. Eleven individuals were identified as Caucasian. The age distribution included one child, two teenagers, and nine adults. One infant's burial was located in the field, although extremely poor preservation prevented laboratory analysis. This distribution indicates a high mortality rate and a short average life span. Only two adults were older than 35 years. Because of poor preservation, most of the data reported concerned the dentition, specifically the presence and frequencies of dental caries (11.7% of teeth) and enamel hypoplasia (81.8% of individuals). The femora and right tibia of one man (Burial 309) showed pathological changes caused by severe periosteal inflammation. The excavation record noted possible amputation of the lower leg.

Comparative data on health, bone disease, and cranial and postcranial measurements from other seventeenth century colonial burials are rare (Owsley in press). At the request of I. Noel Hume, J. Lawrence Angel of the Smithsonian Institution visited excavations at Colonial Williamsburg between 1976 and 1982 to ex-
amine the graves of Wolstenholme Towne and other sites in Martin's Hundred (Angel n.d.; Hume 1979). The data are on file in the National Anthropological Archives. Owsley and Mann (1989) examined the skeleton of a young adult male from the Jockey's Neck site (44JC64), James City County, Virginia, and are now analyzing a recently recovered skeleton from Yorktown (44YO466). In all cases except the latter, poor skeletal preservation has hindered the analysis and limited the information that could be recovered.

J. Lawrence Angel's (n.d.) unfinished report on early seventeenth century burials from Carter's Grove in James City County provides several general observations that are noteworthy. His impressions are applicable to Jordan's Point. In particular, Angel was impressed with the "youth" represented in the adult mortality profile and the lack of longevity. With regard to dental pathology, 11 of 15 (73.3%) individuals from Carter's Grove showed varying degrees of enamel hypoplasia, and with only a few exceptions, caries was uncommon and the teeth were "unusually healthy." Later historic populations show dramatic increases in the frequency of dental pathology because of changes in diet and the increased availability of sugar (Lanphear and Owsley n.d.).

The rate of dental attrition was significantly more rapid than today, which Angel (n.d.) attributed, in part, to stone-ground cornmeal. Pipe facets in the anterior dentition from smoking a clay pipe were frequently observed. A pipe facet is present in the dentition of the Yorktown burial. Well-defined
pipe facets are not evident in the Jordan’s Point series, although one case of maxillary interproximal notching is present. This person could well have been a seamstress.

ACKNOWLEDGMENTS

Charles T. Hodges and David K. Hazzard provided background information and supervised excavation of the burials. The Scanning Electron micrographs were taken by Kathleen A. Parker, and the negatives were processed by Jane B. Beck. Robert W. Mann assisted with the osteological analysis.

ABSTRACT

Skeletal remains of two individuals were recovered from two burials at 44PG151. Although the remains were poorly preserved, they appeared to represent two single, primary inhumations, one dating to the Late Woodland/Protohistoric period and the other of undetermined date. These two burials were adults; one (Burial 24) was female and the other (Burial 44) was of indeterminate sex. Faunal and artifactual associations are discussed in terms of their mortuary significance.

INTRODUCTION

The goal of this report is to present an osteological analysis of human remains from two burial features at 44PG151. This site (also known as the Richard Bland site) is located along the southern banks of the James River terrace at Jordan’s Point in Prince George County, Virginia. These features were identified and mapped in 1987 by the James River Institute for Archaeology. At this time, only one of the burials (Burial 24) was bisected and the south half was excavated. After it was determined that this was a Native American burial, it was covered and not fully excavated until April and May of 1990. Burial 44 was also excavated at this time (1990).

Jordan’s Point is a complex multicomponent site area and 44PG151 is predominately known for its historic component. This site is located on property known as Jordan on the James and is currently being privately developed. The 1990 excavations were part of a salvage operation sponsored by the Virginia Department of Historic Resources to remove these human remains before impact by development (Hodges 1990). One burial (Burial 24) likely represents a Late Woodland or Protohistoric (ca. 1450-1620) burial, based on the association of Roanoke Simple Stamped pottery (Hodges 1990). The other burial (Burial 44) is of an undetermined date (no evidence conclusively indicated either a Native American or Historic European association).

Included in this osteological report is an inventory of all identifiable human skeletal remains recovered from these burials. Also presented is a summary of the
biological information which could be learned from these skeletons (age and sex) and the methods used in its determination. Biological and archaeological data are then correlated in order to better understand the mortuary context of these remains. Finally, recommendations for further research are presented.

METHODOLOGY

Preservation of the human skeletal remains from both of these burials was very poor and many skeletal elements were missing. This precluded further washing or cleaning of the bones in the laboratory. Identification of bone elements and anatomical position followed Bass (1987) and White (1991). Comparative skeletal collections at the Radford University Archaeology and Human Osteology Laboratory were also used for bone identification. While it was apparent both individuals were adults (based on bone size), more specific age determinations could not be made.

Sex estimation was possible for the individual in Burial 24 and was based on both visual inspection of the innominate and metric assessment of the postcranial limbs. More specifically, width of sciatic notch and an elevated sacro-iliac articulation were observed and compared to Bass (1987). Also, midshaft circumference of the femur and the circumference at the nutrient foramen of the tibia were measured and compared to standards developed by Black (1978) and Symes and Jantz (1983), respectively, to further define sex.

Due to the fragmentary and incomplete nature of the long bones, reliable stature estimations could not be made. Also, no pathologies were observed, although poor preservation could have obliterated any extant malformations.
Determination of the race of skeletal remains is primarily based on the visual examination and metric measurement of cranial features and bones of the pelvic girdle (innominate, femur and tibia) (St. Hoyme and Iscan 1989). However, the lack of crania and the overall poor bone preservation made race determination using the skeletal remains impossible.

RESULTS OF ANALYSIS

In the following discussion, Burials 24 and 44 are described individually in terms of the bones present, their condition, their age and sex, and associated artifacts and ecofacts reflecting the pattern of interment. Table 1 presents a complete inventory of bones identified from each burial.

Burial 24 (44PG151-24)

The burial feature was an oval pit measuring 7.0 feet grid north-south by 5.2 feet grid east-west (grid north was 43 degrees west of magnetic north) with a maximum depth of 1.0 feet from the current surface. The southern half of the feature had been excavated in 1987 and subsequently covered; the northern half was excavated in 1990 and the entire feature was carefully mapped at this time (Hodges 1990). Although osteological analysis could not determine the race of this individual, the burial pit form, bone orientation, and recovery of Roanoke Simple Stamped pottery (Evans 1955) from the pit fill all suggest a Late Woodland/Protohistoric date for this burial.

The human remains consisted of a left femur articulated with a left tibia and fibula, a portion of a left innominate above the leg (part of the ilium and acetabulum) and unidentified bone fragments (UBI-3) which were possibly ribs. The right side of this
individual was represented by a right radius and ulna (not examined by the authors), a right tibia and fibula, and a stained area beneath the lower leg bones likely representing the right tarsals and metatarsals. Finally, two adult premolars with moderate to heavy wear were recovered from the pit fill. No other human bones were identified.

The preservation of all these bones was very poor; long bone shafts were extremely fragmentary and their proximal and distal ends had decayed almost entirely. However, the articulated bones of the left leg and the anatomically correct positions of the remaining bones suggested that this was an extended, primary inhumation and not a secondary burial.

While the bones were fragmentary, their size indicated the individual was an adult at the time of death. Sections of the shafts of the left femur and right tibia were available for measurement for sex determination. The midshaft circumference of the femur was approximately 80mm. Following Bass (1987: 219) and Black (1978: 229), this indicated the individual was a female. This female sex determination was also supported by the circumference at the nutrient foramen of the right tibia of 82 mm (far below the female-male dividing point of 91.21) (Bass 1987:238; Symes and Jantz 1983) and the wide sciatic notch and raised sacro-iliac articulation (Bass 1987: 202) of the left innominate.

Two other characteristics of this burial merit discussion. First, the right femur is absent and, according to the field records (Hodges 1990), there was no staining from decay or other indications a right femur had ever existed above the right tibia and
fibula. Although other possible explanations exist, the most parsimonious conclusion is that the femur, like the upper part of the skeleton, was obliterated by post-depositional decay or disturbance.

The second interesting characteristic of this burial is the inclusion of animal bone with the human remains. A dog cranium and mandible is located with a group of bones associated with the right radius and ulna. Dog burials and the interment of animal remains with humans is common and not surprising for Native American burials. Also, a partial deer sacrum and articulated caudal (tail) vertebrae are located next to the left innominate in the anatomical position where a human sacrum would have been located. However, the position of the deer sacrum may suggest an intentional ritual association with the human innominate (see Hodges 1990).

However, historic paintings of Coastal Virginia and other southeastern Indians (Swanton 1984; plates 42, 64, 70, 91), show animal tails as parts of cloaks or other garments. And, Swanton (1984: 718) cites John Smith as saying that for the Powhatan Indians "for their ordinary burials, they digge a deep hole in the earth with sharpe stakes, and the corp[s]es being lapped in skins and mats with their jewels, they lay them upon sticks in the ground, and so cover them with earth." Thus, the deer remains most likely represent the remnants of a garment or hide shroud (with the tail left on) the individual was buried in.

**Burial 44 (44PG151-44)**

This burial feature was a rectangular pit with rounded corners measuring 6.35 feet northwest-southeast and a maximum of 2.8 feet northeast-southwest. The pit had
a flat bottom and vertical or slightly sloping sides and a depth of 0.45 feet (Hodges 1990). The burial is similar in form to other historic burials at Jordan’s Point. However, a cluster of four prehistoric artifacts along with an unidentified bone near the location of the individual’s right hand may indicate an earlier date. One of the artifacts is a small (29 mm long, 10.6 mm wide), triangular Dallas-like (see Holland 1970) quartz point. Previous studies of similar projectile points (Holland 1955) suggest “smaller triangular points are among the latest occurring” (Turner 1992: 104) during the Late Woodland period. Thus, it is not possible to conclusively determine if this is a Late Woodland/Contact (Native American) or Historic burial.

Bone preservation was again very poor; fragmentary shafts of an articulated right humerus, radius and ulna were noted, along with stains which may represent the right hand carpals and metacarpals. The shafts of the left radius and ulna, also in correct anatomical position, were identified as well. Finally, an unidentifiable long bone was located below the right hand area (Table 1). Again, the cranium, torso and, in this case, the pelvic girdle were all absent due to deterioration (Hodges 1990).

The articulation of the right arm and the correct positioning of the left radius and ulna suggests that, as with Burial 24, this burial represents an extended, primary inhumation. The size of the bones indicate an adult individual, although no epiphyseal areas are present to check for the fusion of epiphyses to diaphyses of long bones. The sex of the individual cannot be determined. As with Burial 24, poor preservation precludes any determination of race, stature or the identification of pathologies, if they existed.
A point of further discussion with this burial is the cluster of prehistoric artifacts and an unidentified long bone below the individual's right hand. The long bone was very fragmentary and may or may not be human. Directly beneath this bone was the Late Woodland projectile point described above; in fact, portions of the bone cortex adhered to the top of the point. Beneath the bone and point was a gray stain representing decayed organic material. Other temporally earlier artifacts were associated with these materials, including a broken Miocene shark's tooth, a probable Late Archaic stemmed projectile point and an Early Woodland large triangular point (Hodges 1990).

The tight clustering of all these items suggests the possibility that they were a burial cache or part of a "medicine bundle" of personal items buried with this individual as a grave offering. The organic stain beneath the bone and point may represent the remnants of a container which held these items. Alternatively, these items may also represent prehistoric artifacts collected by and buried with a historic individual.

**SUMMARY AND RECOMMENDATIONS**

In summary, Burials 24 and 44 from 44PG151 represent single, primary, extended inhumations of adult individuals. Burial 24 definitely contains the remains of an adult female. The individual in Burial 44, however, was too poorly preserved for sex determination and may represent either a Native American or Historic European interment. Many bony elements were missing, most likely due to decay in the highly acidic soils of this region. The dog bones in Burial 24 represent a probable dog burial included with the human remains. The deer sacrum and tail in the same burial likely
represent the remains of a deer hide cloak or shroud.

Finally, the concluding recommendations and comments concerning these burials include the following:

1. The remains will be returned to the Virginia Department of Historic Resources in Richmond for curation and future reburial;
2. If possible, before reburial bone samples should be taken and retained for future trace element analysis (otherwise, the remains have limited research value and may be reburied);
3. Microwear analysis should be conducted on the projectile points from Burial 44. Such analysis could determine if these points were hafted and used in hunting and if the temporally early points had been collected and retouched long after their initial manufacture.

ABSTRACT

This report is an osteological assessment of human remains from Jordan's Point Ossuary (44PG333/1) in Prince George County. A minimum of 17 individuals is represented by these remains. These reflect both sexes as well as all major age categories (12 adults and 5 subadults). Pathologies described include dental caries, periostitis, and generalized calvarial lesions. In addition, evidence for defleshing is considered. Finally, the spatial distribution of ossuary remains is analyzed for possible patterning in mortuary treatment. In spite of the poor condition of most of the bones, considerable information on the prehistoric inhabitants of Jordan's Point can be learned.

INTRODUCTION

The purpose of this report is to provide an osteological assessment of a prehistoric ossuary from Jordan's Point (44PG333/1) in Prince George County. The ossuary, discovered through construction of a residential drainage trench and reservoir holding tank, was excavated August 16-24, 1989, by members of the Department of Historic Resources. The ossuary is believed to date to the later portion of the Late Woodland period--ca. A.D. 1500-1600. Included in this osteological analysis is, first, a complete bone identification inventory, along with age and sex assessments, when possible. In addition, the minimum number of individuals (MNI) represented at this ossuary is be estimated. Pathologies are described and, finally, the spatial distribution of ossuary bones is discussed. In short, an attempt is made to document as much biological information as possible from the skeletal remains from this ossuary.

METHODS OF ANALYSIS

Although substantially impacted by the construction, the intact remnant of the ossuary was divided into three main areas: 1D, the eastern third of the ossuary; 1E, the center third; and 1F, the western third. Individual catalogue numbers were assigned to each bone or bone group. Preservation for most all bones was poor--field notes indicate significant damage to bones from natural decomposition, construction
machinery and fill, as well as weathering agents. Bone deterioration increased even more during laboratory analysis. Because of this, preliminary notes were taken on each bone before any manipulation of them occurred (bone often decomposed upon touch). Subsequent to this, bones were carefully cleaned by dry brushing or the application of a small amount of water.

Identification of bone elements followed Bass (1987), Cartmill et al. (1987), and Shipman et al. (1985). Since preservation of bone was so poor, estimation of age and sex of individuals occurred in only a few cases. For subadults, age determination was based on sequence of dental eruption following Schour and Massler (1941) as well as dental calcification comparison to standards developed by Moorrees, Fanning and Hunt (1963a, 1963b). In two instances, subadult long bone length was compared to Johnston’s (1962) Indian Knoll long bone lengths as well as Merchant and Ubelaker’s (1979) Arikara lengths. For adults, only less reliable aging methods could be applied. For example, coronal, sagittal, and lambdoidal ectocranial sutures were compared to standards of McKern and Stewart (1957:28-30) for estimation of degree of suture closure. Amount of dental attrition was compared to standards summarized in Guagliardo (1982). And, in two instances, ossification of the transverse lines of the sacrum was compared to standards found in McKern and Stewart (1957).

Sex estimation could be based on visual observation of morphological features of the cranium only (no diagnostic
innominate morphological features were preserved). Classic cranial traits considered included size of brow ridges, shape of upper eye orbit borders (dull versus sharp), degree of muscle markings, shape of chin (square versus round), size of mastoid process, and overall appearance of the cranium (robust versus gracile) (Bass 1987; Keen 1950:68-70; Krogman 1978:115). Sexing criteria were not applied to subadults (below 18 years of age).

Determination of MNI was accomplished by tabulating frequency counts for each major bone. Crania and long bones such as fibulae and femora proved to be most numerous and were relied upon primarily for the final MNI figure. No association between cranial and postcranial remains for any individual could be made.

Finally, all bone was inspected for evidence of pathologies, nutritional stress, or pre- or post-mortem alterations. Spatial distribution of bones within the ossuary was also analyzed in order to discern possible patterning in mortuary treatment of the ossuary individuals.

RESULTS OF ANALYSIS

Bone Inventory

Appendices A, B, C, and D contain inventory listings of each bone identified from the Jordan's Point Ossuary. When possible, side estimation for paired bones (such as long bones) was performed. As can be seen, most of the bones present are crania and major long bones such as femora,
tibiae, fibulae, and humeri. It is believed that this most likely is a factor of preservation rather than differential burial, since field notes indicate that smaller, more fragile bones like phalanges, ribs, and vertebrae, were present in the ossuary, but didn't "survive the excavation process well" (Hodges 1989:3).

Most all bones were completely disarticulated; however, an exception was F28, consisting of an adult proximal sacrum fragment in articulation with the iliac portion of the left innominate. In addition, F29 represented an articulated series of lumbar and thoracic adult vertebrae, very possibly representing the same individual as F28. This suggests the burial of individuals in the ossuary in various stages of decay and perhaps undergoing variable mortuary treatment.

MNI

Frequencies of major long bones and crania identified are listed for each ossuary area in Tables 1-5. A minimum number of 17 individuals was documented for the Jordan's Point Ossuary. Of these, five occurred in Area 1D, four in Area 1E, and five in Area 1F. In addition, three individuals are associated with ossuary fill disturbed by construction (designated 44PG333/1A) and undisturbed fill of the ossuary (designated 44PG333/1B). MNI in Areas 1D and 1E was based primarily on frequency of crania and femora, since these elements were most numerous. However, Area 1F MNI was based primarily upon long bone frequency, particularly

*MNI=1 (adult)*
fibulae, tibiae, and femora, the most prevalent diagnostic
elements. Ages and sexes of these individuals are discussed
below.

**Age and Sex Distribution**

Table 6 presents age and sex estimations for individuals
from Jordan's Point Ossuary. As can be seen, only 12 of the
total 17 individuals could be aged or sexed, based primarily
upon the presence of crania or dentition. All major age and
sex groups are represented in this ossuary. Of the 12 iden-
tified individuals, seven are adults and five are subadults.
Of the adults, two are female, three are male, and two are of
indeterminate sex.

**Pathologies**

Pathology occurrence across the Jordan's Point Ossuary
remains was fairly rare. By far, the most common pathology
noted was presence of dental caries, noted for five of the
total of over 30 teeth present (D9, D18, D26, F21, 1A).
Extensive evidence of caries was noted for F21; interesting-
ly, this individual was between 18.5 and 20.5 years of age.
Thus, even for the relatively young, oral health was a sig-
ificant concern.

Generalized infectious reactions were noted on four
crania or cranial fragments--D8, E19, F21, and 1A. These
were manifested as light to moderate "pitting" of the
calvarial surface (usually in the regions of the parietals
and posterior frontal) indicative of non-specific responses

to disease or nutritional stress (Ortner and Putschar 1981).

In one instance, this was accompanied by further pathological conditions. Cranium F21 exhibited a deep healed lesion (ca. 1-2 cm in length) in the area of the left posterior portion of the frontal.

Similar non-specific infectious reactions (periostitis) were noted for two postcranial fragments. These were D40, an adult fibula shaft, and F20, an adult tibia shaft.

Finally, numerous cuts and grooves were noted on many of the ossuary remains; however, most of these appeared to be of fairly recent origin and likely represent post-depositional damage by construction and excavation. But in three instances, these cuts and grooves appeared much more ancient. The most prominent example was Cranium D30, wherein two parallel grooves roughly 2-3 cm in length extended across the right portion of the frontal. A similar sized cut mark traversed the left frontal of E21, while multiple smaller cuts (1 cm) were noted along the left frontal (near the coronal suture) of E19. It is possible that these represent defleshing marks very common to Virginia ossuary (and non-ossuary) human remains (Hoyme and Bass 1962).

Spatial Distribution

Figures 1-3 illustrate the spatial distribution of major ossuary elements as they occurred in situ in the field before removal in Areas 1D, 1E, and 1F. Some bones are underneath those represented on the maps--locations of these can be found in Appendices A-C.
Figure 1. Spatial distribution of major bones in Area 1D (redrawn from Hodges 1989).
Figure 2. Spatial distribution of major bones in Area 1E (redrawn from Hodges 1989).
Figure 3. Spatial distribution of major bones in Area 1F (redrawn from Hodges 1989).
As mentioned previously, no conclusive associations could be made between any cranial and postcranial elements. In addition, no single individuals could be discerned within the ossuary, with the exception of the association of F28 and F29. The Ossuary predominantly reflects the secondary deposition of remains of disarticulated individuals [the articulated remains of F28 and F29 once again are exceptions]. However, some spatial patterns can be identified. Areas 1D and 1E contain most of the crania, aligned in a semicircle across these two regions. In contrast, a collection of assorted long bones comprises the majority of remains from Area 1F. Given the fact that much of the ossuary was substantially impacted by construction, no conclusive statements can be made regarding the meaning of this patterning.

CONCLUSIONS

At least 17 individuals are represented by the Jordan's Point Ossuary remains. All major age and sex groups are noted. Most were disarticulated secondary interments; however, one individual was at least partially articulated. This suggests the burial of individuals in the ossuary in various stages of decay. Pathology frequencies were low, but included incidences of dental caries, periostitis, and calvarial "pitting" indicative of non-specific infectious reactions to disease or nutritional stress. In addition, defleshing marks were possibly identified for three individuals. No distinctive spatial patterning of bones
across the ossuary could be noted due to the substantial post-depositional disturbance of the ossuary. However, it appeared that crania were concentrated in Areas 1D and 1E, while postcranial remains primarily constituted Area 1F. No cranial remains could be directly associated with postcranial ones, and identification of isolated individuals within the ossuary was difficult.

In sum, this ossuary is similar to others in the Virginia Coastal Plain and Maryland Tidewater region during the Late Woodland in its mortuary details (Outlaw 1990; Ubelaker 1974). Even though preservation was poor and post-depositional damage extensive, much biological information was learned concerning the prehistoric inhabitants of this ossuary. Thus, this ossuary serves as an excellent example of the important data to be gathered from even the most damaged sites, and bespeaks the necessity for preserving (and analyzing) these valuable and limited resources in spite of the limitations they manifest.

Note on Curation. These ossuary remains are currently being housed at the Archaeology Laboratory of the Department of Sociology/Anthropology, Radford University, Radford, Virginia. The author wishes to thank Beth Acuff, Cliff Boyd, Dave Hazzard, and Mary Ellen Hodges for access to and assistance with these remains.
